PARTICIPATION BY CZECHOSLOVAKIA IN THE TRADE NEGOTIATIONS

Communication submitted by the Government of Czechoslovakia

Czechoslovakia is one of the original signatories to GATT and has participated in all the tariff negotiations held under its aegis; it has thus contributed substantially to the common effort to create conditions for a continued expansion of international trade and, in general, to the fulfillment of the basic objectives of the Agreement.

The Czechoslovak economy is an open economy intimately linked to the world markets and firmly based on the principle of international division of labour. The Government believes that trade should be conducted in accordance with the principles of most-favoured-nation treatment and non-discrimination, which it fully observes in the conduct of its foreign trade. In particular, the operation of the Czechoslovak foreign trade corporations is guided solely by commercial considerations and other relevant criteria of the General Agreement.

The foreign trade policy followed by the Czechoslovak Government is not only consistent with the objectives, basic principles and provisions of GATT but embodies a conscious effort at creating market opportunities for imports. As a result, imports into Czechoslovakia have expanded substantially, in fact by no less than three-fold between 1948 and 1963, which clearly demonstrates the political willingness and institutional capability of Czechoslovakia to provide effective reciprocal advantages to its trading partners in GATT.

Czechoslovakia is fully convinced of the urgent need to promote a further general expansion of international trade and to this end welcomes the Kennedy Round of trade negotiations. As has been stated by the Czechoslovak delegation at the ministerial meeting in May 1963 and at subsequent meetings of the Trade Negotiations Committee, the Government of Czechoslovakia desires to participate fully in this activity. The Czechoslovak Government wishes to present to the Trade Negotiations Committee the following initial offer to the forthcoming negotiations including suggestions of commitments of Czechoslovakia, which might be subsequently incorporated as an integral part of the terms of agreement to result from the trade negotiations.

Terms of Czechoslovak participation in the General Reduction of
Tariff and Non-Tariff Barriers

- (1) "Czechoslovakia will take part in the linear tariff reduction in accordance with the general plan agreed upon at the tariff and trade conference."
- (2) "Czechoslovakia will adopt economic policies which will allow the other contracting parties to share in the growth of the Czechoslovak market. Desirous of expanding the access to its market Czechoslovakia will provide effective market opportunities for imports from the other contracting parties substantially equivalent to those accruing to Czechoslovakia from the reduction of their tariff and non-tariff barriers. In formulating its economic plans Czechoslovakia will make the necessary provisions for increasing the volume and broadening the structure of its imports with special regard to the needs of developing countries."

(3) "Through the aforementioned approach Czechoslovakia will aim at increasing its total imports from the other contracting parties by at least 30 per cent by the time of completion of the implementation of the tariff reduction plan agreed upon at the tariff and trade conference (i.e. at the end of five years)."

(4) "Conditions will be created for the increase of Czechoslovak imports above this level if additional effective market opportunities will be provided for Czechoslovak exports by the contracting parties."

(5) "In case the reduction of tariff and non-tariff barriers by the other contracting parties in accordance with the tariff and trade conference plan should fail to provide effective market opportunities to enable Czechoslovakia to achieve equivalent results, Czechoslovakia would make appropriate representations to, and seek consultations with, the contracting party or parties concerned under the procedures of Article XXII and, if necessary, Article XXIII of the Agreement with the view to redress the balance of mutual commitments."

(6) "Czechoslovakia will not require full reciprocity from less developed contracting parties for this offer."

(7) "Czechoslovakia declares itself ready to accord sympathetic consideration to representations and to afford adequate opportunity for consultations in the manner envisaged in Article XXII of the Agreement, especially with regard to:

- (a) any question concerning the realization of the commitments referred to above and the remedy of possible difficulties, and

(b) any views presented by another contracting party concerning economic and trade measures adopted by Czechoslovakia affecting international trade."

(8) " It is understood that the provisions of the General Agreement and the relevant Protocols and Declarations shall remain valid and continue to govern the trade relations between Czechoslovakia and each of the other contracting parties."

S E C R E T

GATT

TRADE NEGOTIATIONS

Czechoslovak Offer

Explanatory notes by the Government of Czechoslovakia

The Government of Czechoslovakia has submitted the following explanatory notes on its offer.

