Trade Negotiations Committee
Committee on Agriculture

PROCEDURES SUGGESTED BY THE SECRETARIAT

1. The Ministers agreed at their meeting in May 1963:
 - (a) that the trade negotiations shall include agricultural products;
 - (b) that in view of the importance of agriculture in world trade, the trade negotiations shall provide for acceptable conditions of access to world markets; and
 - (c) that the Trade Negotiations Committee shall work out "the rules to govern and the methods to be employed in the creation of acceptable conditions of access to world markets for agricultural products in furtherance of a significant development and expansion of world trade in such products".
2. The Trade Negotiations Committee at its meeting in June agreed to set up a Committee on Agriculture, which would be subordinate and report to the Trade Negotiations Committee. The terms of reference of the Committee on Agriculture adhere to the wording used in the Ministers' Resolution.
3. The Trade Negotiations Committee also had a preliminary discussion on agriculture at its September meeting. The main conclusion emerging from this discussion was that the Committee on Agriculture should concentrate, through the first phase of its work, on temperate zone products. The Committee's initial membership reflects this decision.
4. It is suggested that among other things, the Committee on Agriculture, at its first meeting, should start by considering procedures before passing to questions of substance, for the following reasons:
 - (a) The Committee is embarking on almost completely new work for which there are few precedents and no established procedures. No serious attempt has been made at previous GATT conferences to negotiate about the many non-tariff devices operating for the agricultural sector;

- (b) the agricultural sector presents a wide, varied and complex series of problems. The first twenty-four chapters dealing with agricultural produce in the Brussels Nomenclature Tariff lists, account for one fifth of total world trade. This trade is governed by a much greater variety of protective devices (often for the same commodity) than is the case in the industrial field;
- (c) agreements in the field of agriculture will, before an overall settlement can be reached, have to be balanced with agreements in the industrial field so as to obtain the fair balance of advantage for all participating countries envisaged in the Conclusions of Ministers.

5. It is desirable to avoid an item-by-item approach such as has been applied in previous tariff negotiations.

6. The most practical way seems to be for the Committee to examine, in a first and general survey, the appropriate chapters in the tariff list (e.g. the chapters 1-24 under the Brussels Nomenclature) and:

- (i) to select the products or groups of products which have been or are to be referred to special groups for the negotiation of general arrangements;
- (ii) to determine which products, such as tropical products, are to be discussed by the Committee at a later stage; and
- (iii) to attempt, by means of an examination of relevant facts concerning the nature of the product, the various trade regimes and other protective devices, to identify the products for which the general rules of the Trade Negotiating Plan do not appear to be appropriate, and for which, therefore, the Committee eventually has to devise special rules and methods.

It would be the understanding that products not appearing on these lists would be subject to the general rules of the Trade Negotiating Plan, save in so far as any of them could be justified for inclusion in exceptions lists.

7. In selecting the groups of products for which general arrangements may be required, the Committee might also discuss, or refer to the special groups, the question which products more specifically are to be dealt with by the special groups.

8. It would also be the understanding that although the classification at a certain stage should be finalized, the classification in the initial stages would only be provisional and would in no sense commit governments. Furthermore,

the Committee should remain free to reclassify certain products or groups of products in accordance with circumstances; for example the possibility is to be maintained for the Committee to consider products which initially are referred to a special group, but for which a general arrangement subsequently does not appear to be appropriate.

9. After this pre-selection, the Committee would enter into the second phase of its work and would concentrate on the products listed under (iii) in paragraph 6. The Committee might endeavour, it is suggested, to devise certain practicable and acceptable categories to be identified by a survey of the nature and various circumstances of trade, including measures of protection, in each product or group of products. A more thorough going examination of the remaining items within the appropriate chapters of the Brussels Nomenclature is therefore suggested. This examination, to be supported by data on trade and protective arrangements, should clarify ideas on possible categories and criteria for the purpose of negotiations; it should attempt on the basis of facts thrown up by the survey some provisional allocation of products to particular categories; and it should prepare the way for preliminary consideration of possible techniques of negotiation.

