UNITED STATES DELEGATION

April 23, 1947

Second Meeting of the U. N.
Preparatory Committee for the United Nations
Conference on Trade and Employment...Geneva

The attached schedule of tariff concessions offered by the United States is subject to the following comments.

1. Offers are made in the light of the requests for tariff concessions made by the United States upon the other members of the Preparatory Committee.
2. Offers are made on the assumption that trade-agreement negotiations will take place at an early date between the members of the Preparatory Committee other than the United States, and that such negotiations will result in substantial benefits to the United States.
3. Offers are contingent upon the adoption of satisfactory general provisions regarding tariffs and trade, to enter into force simultaneously with the tariff concessions.
4. Offers in this schedule which affect contractual preferential margins are subject to consultation with the Government enjoying the preference, as contemplated by Article 24, paragraph 1 (a) of the Report of the Drafting Committee of the Preparatory Committee of the United Nations Conference on Trade and Employment (Document E/PC/T/34 of March 5, 1947).
5. By this schedule the United States is communicating to each Government with which it enters into negotiations, not only the offers which it is prepared to make to that Government, but also the offers which, on the foregoing understandings, it is prepared to make to each other member of the Preparatory Committee. This schedule of offers should be treated in the strictest confidence by the Government to which the attached copy is transmitted, and it is requested that its contents not be discussed with the delegations of any other Government until such time as the

United

-2-

United States has begun negotiations with, and has handed a copy of this schedule to, such other Governments.

6. The offers in this schedule are expressed, not in the language of the United States tariff, but in the language of Schedule A, United States Department of Commerce Statistical Classification of Imports into the United States, September 1, 1946 edition. The language of Schedule A is not to be taken as a definitive legal description of the product involved; such description will have to be included in the final agreement.