1. The Czechoslovakian offer reaffirms in its introductory part the primary importance of the most-favoured-nation principle, establishing equality of treatment as a basic condition for the expansion of international trade. Combining a linear cut of duties with positive measures corresponding to the nature of its planned economy Czechoslovakia wishes to stress its desire and readiness to contribute actively to the overall expansion of international trade which is the ultimate end of the Kennedy Round negotiations.

Paragraph 1 of the offer endorses the linear reduction of tariffs as envisaged in the Kennedy Round.

The operation of tariffs in a planned economy is modified; while it is not a direct price creating element and does not directly determine the volume of imports it operates through the budget of the foreign trade corporations which have an interest in reducing the tariff component of the purchasing price thus maximizing their profit.

2. The offer covers industrial as well as agricultural products. Should it appear in the final stage of the conference that the results are limited to industrial products only, Czechoslovakia would be obliged to limit the increase of imports from contracting parties indicated in paragraph 3 of its offer to other than agricultural products only.

There is no special system of protection for agriculture in Czechoslovakia, and the general rules for the importation of industrial goods into Czechoslovakia apply to agricultural products. It is therefore not necessary to provide for special rules for agriculture in respect of Czechoslovakia.

The hard core of the offer is the proposed commitment to increase Czechoslovak imports from the contracting parties by 30 per cent within the five years following the conclusion of the conference. For practical reasons Czechoslovakia prefers to indicate a total target within five years and not to attempt annual staging. This does not mean that the fulfilment of the commitment should not start immediately. Consultations suggested by any contracting party concerned about the progressive implementation of the commitment would be the proper way of dealing with any problems that might eventually arise.

3. There is a problem in formulating the target of expanding Czechoslovak imports. In their purchasing operations the Czechoslovak foreign trade enterprises proceed in accordance with Article XVII of the General Agreement being guided by commercial considerations and the authorities have no power to interfere with their freedom to seek the best source of supply. The profit-mindedness of these enterprises tends to be accentuated by the envisaged system of economic management. Therefore it would conform more to the principles of GATT if global undertaking covering all imports into Czechoslovakia were formulated and not only that covering only imports from the contracting parties.

However, such an undertaking being less attractive to the contracting parties, an estimation based on previous experience was made, indicating the expected volume of the contracting parties' exports to Czechoslovakia. It implies naturally the assumption that no unforeseen unfavourable changes occur on the side of trading partners of Czechoslovakia that would hamper the fulfilment of this undertaking.

4. The increase of imports into Czechoslovakia is not the product of an automatic process but the result of measures aimed at the inclusion of Czechoslovak economy into the international division of labour and at a rational utilization of international trade in meeting some of its requirements. To this end Czechoslovakia is taking measures adapting its economy to this orientation. On the one hand it may mean restriction of investments in particular branches of production where increased imports are foreseen, and on the other hand streamlining of investments and the expansion of production capacities assuring the needed means of payment. Thus Czechoslovakia aims at a deliberate creation of effective market opportunities in the sense of the offer. It is evident that this outward-looking concept implies the adaptation of the Czechoslovak economy and binds material and financial resources. Consequently, should the results on the side of Czechoslovak exports fail to meet the expectations, difficulties for the Czechoslovak economy would arise.

The commitment to increase imports by 30 per cent is based on the assumption that after a general reduction of tariffs by 50 per cent, Czechoslovakia could take measures that would open the way to a broader utilization of external resources by means of international trade. In so far as the offer refers to a possible reduction of the Czechoslovak commitment, it means that the foreseen measures would have to be reviewed in the light of the reduced prospects for exports. If on the contrary greater possibilities for exports should appear, it would be necessary to provide for additional measures in the Czechoslovak economy to make use of these possibilities.

It is therefore clear that we have not to deal with an automatic process of maintaining the trade equilibrium, because the export capacities of Czechoslovakia are limited and a room for imports must also be created by deliberate measures and adaptations.