10. In so far as items of agricultural trade can be grouped into one category so that a common treatment in the negotiations can be applied to all or most of the items of that category, it might be possible for negotiations to take place on the basis of the relative degree of protection afforded in each country. For example, if trade in a particular commodity was wholly or mainly governed by quotas, and it was impossible to remove the quotas, it might be possible to define certain percentages by which quotas could be increased. In other cases, where barriers to trade are very diverse, it may be necessary to seek new ideas and techniques to enable meaningful negotiations to take place. There will be new ground to be broken and the means of doing this are most likely to emerge from a survey of the facts.

11. An approach by the Committee to its task on the foregoing lines seems at once essential to clear the ground for the orderly commencement of formal negotiations in 1964, and to avoid premature negotiation, on the basis of incomplete knowledge of the relevant facts, about the items within the Committee's field.

Technical Sub-Committee

BRUSSELS NOMENCLATURE, CHAPTERS 1-24

Section I Live animals; animal products

- Chapter 1 Live animals
- 2 Meat and edible meat offals
 - 3 Fish, crustaceans and molluscs
 - 4 Dairy produce; birds' eggs; natural honey
 - 5 Products of animal origin, not elsewhere specified or included

Section II Vegetable products

- Chapter 6 Live trees and other plants; bulbs, roots and the like; cut flowers and ornamental foliage
- 7 Edible vegetables and certain roots and tubers
 - 8 Edible fruit and nuts; peel of melons or citrus fruit
 - 9 Coffee, tea, maté and spices
 - 10 Cereals
 - 11 Products of the milling industry; malt and starches; gluten; inulin
 - 12 Oil seeds and oleaginous fruit; miscellaneous grains, seeds and fruit; industrial and medical plants; straw and fodder
 - 13 Raw vegetable materials of a kind suitable for use in dyeing or in tanning; lacs; gums, resins and other vegetable saps and extracts
 - 14 Vegetable plaiting and carving materials; vegetable products not elsewhere specified or included

./.

Section III Animal and vegetable fats and oils and their cleavage products;
prepared edible fats; animal and vegetable waxes

Chapter 15 Animal and vegetable fats and oils and their cleavage products;
prepared edible fats; animal and vegetable waxes

Section IV Prepared foodstuffs; beverages, spirits and vinogar; tobacco

Chapter 16 Preparations of meat, of fish, of crustaceans or molluscs

17 Sugars and sugar confectionery

18 Cocoa and cocoa preparations

19 Preparations of cereals, flour or starch; pastrycooks' products

20 Preparations of vegetables, fruit or other parts of plants

21 Miscellaneous edible preparations

22 Beverages, spirits and vinogar

23 Residues and waste from the food industries; prepared animal
fodder

24 Tobacco

DATA ON TRADE FLOWS AND TRADE MEASURES ON
SELECTED AGRICULTURAL PRODUCTS*

Explanatory notes

1. Under each entry information is provided on four lines. The top line indicates the value of imports, the second line indicates the value of exports; the data are in US million dollars and relate, in general to 1960.

2. The third line indicates the level of tariff protection. For items subject to a duty of more than 5 per cent ad valorem the symbol T has been inserted; duties of 5 per cent or less are shown by the symbol t; for zero duties 0 has been inserted. Bound duties are shown by underlining; where the binding applies only to part of the position appearing in the product description, a dotted line has been used. Specific duties, regardless of their level, are shown by the letter S. In cases where either an ad valorem or a specific duty applies, the symbol T/S has been used; where such duties are used in conjunction the symbol S + T has been used.

3. The fourth line shows various non-tariff measures which may be presumed to affect trade. The following symbols have been used:

R = import restrictions (including quota restrictions, minimum
import prices, conditional import systems, etc.)

Mo = monopoly operation or State-trading

Mb = production and/or trade is subject to regulation by a marketing
board

Ml = product is subject to regulation under "marketing law"

Lv = imports are subject to variable or fixed levy

Sp = subsidy on production

Se = subsidy on exports

*The table is available in English only.

Sc = subsidy on consumption

Ps = price support measures

Dp = deficiency payments

Where the initial letter is not capitalized (for example "sp") only part of the item or items concerned benefit from the non-tariff measure mentioned (for example a subsidy on production).

4. An asterisk refers to an explanatory note in the appendix. For example, the symbol "Sp*" in the fourth line of the entry under Denmark for tariff item 03.01 refers to the note listed in the appendix under the number 4/32 (where 4 stands for Denmark, and 32 for line 32, as identified in the table).

