

Genève
le 1^{er} mai 1965

Monsieur Eric Wyndham White
Directeur général
Accord général sur les tarifs
douaniers et le commerce
Villa "Le Bocage"
Genève, Suisse

Monsieur,

J'ai l'honneur de vous transmettre, selon la décision du 18 mars 1965 du Comité des négociations commerciales, des renseignements sur la liste d'offre canadienne du 16 novembre 1964 pour les pays en voie de développement participant à la Conférence des négociations commerciales 1964-65. Ce document vous est soumis en vingt-cinq copies dans les langues française et anglaise.

En vous transmettant la liste d'offre canadienne du 16 novembre 1964, je vous signalais que, contrairement à d'autres parties contractantes à la Conférence, le Canada déposait une liste d'offres positives et que le Gouvernement du Canada attachait la plus grande importance à ce que les autres gouvernements qui devaient obtenir la liste canadienne en assurent le secret le plus absolu. De même dois-je souligner l'importance pour les pays en voie de développement qui recevront les renseignements relatifs à la liste canadienne d'en assurer aussi le secret le plus absolu.

Veuillez agréer, Monsieur, les assurances de ma haute considération.

Le chef négociateur pour le
Gouvernement du Canada,

N. A. Robertson

No: 1

RENSEIGNEMENTS POUR LES PAYS PARTICIPANTS
EN VOIE DE DEVELOPPEMENT AU SUJET DE L'OFFRE
DU CANADA DU 16 NOVEMBRE 1964

En mars 1965, le Comité des négociations commerciales a approuvé des recommandations du Sous-comité de la participation des pays en voie de développement qui prévoyaient notamment que:

- a) Une liste soit établie des positions figurant dans les listes que les divers pays en voie de développement ont présentées suivant les procédures établies par le Sous-comité;
- b) Les pays qui participent aux négociations commerciales sur la base d'un abaissement linéaire de leurs tarifs douaniers fourniraient aux pays participants en voie de développement, le 1^{er} mai 1965, des renseignements sur leurs exceptions touchant les positions de cette liste;
- c) Le Canada, qui n'est pas un participant "linéaire" et donc n'a pas de liste d'exceptions, fournirait des renseignements analogues au sujet de son offre positive.

Donnant suite à ces recommandations, le Canada présente les renseignements suivants:

L'offre que le Canada a faite le 16 novembre 1964 propose la réduction ou la suppression de certains taux canadiens de droits de douane applicables à la nation la plus favorisée, sous réserve d'un règlement d'ensemble qui soit satisfaisant. Elle porte, d'une façon générale, sur les produits tropicaux, les matières premières industrielles, les produits de la pêche, et les produits fabriqués autres qu'alimentaires. Le Canada présentera à la date fixée par le Comité des négociations commerciales son offre relative aux produits agricoles des régions tempérées et aux denrées alimentaires préparées (y compris les produits tropicaux ayant subi des opérations).

La partie de l'offre tarifaire positive du Canada qui intéresse immédiatement et d'une façon particulière le commerce des pays peu développés consiste dans la proposition de supprimer tous les droits encore imposés par le Canada sur un large éventail de produits tropicaux représentant la majeure partie des importations imposables de ces marchandises. Le gouvernement canadien souhaite un effort concerté en vue de la suppression des barrières tarifaires et autres qui s'opposent à la plus grande liberté possible du commerce des produits tropicaux sur une base non-discriminatoire. Comme le montre la proposition ci-dessus, le Canada est disposé à prendre part sans réserve à un effort dans ce sens.

Voici la liste des produits tropicaux pour laquelle le Canada a fait cette offre de suppression de tous les droits existants:

Café vert

Cacao en fèves

Beurre de cacao

Bananes

Limes

Noix de coco

Gousses de vanille

Poivre, clou de girofle,
cannelle, gingembre, noix
de muscade, fleur de mus-
cade et autres épices,
non moulues

Caoutchouc brut

Il convient de noter à ce propos que a) le Tarif canadien prévoit déjà l'entrée en franchise d'un certain nombre de produits tropicaux, et notamment des fibres textiles naturelles, des bois tropicaux et du thé, et b) que le Canada n'applique ni barrières non tarifaires ni taxes intérieures restrictives à ces marchandises.