5. Committing itself to increase imports by 30 per cent Czechoslovakia sets itself a target in terms of concrete results which should be met by comparable results on the part of other contracting parties thus establishing the effective material reciprocity. The mere granting of tariff reductions cannot assure but

only facilitate an increase of imports. This difference in quality of undertakings should be taken into account when evaluating the balance of mutual undertakings in quantitative terms.

6. The offer is an initial one, i.e. a maximum offer which has been prepared on the assumption that the agreed linear cut will be 50 per cent, that there will be measures of trade liberalization with comparable effect in the case of agricultural products and non-tariff barriers, and that the lists of exceptions maintained after the justification procedure represent a bare minimum and that they do not comprise important Czechoslovak export items. If the overall linear cut is not 50 per cent, if results with comparable effect are not achieved in the case of agricultural products and non-tariff barriers, and if the final lists of exceptions should comprise items of substantial interest to Czechoslovakia, the Czechoslovak offer would have to be accordingly reduced.
7. The offer, subject to negotiation and with exception of paragraph 6, should be the basis for the formulation of legal obligations of Czechoslovakia to be incorporated into the protocol on the results of the conference.
8. Czechoslovakia requires from its partners effective market opportunities which would represent a counterpart to its own commitment. Even in a market economy the access to a market is not determined solely by the level of tariff protection and the extent of non-tariff barriers; it depends also on a number of other elements of economic policy. In committing itself to a positive outward-looking policy Czechoslovakia considers it necessary that also its partners actively stimulate all elements which create or influence the creation of an effective demand for imported goods. These include various devices of credit, investment, financial and monetary policies without which the concessions granted in the field of tariffs might be impaired. It is the more justified for Czechoslovakia to require from its partners to abstain from administrative measures which might frustrate the advantages derived from the tariff concessions.
9. The purpose of the consultations is to seek the causes of a non-satisfactory fulfilment of the commitment and to correct an unfavourable development. Even if the Czechoslovak commitment is a global one, concrete reasons for a failure must naturally be sought in relations with individual countries. This does not mean that the purpose and the objective of these consultations should be to achieve a bilateral equilibrium, but rather to correct any considerable deviations from a normal development of trade which threaten the fulfilment of the commitment.
10. The global concept of the Czechoslovak offer corresponds to the linear character of the negotiations in the Kennedy Round and takes as its basis the given structure of trade with the contracting parties and the known pattern and trends of this trade. The changes in the Czechoslovak economy which are being prepared are clearly outward-looking, and there is no reason to be afraid of arbitrary decisions to the detriment of the contracting parties. It would therefore not be reasonable to expect and ask that Czechoslovakia should consolidate in her commitment the present structure of imports. It seems however useful to offer

to the contracting parties a possibility for consultations where they might present their interests and claims whenever they would feel that the development does not meet their expectations concerning the balanced fulfilment of the accepted mutual commitments.

11. Paragraph 8 of the offer confirms that mutual relations between Czechoslovakia and the other contracting parties will be also in the future governed by the provisions of the General Agreement. That means inter alia that the Czechoslovak foreign trade enterprises will also in the future be guided by the provisions of Article XVII on non-discriminatory treatment, that any party may invoke Article XII or XIV in case of balance-of-payments difficulties, and that countries which cannot claim such difficulties in relation to Czechoslovakia are obliged to accord full liberalization to their imports from Czechoslovakia to the same extent as they are granting it to imports from the other contracting parties of the General Agreement.

Some countries have so far not fully complied with these obligations and Czechoslovakia has been therefore obliged to have recourse to bilateral solutions. Czechoslovakia considers, however, that a multilateral regulation of international trade relations is more favourable for an overall expansion of trade, and does hope that the actual system of bilateral arrangements could be in the near future replaced by a multilateral system, even if it is clear that it hardly can be achieved overnight.

ANNEX

Some Features of the Envisaged System of
Planning and Management in Czechoslovakia

The offer has been prepared on the basis of the present organization of economic and planning system. Important changes in the management of the Czechoslovak economy are under consideration and preparation. Changes of that importance can, however, be materialized and effected only very carefully and gradually so that this process will extend over several years. As far as external trade is concerned the preparatory discussions are still under way. Nevertheless the aims of the prepared changes are of a nature that may only increase the value of the offer in its long-term projection.