5. The statistical data relate to the value of imports from all origins and exports to all destinations; they refer to the year 1960 with the exception of Australia (1960/61), Finland (1961) and Spain (1961). The values are in million dollars; imports are in general at c.i.f. values and exports at f.o.b. values. It should however be noted that in the case of Australia, Canada, South Africa and the United States imports are valued f.o.b.; Portuguese figures do not include trade with the Portuguese Overseas Departments; United States exports exclude shipments for relief and charity.

The figures are based on national trade returns, and for the European Economic Community on the compilations by the Statistical Office of the European Communities. For a number of countries it was necessary to convert the data classified according to national trade nomenclatures into the BTN. The re-classification involved certain arbitrary decisions as regards the allocation of certain commodities or commodity groups, in particular in cases where the published statistics were not sufficiently detailed. For this reason it was furthermore not possible to obtain data for all the headings listed; in a few cases sub-totals could, however, be obtained although data for individual headings were not available. The totals for primary and processed products are the addition of the figures shown; in cases where certain data are missing, these totals underestimate the value of trade involved. In view of the above difficulties the figures shown cannot be considered as an accurate and comprehensive transcription into the BTN.

Data on Trade Flows and Trade Measures on selected agricultural products

T ad valorem duty of more than 5 per cent
t ad valorem duty of 5 per cent or less
s specific duty
O zero duty
underlining denotes bound duty;
broken underlining denotes that the duty on
part of the item is bound
- trade less than \$50,000
... no figures available
* see explanatory notes

DATA ON TRADE FLOWS AND TRADE MEASURES
SELECTED AGRICULTURAL PRODUCTS

Explanatory notes

1. The following table is a partly revised version of Spec(64)58 of 1 April 1964.

2. Under each entry information is provided on four lines. The first line indicates the value of imports, the second line indicates the value of exports, the third line indicates the value of trade in goods, and the fourth line indicates the value of trade in services. The data are in US million dollars and relate, in general, to the period 1963-1964.

3. The third line indicates the level of tariff protection. To a duty of more than 5 per cent ad valorem the symbol "A" has been inserted. Bound duties are shown by underlining only to part of the position appearing in the product description. Specific duties, regardless of their amount, are shown by the letter S. In cases where either an ad valorem or a specific duty has been used; where such duties are used together, the symbol T/S has been used.

4. The fourth line shows various non-tariff measures which affect trade. The following symbols have been used:

R = import restrictions (including quota restrictions, import prices, conditional import systems, etc.)

Mo = monopoly operation or State-trading

Mb = production and/or trade is subject to government control board

Lv = imports are subject to variable or fixed import levies

Sp = subsidy on production

* The table is available in English only.

Explanatory notes

1. The following table is a partly revised version of the table issued Spec(64)58 of 1 April 1964.

2. Under each entry information is provided on four lines. The top line indicates the value of imports, the second line indicates the value of exports, the data are in US million dollars and relate, in general, to 1960.

3. The third line indicates the level of tariff protection. For items to a duty of more than 5 per cent ad valorem the symbol T has been inserted; duties of 5 per cent or less are shown by the symbol t; for zero duties no symbol has been inserted. Bound duties are shown by underlining; where the binding is only to part of the position appearing in the product description, a dot has been used. Specific duties, regardless of their level, are shown by the letter S. In cases where either an ad valorem or a specific duty applies, the symbol T/S has been used; where such duties are used in conjunction with other measures, the symbol S + T has been used.

4. The fourth line shows various non-tariff measures which may be present and which may affect trade. The following symbols have been used:

R = import restrictions (including quota restrictions, minimum import prices, conditional import systems, etc.)

Mo = monopoly operation or State-trading

Mb = production and/or trade is subject to regulation by a marketing board

Lv = imports are subject to variable or fixed levy

BTN. No.