L'offre canadienne comprend également la suppression totale des droits canadiens actuellement imposés sur certains métaux à l'état brut (quelques métaux, et tous les minerais, sont déjà libérés), comme il suit: plomb brut, zinc brut, cuivre brut, aluminium brut et fonte brute.

Certains pays en voie de développement sont des importateurs importants de poisson; à ce titre, ils apprendront avec intérêt que l'offre du Canada comprend des réductions des taux actuels de la nation la plus favorisée dans le cas de toutes les position tarifaires concernant le poisson et les produits de la pêche.

Le 16 novembre, le Canada a offert en outre des réductions de taux dans le cas d'un grand nombre de produits manufacturés.

L'annexe ci-jointe a été préparée suivant une comparaison entre l'offre canadienne telle qu'indiquée dans les paragraphes précédents et la liste établie à partir des soumissions individuelles faites par certains pays en voie de développement au Sous-comité sur la participation des pays en voie de développement. L'annexe comprend un très grand nombre de produits figurant dans cette liste globale et qui se trouvent compris intégralement ou partiellement dans l'offre canadienne. Les différences de nomenclature qui existent rendent impossible toute comparaison exacte, et l'annexe ne précise pas si les positions individuelles énumérées correspondent intégralement ou partiellement à une ou plusieurs des positions figurant dans l'offre canadienne.

Le 1^{er} mai 1965.

General Statement

Mr. Chairman:

My Delegation readily accepts the procedural suggestions which you have made. In the light of these suggestions I think it would be best if I make some fairly lengthy opening remarks, attempting to cover the whole of the Canadian offer in a general way. However, in return, I can assure the Committee that I shall refrain from making additional general statements as we discuss the various sections of the offer. This may actually save time in the long run. Of course, as we get into the discussion I shall be glad to comment, in either a general or specific manner, whenever this is possible on points which are raised.

Members of the Committee are, of course, aware that the Canadian offer which is to be examined now is different from the linear offers and exceptions lists with which they have dealt so far. In Canada's case there is no general linear offer, and hence no exceptions list.

The Canadian offer is a positive list of items on which it is proposed to reduce or remove present MFN tariffs. This offer was prepared in keeping with the terms of the tariff negotiating plan for countries participating under Section B.3. (c) of the Ministerial resolution of May 21, 1963. You will recall that at the 1964 meeting of the TNC at Ministerial level it was agreed "that the objective in the case of these countries should be the negotiation of a balance of advantages based on trade concessions by them of equivalent value". In preparing its positive list of offers the Canadian Government has attempted to meet this objective.

At the same time my Government has throughout taken account of the objectives which the Ministerial decision on the negotiating plan laid down with respect to the trade of the less developed countries. These were:

- (a) that in the trade negotiations every effort should be made to reduce barriers to exports of less developed countries, and
- (b) that participants consider the possibility of taking such steps as are open to them to make cuts deeper than 50 percent in, or to eliminate completely, duties on products of special interest to less developed countries.

With that brief description of the nature and objectives of the offer submitted last November by the Government of Canada, I should like now to comment in more detail on its content. It is a direct consequence of the nature of this

offer that many of the proposed Canadian reductions are less than 50 percent; some are 50 percent or more; and some are 100 percent. Of the 100 percent reductions -- that is the items on which free entry is offered -- a number relate to products of great interest to LDC's. In fact, we estimate that of the products currently imported by Canada from LDC's which are dutiable, no less than half will become completely free of duty if our present offer is maintained. On the basis of existing trade between LDC's and Canada, this offer would mean that the proportion of LDC exports entering Canada duty-free would rise from 70 to 85 percent. Moreover, reductions are being offered over a wide range of the remaining 15 percent of trade which would remain dutiable. Hence in respect both of existing and of potential imports to Canada, the offer we are about to examine represents, we believe, a worthwhile contribution to the expansion of LDC exports.