The guiding lines of the prepared changes may be outlined as follows:

In the post-war period Czechoslovakia aimed primarily at an all-round mobilization of its own economic resources in order to satisfy the basic needs of its population and thus to respond to expectations associated with the changes in the political and social structures.

After this period of more or less extensive growth Czechoslovakia arrived in the late 1950's at that advanced stage of development when a deeper specialization turns out to be a prime necessity and the only way how to keep pace with the contemporary rate of technological progress.

The old system of planning and management tended to stimulate a linear development of all branches of industry and of all their wide range of production; this tended to petrify the industrial structure achieved in the early 1950's. Inadequate attention for the world trends in specialization threatened to undermine the future rates of growth. The issue of having a rational pattern of economy and of its place in the international division of labour came forcefully to the forefront.

New instruments of economic policy are indispensable to this effect. They should combine the advantages of using the central authority for making basic macrodecisions and, on the other hand the advantages of shifting the responsibility to producing units linking them closely to their material interest and introducing more effective market relations and elements of competition among them. A number of incentives will be brought into play through the use of credit, interest, etc. in order to stimulate an effective use of the capital invested.

Accordingly, while the basic proportions of the economy will continue to be shaped by the central authority, primarily by means of a selective investment policy, it will be left for the production units at a lower level to dispose of the means assigned to them, using their best knowledge of the market and giving due respect to the ultimate criterion, namely the satisfaction of the consumer. In the new system the production units will be directly interested in the maximization of sales, of achieving best possible prices and increasing their profits; in the

old system these criteria were often stifled by the overriding quantitative indicators of success or failure of their activities. It follows that the production units will have a much greater freedom of choice in determining the pattern of production responding readily to the evolution of demand.

Considerations of a greater utilization of external resources are a salient feature of all economic concepts and an integral part of planning deliberations. Consequently there is a growing interest in the confrontation of the profitability of the domestic production with the production abroad and in the evaluation of the relative advantages of increasing imports instead of further extensive investment; the natural prerequisite for it is a parallel evaluation of export potentialities. It is manifest that a broad contact with the development in world markets is essential to put this scheme in practice; this contact should not be limited to the central authority but should be brought down to all levels where the plan is formulated and where decisions are taken.

It is therefore expected that the new measures should provide for the production units a closer contact with the world market and let them feel its impact. This should be done both through changes in organization and through economic incentives, through their economic interest. Experiments are being made of bringing the production units closer to problems of selling or purchasing in the world markets; in other cases factories and enterprises of foreign trade might create joint units taking care of services, technical consultation, etc. Factories will have the right to retain part of the export earnings in foreign exchange and to use it according to their discretion.

The new system of three categories of prices (fixed, maximum and free prices) will be in no category an obstacle to imports; on the other hand a simple comparison of the domestic price with the price offered by the foreign supplier will not even in the future open the door to a direct access to the Czechoslovak market; the confrontation of foreign and domestic prices is, however, an important factor in the long-term planning of the pattern of imports which must include the evaluation of comparable costs. The free prices may become an additional source of incentives for an expansion of imports. Increased imports should correct possible tendencies towards an excessive rise of prices especially in cases where the producer would tend to exploit his monopoly position at the market. It is, however, evident that even in these instances this would be a purposeful regulation of the domestic market, in other words a directed, organized competition with a predetermined purpose.

All this current process tends to create a greater room for imports to Czechoslovakia, a greater access to its market in terms of effective market opportunities.

CZECHOSLOVAK MAIN EXPORT ITEMS ON EXCEPTIONS LISTS

1. The attached table sets out the main Czechoslovak export items and indicates where these items appear, in whole or in part, on the exceptions lists of the European Economic Community, Finland, Japan, United Kingdom and the United States. These items may be total exceptions or partial exceptions.
2. The items selected are those published in the official "Facts on Czechoslovak Foreign Trade" and the "United Nations Year Book of Trade Statistics". There may be some items of more minor importance in Czechoslovakia's exports which also appear on exceptions lists, e.g. gloves, which is on the United States list. The recent trend in Czechoslovak planning has been to emphasize the need to reduce the diversity of industrial production and to concentrate on items which can be produced efficiently; it is therefore perhaps unlikely that new products will be added to this list of main export items during the next few years.