Product description

Products of the milling industry (cont'd)

11.07 malt
11.08 starches
11.09 gluten and gluten flour

Other products

17.01 beet sugar and cane sugar
17.02 other sugars
17.03 molasses
17.04 sugar confectionery
17.05 flavoured or coloured sugars

DATA ON TRADE FLOWS AND TRADE MEASURES ON
SELECTED AGRICULTURAL PRODUCTS*

Explanatory notes

1. The following table is a partly revised version of the table issued as Spec(64)58 of 1 April 1964.
2. Under each entry information is provided on four lines. The top line indicates the value of imports, the second line indicates the value of exports; the data are in US million dollars and relate, in general, to 1960.
3. The third line indicates the level of tariff protection. For items subject to a duty of more than 5 per cent ad valorem the symbol T has been inserted; duties of 5 per cent or less are shown by the symbol t; for zero duties 0 has been inserted. Bound duties are shown by underlining; where the binding applies only to part of the position appearing in the product description, a dotted line has been used. Specific duties, regardless of their level, are shown by the letter S. In cases where either an ad valorem or a specific duty applies, the symbol T/S has been used; where such duties are used in conjunction the symbol S + T has been used.
4. The fourth line shows various non-tariff measures which may be presumed to affect trade. The following symbols have been used:
 - R = import restrictions (including quota restrictions, minimum import prices, conditional import systems, etc.)
 - Mo = monopoly operation or State-trading
 - Mb = production and/or trade is subject to regulation by a marketing board
 - Lv = imports are subject to variable or fixed levy
 - Sp = subsidy on production

*The table is available in English only.

Se = subsidy on exports

Sc = subsidy on consumption

Ps = price support measures

Dp = deficiency payments

Where the initial letter is not capitalized (for example "sp") only part of the item or items concerned benefit from the non-tariff measure mentioned (for example a subsidy on production). An asterisk refers to an explanatory note in the appendix.

5. The statistical data relate to the value of imports from all origins and exports to all destinations; for the EEC both total trade and trade excluding intra-EEC trade is shown. They refer to the year 1960. The values are in million dollars; imports are in general at c.i.f. values and exports at f.o.b. values. It should however be noted that in the case of the United States imports are valued f.o.b.; United States exports exclude shipments for relief and charity.

The figures are based on national trade returns, and for the European Economic Community on the compilations by the Statistical Office of the European Communities. For a number of countries it was necessary to convert the data classified according to national trade nomenclatures into the BTN. The reclassification involved certain arbitrary decisions as regards the allocation of certain commodities or commodity groups, in particular in cases where the published statistics were not sufficiently detailed. For this reason it was furthermore not possible to obtain data for all the headings listed; in a few cases sub-totals could, however, be obtained although data for individual headings were not available. The totals for primary and processed products are the addition of the figures shown; in cases where certain data are missing, these totals underestimate the value of trade involved. In view of the above difficulties the figures shown cannot be considered as an accurate and comprehensive transcription into the BTN.

Appendix

The following notes refer to various tariff or non-tariff measures marked in the table with an asterisk.

- 01.03/6 subject to EEC regulation No. 20.
- 02.01C/6 subject to EEC regulation No. 20
- 02.01E/6 offals of pigs are subject to EEC regulation No. 20, the levy is bound under GATT to a maximum;
- offals of animals of the bovine species are subject to EEC regulation No. 14/64/CEE; the levy system will enter into effect as from 1 July 1964; offals of horses, sheep and other animals not mentioned above are not under common regulations.
- 02.02/6 subject to EEC regulation No. 22.
- 02.06/6 pigmeat and edible offals of pigs are subject to EEC regulation No. 20; edible offals of animals of the bovine species are subject to EEC regulation No. 14/64/CEE; the levy system will enter into effect as from 1 July 1964; offals of other animals not mentioned above are not under common regulations.
- 03.01/3) subsidy on gas oil for fisheries; landing premiums for deep-sea fisheries
- 03.02/3)
- 03.03/3)
- 03.01/9) white fish and herring subsidies; grants for the acquisition of new fishing vessels and engines
- 03.02/9)
- 03.03/9)
- 04.02/6 subject to EEC regulation No. 13/64/CEE; the levy system will enter into effect as from 1 July 1964
- 04.05/6 eggs of poultry, in the shell, and poultry eggs, not in the shell and egg yolks, for use as food, are subject to EEC regulation No. 21
- 07.01A/8 price support for potatoes for starch manufacture
- 07.01B/C/2 transport subsidy on various products
- 08.03 statistics refer to dried figs only
- 08.04/4 transport subsidy
- 08.06-08.09/2 transport subsidy on various products
- 10.06/6 rice is subject to EEC regulation No. 16/64/CEE; the levy system will enter into effect as from 1 July 1964