I should explain here that in our statement of May 1st, which has been circulated to the LDC's participating in this Committee, we identified these significant moves to free entry. But in the annex to that statement we did not attempt to list the exact tariff reductions offered, nor would it be possible to do so. Unfortunately, there is no exact correlation between the Brussels nomenclature, used by the LDC's in the lists of products of interest to them, and the quite different terms of the Canadian tariff. This problem of nomenclature led to a great deal of difficulty in preparing the detailed annex to our statement. It also contributes to the bulk of the document and reduces the usefulness of the result. However, we hope that any problems or uncertainties which arise from this cause can be cleared up in bilateral discussions with the countries concerned. The Canadian Delegation looks forward to discussing, in the series of bilateral meetings already begun with the less developed

countries participating in this Committee, the specific trade interests of individual less developed countries in the Canadian market.

As you will have noted, the Canadian offer tabled last November relates, broadly speaking, to four groups of products, namely tropical products, industrial raw materials, fishery products, and manufactured goods. It does not cover temperate agricultural products nor manufactured foodstuffs. These groups remain to be dealt with this fall when the offers relating to agricultural products generally are tabled.

The tropical products which are listed in our November 16 offer, and on which we propose in each instance to go to complete free entry, are as follows: green coffee; cocoa beans; cocoa butter; bananas; limes; cocoanuts; vanilla beans; unground spices; and crude rubber. Canada already accords free entry to most other tropical products, including tea, tropical timber, citrus fruits other than limes, peanuts, tropical oilseeds, and such natural textile fibres as cotton, sisal, jute, silk and wool.

I should like to emphasize that the whole field of tropical products is one where in the Kennedy Round the Canadian Government would like to see a general move to free trade. However we consider it essential that the overall settlement in this field be such that LDC suppliers who lose preferences in some markets are compensated by improved access to other markets. The Canadian view on this problem is expressed in our written submission. It accords fully, I believe, with the views that were expressed in this committee last week by the Delegates of India and Pakistan. We think that it will be to the general advantage of all developing countries if a concerted approach can be made in these negotiations by developed and less-developed countries alike to the removal of all barriers to trade in tropical products.

There is a second area where my Government considers that the negotiations provide an opportunity for a concerted move to the freest possible trade. This is the area of primary

metals. At this time we are offering to go to free on primary lead, zinc, copper, aluminum and pig iron.

As I have already said, the list of products on which Canada now affords free entry, or is prepared under the offer of November 16, 1964 to grant free entry, covers the great bulk of existing imports from LDC's; and a number of other items would be subject to reductions in the MFN tariff although not to free entry. I might repeat that certain other products of somewhat less, but still important interest to LDC's than the tropical products mentioned above, remain to be dealt with in the agricultural offer to be tabled by Canada this fall. Examples are: edible nuts, canned fruit, fruit juices, and chocolate products. Sugar, however, we regard as a special case requiring separate consideration, and for the moment at least we believe that the most productive approach to this problem would be through the renegotiation of the International Sugar Agreement.

Canada's imports of fish come predominantly from developed countries. However there is a significant LDC interest in this trade, and, accordingly, we wish to point out that all of the dutiable fish items in the Canadian tariff are included in our offer.

In respect of most kinds of manufactured goods, for which Canada provides a very open market, our existing imports come largely from developed countries. Nevertheless in this field, as well as in those to which I have already referred, we kept in mind the objective of doing whatever was practicable, in selecting items for tariff cuts, to reduce barriers to the exports of less developed countries. I think that most LDC's will find that the lengthy annex to our May 1st report includes a high proportion of the manufactured items in which they expressed an interest. (It does not, of course, include items that are free already.)