VERY URGENT

No.: 4015/66

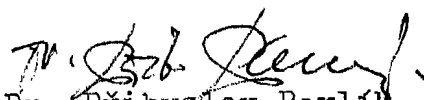

Geneva, 20 December 1966

Dear Mr. White,

With reference to the document TN.64/82 of 27 October 1966 I have been instructed to convey to you the assessment of our delegation and of our government of the present position in the Kennedy Round of Trade Negotiations.

I would much appreciate your arranging for reproduction and distribution of this document as soon as possible, if facilities in the secretariat permit, still before Christmas. At the same time I should like you to excuse a certain, but very unwellcome delay, caused by unexpected personal reasons in the respective department of our Ministry of Foreign Trade.

Accept, Sir, the assurances of my highest consideration.

Dr. Přibyslav Pavlík

Permanent Representative

Mr. Eric Wyndham White
Director general
GATT
Villa Le Bocage
G e n e v a

Czechoslovak Delegation

Prague, 15 December, 1966

N o t i f i c a t i o n

in Response to Note from the Chairman of the Trade
Negotiations Committee - Document TN.64/82 of 27 October 1966.

1. - Czechoslovakia has actively participated in the Kennedy Round negotiations and subject to reciprocity has initially offered an overall 50 per cent tariff reduction on all industrial and agricultural items without exceptions and a 30 per cent increase of imports from contracting parties within the period of 5 years after the completion of the Conference.

The Czechoslovak offer was a maximum possible offer prepared on the assumption that a significant liberalization of world trade shall be achieved, i.e. that the agreed linear cut shall be 50 per cent with comparable effects in the sphere of non-tariff barriers and of agricultural products for which increased opportunities for access to world markets shall be provided, that the lists of exceptions maintained after the conclusion of the negotiations shall represent a bare minimum and that they shall not comprise important Czechoslovak export items, and that all discriminatory import restrictions with regard to Czechoslovakia shall be eliminated.

Some industrialized countries have not been in a position to make offers without introducing extensive lists of exceptions into the negotiations. In bilateral negotiations between Czechoslovakia and other participants only rather limited adjustments have so far been obtained in the offers submitted by other countries.

2. - As it has been stressed in the Explanatory Notes to the Czechoslovak offer, the offer with the view to redress the balance of mutual commitments would have to be accordingly reduced if

the assumptions mentioned in par. 1 of this notification were not fulfilled.

3. - In the Explanatory Notes (par.11) the Czechoslovak Delegation has drawn the attention of the participating governments to the fact that some contracting parties do not accord full liberalization to their imports from Czechoslovakia to the same extent as they are granting it to imports from the other contracting parties of the General Agreement, although they cannot claim any balance of payments difficulties, and although such discriminatory import restrictions are maintained contrary to the basic principles and provisions of GATT as well as to the spirit of the Kennedy Round.

The Czechoslovak Delegation wishes once more to point out that the elimination of all such discriminatory import restrictions is an indispensable prerequisite for achieving a higher degree of multilaterality of trade between Czechoslovakia and other contracting parties as well as for the maintainance of the Czechoslovak offer. The Czechoslovak Government has never accepted such discriminatory practices and this factor would consequently weigh heavily in the final overall evaluation of the Kennedy Round negotiations by Czechoslovakia.

4. - During the course of bilateral negotiations which have taken place since spring 1965 up to 8 December 1966 the Czechoslovak Delegation has expressed specific requests concerning items of export interest to Czechoslovakia. Annex A contains a list of most important Czechoslovak export items where a satisfactory solution of the problem of tariff reduction or other measure of trade liberalization in the respective country has not yet been found, and where substantial offers are requested from the major trading partners. On products

or areas as shown in Annex A the Czechoslovak Government wishes to secure from its principal negotiating partners tariff and non-tariff concessions. The omission in this list of smaller items which have been indicated in the earlier bilateral negotiations as being of interest to Czechoslovakia should not be interpreted as a withdrawal of the corresponding Czechoslovak requests.

The list in Annex A does not comprise items, which up to 30 November 1965 were not included in exception lists or where a satisfactory solution has already been found.