- 15.01/6 lard and other rendered pig fat, with the exception of that designed for industrial use other than the manufacture of food products, is subject to EEC regulation No. 20, the levy is bound under GATT to a maximum; rendered poultry fat is subject to EEC regulation No. 22, the levy is bound under GATT to a maximum
- 15.02/6 unrednered fats of bovine cattle, tallow (including "premier jus") produced from those fats, with the exception of those designed for industrial use other than the manufacture of food products are subject to EEC regulation No. 14/64/CEE; the levy system will enter into effect as from 1 July 1964
- 16.01/6 certain meat preparations containing meat and offals of pigs are under EEC regulation No. 20; for the sub-item ex 16.01, sausages, and ex 16.02 AII, other preparations containing pigs' liver, the levy is bound under GATT to a maximum. Certain meat preparations containing meat and offals of bovine animals, excluding preparations containing meat and offals of pigs, are under EEC regulation No. 14/64/CEE; the levy system will enter into effect as from 1 July 1964.
- 20.07/2 transport subsidy on various products
- 23.02/6 bran, sharps and other residues derived from the sifting, milling or working of cereals are subject to EEC regulation No. 19
- 23.07/6 preparations containing cereals are subject to EEC regulation No. 19

GENERAL AGREEMENT ON
TARIFFS AND TRADE

RESTRICTED

Spec(64)82
13 April 1964

Committee on Agriculture

NOTE BY THE SECRETARIAT

1. The following data have been assembled by the secretariat and have been put before the Technical Sub-Committee. They are herewith transmitted to the Committee on Agriculture.

- (i) Data on trade flows and trade measures on selected agricultural products (document Spec(64)58 of 1 April 1964). In this document various data are assembled on the value of imports and exports of the countries, members of the Committee (with the exclusion of Madagascar), and on trade measures applied.
- (ii) Data on trade flows and trade measures on selected agricultural products (document Spec(64)79 of 10 April 1964). This document is a revised and somewhat elaborated version of the first table, but refers only to the EEC, Japan, the United Kingdom and the United States.
- (iii) Three tables which summarize the above data and provide for each of the countries or regions examined, estimates of the value of imports affected by tariff and/or non-tariff measures (document Spec(64)80).

2. It should be noted that the documents do not pretend to give a complete and fully accurate picture of the volume and conditions of trade in the products examined. This would have required considerably more time than the Sub-Committee had at its disposal. Attention may therefore be drawn to a number of difficulties which were met.

3. In addition to the commodities which were not referred to the Sub-Committee, such as tropical products and products connected with the work of the special commodity groups, the above tables do not include data on certain products which prima facie are of less importance to agricultural trade as a whole and on which information is not readily available. While this should not appreciably change the overall picture it is realized that some of these products may be of importance to individual countries.

./.

4. The statistical data relate to the value of imports from all origins and exports to all destinations. In the case of the individual member countries of the EEC it has not been possible to insulate trade with third countries only.

5. Although it would have been desirable to cover a longer period the data relate to one year only.

6. It should be noted that for the countries for which the tariff and trade statistics are not classified according to the Brussels Nomenclature difficulties of conversion were encountered which unavoidably involved certain arbitrary decisions. These difficulties and some further deficiencies regarding the valuation of imports and exports are elaborated in paragraph 5 of documents Spec(64)58 and Spec(64)79.

7. The data on tariffs and non-tariff measures are based on the most recent data available to the secretariat. While these data will be corrected by the delegation in due course and while revised tables may eventually be prepared, the time available was not sufficient to provide fully accurate data.

8. The Tables I and II in document Spec(64)80 are derived from the data in Spec(64)79. Wherever a measure was applicable to part of the tariff item only (denoted by a symbol in small letters) it has been attempted to identify the product in the national trade returns of the country concerned. Where trade statistics were not sufficiently detailed the best possible estimates have been made to evaluate the trade affected by the measure concerned.

9. It has not been attempted to evaluate the degree of restrictiveness of various measures affecting imports. In particular where such measures are highly restrictive or applied to certain countries or during certain periods only, the figure of trade affected is much distorted.

10. The tables in document Spec(64)80 relate to imports only. The time available did not allow for similar calculations concerning exports.

11. In Table I in document Spec(64)80 the column of EEC trade takes only account of the Common External Tariff and of measures such as already have been established under the Common Agricultural Policy regulations. The present situation in the individual member countries is given in Table II.