In respect of the more general field of manufactures I should make special mention of one particular sector -- chemicals -- on which the Canadian Government has sought but not yet received the advice of our Tariff Board on a modernization of the tariff for this section. Like manufactured foodstuffs, therefore, this section is not covered by the present offer.

If there are still other items in which LDC's consider that they have a substantial trade interest in the Canadian market, we would be glad to have them brought to our attention. Indeed, over the coming weeks and months a number of detailed bilateral consultations undoubtedly will be desirable, particularly after participating LDC's have had the opportunity to study the text of our offer. In these consultations, we shall be happy to provide further elaboration of our offer where possible, and to receive in greater detail than may be possible today the comments of participating LDC's in respect of their trade interests in the Canadian market.

Thank you, Mr. Chairman.

Mr. Eric Wyndham White,
Director General,
General Agreement on Tariffs and Trade,
Villa "Le Bocage",
Geneva, Switzerland.

Dear Sir:

I have the honour to transmit to you, in accordance with requests received from Less-Developed Countries during the July 23rd confrontation of the Canadian offer, supplementary information to show items, of interest to Less-Developed Countries, which presently may enter Canada duty free.

The abovenoted information is being submitted in fifty copies in the English language for distribution to those countries which are participating under the arrangements and conditions set out for Less-Developed Countries.

Accept, Sir, the renewed assurances of my highest consideration.

A handwritten signature in cursive script, reading "N. A. Robertson".

N. A. Robertson,
Head of the Canadian Delegation.

CANADIAN DELEGATION

DÉLÉGATION DU CANADA

RESTRICTED

Geneva,
August 12, 1965.

ITEMS OF INTEREST TO

LESS DEVELOPED COUNTRIES

WHICH PRESENTLY ENTER CANADA

DUTY FREE.

Information concerning the November 16, 1964 offer of the Canadian Government, insofar as it relates to items notified by Less-Developed Countries to be of interest to them, was circulated by the Canadian Delegation on May 1, 1965. During the July 23rd confrontation of the Canadian offer, participating Less-Developed Countries requested the submission by the Canadian Delegation of supplementary information to show items of interest to Less-Developed Countries which presently enter Canada duty free.

As noted in the May 1 submission, however, there is no direct relationship between the Brussels Tariff Nomenclature and the language of the Canadian Tariff. In the May 1 submission, products were listed according to the Brussels Nomenclature since the Canadian Delegation was complying with a general TNC decision affecting all countries which had tabled offers on November 16. The purpose was to indicate those items specified by Less-Developed Countries to be of interest to them and which appeared to be covered by the offers submitted last November. It was possible to conform to this general practice so long as rates were not being shown. Nevertheless, when dealing with actual tariff rates (in this case, zero duties), the only practical method of presentation is in terms of the Canadian Tariff.

In the attached annex, therefore, the Canadian Delegation has attempted to meet this request for information on duty-free tariff items by using the language of the Canadian Tariff. The annex notes only products listed by Less-Developed Countries as of interest to them and does not include all of the duty-free items in the Canadian Tariff since Less-Developed Countries did not cover all duty-free items in their lists. The annex shows, in a consolidated and consecutive form,

- (a) Brussels tariff headings and sub-items (some of which may have been shown in Less-Developed Countries request lists as ex-items) where these appear to correspond - in part or in whole - to Canadian tariff items which are duty free; and
- (b) the number and, in most cases, the exact wording of the Canadian Tariff item - which appear to correspond - in part or in whole - to the Brussels Nomenclature items opposite.

It therefore is, at best, a table of partial concordance between certain limited sections of the BTN and the Canadian Tariff. However, and especially in those few instances where abbreviated descriptions of Canadian Tariff items have been used, reference should be made to the Canadian Tariff itself since the exact allocation of products to one item or another can best be determined by direct reference to the full Tariff.

While the annex is a practical but rough guide to Canadian duty-free tariff treatment, participating less-developed countries are invited to bring to the attention of the Canadian Delegation specific problems of classification that arise so that the exact classification may be determined.