The Annex does not contain items of special Czechoslovak export interest with regard to several countries, like Yugoslavia and Spain with whom the Czechoslovak delegation has not yet had the possibility of entering into bilateral discussions.

5. - If the offers of major trading partners are not improved to the necessary extent, if the final results do not comprise satisfactory solutions and improvements concerning the items included in Annex A and if no satisfactory solution is found to problems relating to discriminatory non-tariff barriers, Czechoslovakia would ultimately be obliged :

- a) to withdraw the products listed in Annex B from its offer for a linear tariff reduction, and
- b) to reduce the offer for an increase of Czechoslovak imports from the contracting parties (par. 5 of the Czechoslovak offer) from 30 to 21 per cent.

Annex B represents, of course, an initial and conditional list.

6. - This assessment of the Czechoslovak position was prepared on the basis of the situation prevailing on 30

November 1966, and does not take into account the possible withdrawals included in the assessment of other participating countries presented on 30 November 1966. Should these additional withdrawals, which at first sight include many important items of Czechoslovak export interest, be brought into effect, Czechoslovakia reserves itself the possibility to reduce its offer further and to withdraw further items from the general tariff reduction.

7. - Finally, in drawing up the initial and conditional list of withdrawals, the Czechoslovak Government has had particular regard to the interest of developing countries. If Czechoslovakia is forced to make withdrawals or to take measures set out in par. 5.b, - it is the policy of the Czechoslovak Government not to impair the export interests of the developing countries.

Czechoslovak Delegation.

D R A F T

Provisions relating to the contribution of Czechoslovakia to be included in the Protocol on the results of the Kennedy Round.

Article I

Provision relating to linear tariff reduction and including possible exceptions (similar to corresponding commitments of other participating countries).

Article II

(1) The Czechoslovak Government will pursue an economic policy which will enable other contracting parties to share in the growth of the Czechoslovak market.

(2) The Czechoslovak Government will provide market opportunities for imports from the other contracting parties substantially equivalent to those accruing to Czechoslovakia from the reduction of their tariff and non-tariff barriers.

(3) In pursuing its economic policy Czechoslovakia will take the necessary measures for increasing the volume and broadening the composition of its imports with special regard to the needs of developing countries.

Article III

(1) Through the aforementioned approach the Czechoslovak government will create conditions for an increase of its total imports from the other contracting parties to the General Agreement and countries with a special relationship to the General Agreement by at least per cent by the time of the

completion of the tariff reductions and of granting other concessions by the other participating countries. The basis for this increase will be the average level of total imports from these countries into Czechoslovakia in the years to

(2) Adequate conditions for an increase of Czechoslovak imports above the level mentioned in the preceding paragraph will be created, if Czechoslovak exports attain a more favourable growth as a result of the implementation of the commitments of the other contracting parties.

(3) In case the reduction of tariff and non-tariff barriers by the other contracting parties agreed to under this Protocol should fail to enable Czechoslovakia to achieve equivalent results, the Czechoslovak Government is free to make appropriate representations to, and seek consultations with the contracting party or parties which it considers to be concerned under the procedures of Article XXII and, if necessary, Article XXIII of the Agreement with a view to redress the balance of mutual commitments.

Article IV

The Czechoslovak Government will accord sympathetic consideration to representations and afford adequate opportunity for consultations envisaged in Article XXII of the Agreement, especially with regard to :

- a) any matter relating to the realization of the commitments referred to above and the remedy of possible difficulties, and
- b) representations made by any contracting party relating to economic and trade measures adopted by Czechoslovakia

and affecting international trade.

Article V

The Czechoslovak Government will be ready, before the expiration of its commitment under paragraph 1 of Article III, to enter into renegotiations of this commitment with a view to maintain its commitment at a general level corresponding to the reciprocal commitments of the other contracting parties.

Article VI

The provisions of the General Agreement and the relevant Protocols and Declarations shall remain in force and continue to govern the trade relations between Czechoslovakia and each of the other contracting parties.