12. Table III of document Spec(64)80 is essentially based on the data provided in Spec(64)58. In the calculation some further data were taken into account. The import values estimated as affected by tariffs only refer to the tariff headings where no other non-tariff measures had been reported or found. Where only part of the heading was affected by non-tariff measures it has not been found possible in the time available to insulate this part in the national trade statistics and give a proper estimate.

STATUS OF OFFERS ON SUGAR IN THE TRADE NEGOTIATIONS

Note by the Secretariat

1. The following seven participants in the negotiations have tabled offers on sugar:

Denmark

Binding of present rate of 20 per cent. Existing restrictions will not be liberalized.

European Economic Community

Proposal for a general arrangement.

Iceland

Conditional general declaration of intent of offering 50 per cent linear tariff reduction. Sugar is not specifically mentioned.

New Zealand

Not refined: 50 per cent tariff reduction

Present rates: 22 Colour or over 1.25d./lb. (m.f.n. and preferential) (ad valorem incidence 29 per cent)

Other, not refined 1d./lb. (m.f.n. and preferential)

Refined: No Offer

Present rates: 1.25d./lb. or 1d./lb. (ad valorem incidence 18 per cent)

(The ad valorem incidences are based on current domestic value of 1962/63 imports.)

Norway

Offer: 50 per cent tariff reduction

Present rate: Nkr 0.20 per kg., bound

Applied rate: zero

Switzerland

Switzerland offers an assurance of global access in relation to total requirements. It would also be ready to participate in the negotiation of an international agreement aiming at a normalization of conditions in the international sugar market.

United Kingdom

Prepared to consider appropriate international arrangements.

2. The agricultural offers of the eleven following countries do not include an offer on sugar:

Australia	Japan
Austria	Portugal
Canada	South Africa
Finland	Sweden
Greece	United States
Ireland	

3. Sugar is not expressly mentioned in the general offers of Czechoslovakia and Poland.

4. The Swedish offer of 16 September 1965 might possibly be interpreted as indicating an interest in a general arrangement on sugar (which falls under the Swedish agricultural regulations).

5. The following less-developed countries have submitted requests concerning sugar, or have notified their intention to do so:

Brazil	to the EEC, United States
Indonesia	to the EEC, Japan, United Kingdom, United States
Jamaica	to Canada, EEC, United Kingdom, United States
Peru	to Australia, Canada, Czechoslovakia, EEC, New Zealand, Nordic delegation, Poland, Switzerland, United States
Turkey	to United States (on beet sugar)
Nicaragua (intention)	to United States

6. The following less-developed contracting parties have notified sugar (raw or other) as a product of export interest to them (as listed in COM.TD/23 and Addenda 1-4):

Brazil	Nigeria
Cuba	Pakistan
Dominican Republic	Peru
Ghana	Trinidad and Tobago
India	Turkey
Indonesia	United Arab Republic
Nicaragua	Uganda

200/A/89

Steering Group Meeting of 12 May 1967

Note by the Director General

1. The meeting should enumerate the issues which must be dealt with by Sunday, 14 May and agree on the method to be used to deal with these issues.

2. I suggest that the following issues must be dealt with by Sunday night:

1. Cereals

- (a) The new approach;
- (b) The size of the food aid programme, participation in the programme, individual contribution, (prices to be used);
- (c) The price of cereals: level, differentials, enforcement of minimum and equivalencies.

2. Chemicals

The overall package, (exceptions to the tariff cuts, and action on non-tariff barriers) and its implementation

3. Steel

The maximization of tariff reductions in the steel sector.

4. Miscellaneous agricultural products

- (a) EEC-US list, including consequences for others;
- (b) Other bilaterals?

5. Bilateral negotiations with important multilateral implications

Examples are the negotiations on aluminium and paper.

6. The negotiations of the less-developed countries

- (a) The final settlement on tropical products, and
- (b) The depth of cuts on items in the joint list of specific requests presented on 6 April 1967 and the implementation of these cuts.

7. Disparities

3. I suggest that initially negotiations would take place in groups of participants principally interested in trade in each area; it may also become necessary to set up sub-groups at deputy or technical level which would report back to these groups. It does not seem profitable to try in advance to establish a full programme of meetings. I suggest, however, that cereals should be the first item for consideration.