Note :

The Czechoslovak Government is ready to enter into its commitments under Article II and III above on the assumption that the contracting parties bound towards Czechoslovakia by obligations under the General Agreement will give to imports from Czechoslovakia treatment in respect of quantitative restrictions and trade controls not less favourable than that applied to imports from other contracting parties, and that they shall support in their mutual relations with Czechoslovakia further progress in the process of multilateralization of trade.

ITO

Note:

The Czechoslovak Government is ready to enter into its commitments under Article II and III above on the assumption that the contracting parties bound towards Czechoslovakia by obligations under the General Agreement will give to imports from Czechoslovakia treatment in respect of quantitative restrictions and trade controls not less favourable than that applied to imports from other contracting parties and that they shall apply in their mutual trade relations with Czechoslovakia a multilateral trading system. Should a contracting party fail to proceed accordingly within a reasonable period Czechoslovakia reserves itself the right to resort to appropriate measures.

VERY URGENT

14 APR 1967

Dear Mr. Wyndham White,

According to instructions from my government I am sending you in the enclosure a "Note of the Czechoslovak Delegation" concerning the Kennedy Round Trade Negotiations. I would very much appreciate your arranging for its distribution to all delegations participating in the Conference as soon as possible.

Accept, Sir, the assurances of my highest consideration.

Pavlik

Geneva, 14 April 1967

TRADE NEGOTIATIONSNote by the Czechoslovak Delegation

Czechoslovakia has actively participated in the Kennedy Round trade negotiations and subject to reciprocity has initially offered an overall 50 per cent tariff reduction on all industrial and agricultural items without exceptions and a 30 per cent increase of imports from contracting parties within the period of five years after the completion of the conference.

The Czechoslovak offer was a maximum possible offer prepared on the assumption that the agreed linear cut would be 50 per cent, that measures of substantial trade liberalization with comparable effects in the field of agricultural products and non-tariff barriers will be agreed upon, that the list of exceptions maintained after the conclusion of the negotiations will represent a bare minimum and that they will not comprise important Czechoslovak export items.

As has been stressed in the Explanatory Notes attached to the Czechoslovak offer of 1964, in the notification of Czechoslovakia of 15 December 1966 as well as in the draft of "Provisions relating to the contribution of Czechoslovakia to be included into the protocol on the results of the Kennedy Round trade negotiations" handed over directly by the Czechoslovak delegation to its most important trading partners - participants in the Kennedy Round, the Czechoslovak Government would be ready to enter into the commitments mentioned in paragraph 1 of this note on the assumption that the contracting parties bound towards Czechoslovakia by obligations under the General Agreement would, in respect of quantitative restrictions and trade controls, give to imports from Czechoslovakia treatment no less favourable than that applied to imports from other contracting parties and that they shall apply in their mutual trade relations with Czechoslovakia a multilateral trading system.

In the course of numerous bilateral negotiations, initiated exclusively by the Czechoslovak delegation, taking place between the spring 1965 and 7 April 1967, the Czechoslovak delegation has repeatedly made specific requests concerning main items of export interest to Czechoslovakia contained in Annex A of the Czechoslovak notification of 15 December 1966 and in the course of which a satisfactory solution of the problem of tariff reduction and of measures of trade liberalization with major trading partners has been sought.

./.

While satisfactory progress has been made in the bilateral negotiations with certain countries, in most cases the results so far achieved in bilateral negotiations between Czechoslovakia and her major trading partners after the presentation of the notification of 15 December 1966 indicate that no improvements and satisfactory solutions concerning the reduction of tariff and non-tariff barriers on the items included in Annex A have been found and no willingness has been even indicated by countries maintaining discriminatory import restrictions against Czechoslovakia to undertake to remove them in the context of the negotiations, either immediately, or even within the implementation period of the results of the conference. This reluctance of the major Czechoslovak trading partners to grant tariff and non-tariff concessions on items where Czechoslovakia has a principal supplying interest, to undertake to apply (again at least within the implementation period) a multilateral system of trade to Czechoslovakia and to eliminate discriminatory import restrictions, impairs to a considerable extent the possible benefits which might accrue to Czechoslovakia directly or indirectly under the Kennedy Round negotiations and necessarily has created a very unfavourable impact on the overall evaluation of these negotiations by Czechoslovakia.

With the view to redress the balance of mutual commitments the Czechoslovak Government consequently feels compelled to withdraw the additional measures provided for in paragraphs 3 and 4 of the Czechoslovak offer, aimed at a certain percentage increase of actual imports into Czechoslovakia from the contracting parties. This move of Czechoslovakia, which is induced solely by the necessity to restore the balance of mutual commitments, will naturally not impair the general efforts of Czechoslovakia to contribute substantially to the creation of conditions for a continued expansion of international trade.

Czechoslovakia would nevertheless be ready to continue its negotiations on the basis of its initial offer and/or the draft protocol if, within the remaining time of the Kennedy Round trade negotiations, a change occurs in the position of other contracting parties on the question of the liberalization and multilateralization of trade with Czechoslovakia.

PREFERENTIAL TARIFF

N I L

SCHEDULE...-CZECHOSLOVAKIA

GENERAL NOTE

Except as is otherwise provided in this Schedule, the rate specified in the fourth column (hereinafter referred to as "the final rate") for each product provided for herein shall be effective from The rates for such product which shall be effective during the first, second, third and fourth years after this Schedule shall have become a Schedule to the General Agreement shall not exceed the final rate therefor by more than 80 per cent, 60 per cent, 40 per cent and 20 per cent respectively, of the difference between the base rate and the final rate.

The final rates for products the customs duties of which have been suspended under the Government Decree of 12 December 1964 and which are marked with a cross (+) in the Schedule, as well as the final rates for products specified below, will become effective on the date this Schedule will enter into force as a Schedule to the General Agreement:

- 4 Pepper (black, white and red (Spanish, also paprika), long pepper; powdered pepper); pimento, ginger
- 5 Cinnamon
- 6 Badian (aniseed star); cloves (also mother cloves); mace (flowers of nutmeg); nutmegs, unshelled
- 7 Nutmegs, shelled
- 8 Cardamoms, saffron, vanilla
- 9 Figs
- 11 Citrons, cedrats, mangoes
- 12 Oranges (also mandarins)

- 14 Dates, pistachio-nuts, bananas
- 15 Pineapples
- 17 b3 Coconuts, exotic edible nuts, including ground-nuts and pecans
- 18 Pomegranates and other Southern fruits, n.s.m.
- 93 b Palm-kernel oil and coconut oil, solid
- 115 Sago and sago substitutes, tapioca, arrowroot
- 217 Fabrics of jute.

Tél. 35 23 47

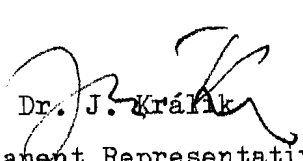

Geneva 16 September 1965

Dear Mr. Wyndham White,

With reference to the decision of the Trade Negotiations Committee of 13 July 1965 I have been instructed to inform you that the trade policy in the field of agricultural products of the Czechoslovak Socialist Republic is basically identical to the trade policy in the field of industrial products. Therefore the offer of the Czechoslovak Socialist Republic submitted on 16 November 1964 provides the necessary basis for defining the terms for the participation of Czechoslovakia in the negotiations on agricultural products.

Please find attached the suggested terms for participation of Czechoslovakia in the forthcoming negotiations.

Accept, Sir, the assurance of my highest consideration.

Dr. J. Králík

Permanent Representative a.i.

Mr. Eric Wyndham White
Director General

General Agreement on Tariffs
and Trade

G e n e v a

Terms of the Czechoslovak offer in accordance with the Trade Negotiations Committee's decision adopted on July, 13 1965.

In accordance with the decision of the Trade Negotiation Committee of July, 13 1965 to the effect that agricultural offers within the Kennedy round of negotiations should be submitted on September, 16 1965, the terms of Czechoslovak participation in agricultural sector of trade negotiations are suggested to be as follows:

1. Czechoslovakia states its readiness to negotiate in the field of agricultural products - within the Kennedy round of negotiations - with the aim to maintain the comprehensive validity of the general offer submitted on November, 16 1964.
2. To this end, Czechoslovakia reaffirms that the abovementioned offer is intended to cover both industrial and agricultural sector. The eventual form of concession is to be subject to the overall scope of the results arrived upon in the trade negotiations under the Kennedy round.
