TO THE
MULTILATERAL TRADE NEGOTIATIONS

1-3, avenue de la Paix
1202 Geneva, Switzerland

December 20, 1977

Mr. Olivier Long
Director-General
GATT Secretariat
154, rue de Lausanne
1202 Geneva

Dear Director-General Long:

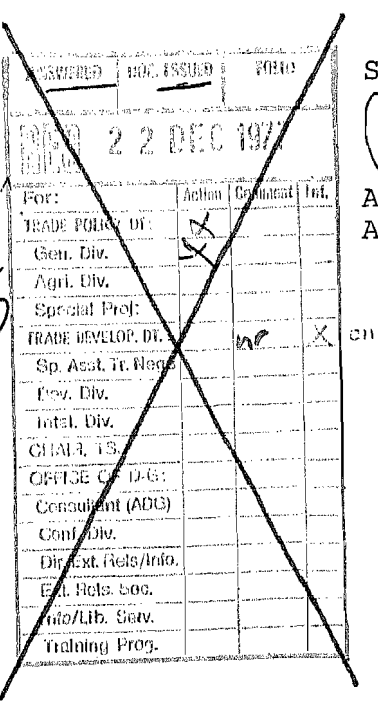

Attached herewith for your information are copies of request lists of the United States for tariff concessions on non-agricultural products from New Zealand, Australia, South Africa, Iceland, and Spain. Each list is to be considered confidential for use only by the United States and the country to whom our request is addressed. We have already forwarded these lists directly to the relevant countries.

The United States reserves the right to make modifications of these lists or submit additional lists as negotiations progress.

Sincerely,

Alonzo L. McDonald

UNITED STATES REQUESTS FOR CONCESSIONS

FROM AUSTRALIA

Without prejudice to the decision Australia may make with respect to basing its offer on the tariff reduction working hypothesis when tabling an offer on non-agricultural products during the week of January 15, 1978, the United States wishes to specify particular products and rates of duty that the United States hopes Australia will take into account in tabling its offer. The list is attached.

As is customary, the United States reserves the right to modify its request during the negotiations.

To the extent that product market access for any of the products included in the United States request list for tariff concessions is affected by the application of specific non-tariff measures, the United States will wish to negotiate these measures in order to ensure that the United States will fully benefit from a tariff reduction. Such measures will be discussed in the course of bilateral negotiations. This position is being taken without prejudice to the work being done in the MTN on multilateral solutions.

UNITED STATES REQUESTS FOR CONCESSIONS

FROM ICELAND

Without prejudice to the decision Iceland may make with respect to basing its offer on the tariff reduction working hypothesis when tabling an offer on non-agricultural products during the week of January 15, 1978, the United States wishes to specify particular products and rates of duty that the United States hopes Iceland will take into account in tabling its offer. The list is attached.

As is customary, the United States reserves the right to modify its request during the negotiations.

To the extent that product market access for any of the products included in the United States request list for tariff concessions is affected by the application of specific non-tariff measures, the United States will wish to negotiate these measures in order to ensure that the United States will fully benefit from a tariff reduction. Such measures will be discussed in the course of bilateral negotiations. This position is being taken without prejudice to the work being done in the MTN on multilateral solutions.

Product descriptions in English at the tariff level line are available only from the International Customs Journal (Douane) Number 111, 6th Edition, 1973-1974. Therefore, translations have been made from the current Icelandic Customs Tariff of relevant tariff line items. Four-digit BTN headings have been added for clarity. In some cases translations of line items have not been specific enough to provide completely accurate descriptions. In other cases, line items of interest listed in the above mentioned International Customs Journal have been modified, and it has not proved possible to locate them in the current Icelandic Customs Tariff.

It is hoped that consultations with Iceland will resolve questions concerning tariff nomenclature and product descriptions. As a result of such clarification it may be necessary for the United States to revise some of its requests.

UNITED STATES REQUESTS FOR CONCESSIONS

FROM NEW ZEALAND

Without prejudice to the decision New Zealand may make with respect to basing its offer on the tariff reduction working hypothesis when tabling an offer on non-agricultural products during the week of January 15, 1978, the United States wishes to specify particular products and rates of duty that the United States hopes New Zealand will take into account in tabling its offer. The list is attached.

As is customary, the United States reserves the right to modify its request during the negotiations.

To the extent that product market access for any of the products included in the United States request list for tariff concessions is affected by the application of specific non-tariff measures, the United States will wish to negotiate these measures in order to ensure that the United States will fully benefit from a tariff reduction. Such measures will be discussed in the course of bilateral negotiations. This position is being taken without prejudice to the work being done in the MTN on multilateral solutions.

The United States also reserves the right to modify this request list in light of the tariff changes which may result from the now pending New Zealand tariff revision bill.

UNITED STATES REQUESTS FOR CONCESSIONS

FROM SOUTH AFRICA

Without prejudice to the decision South Africa may make with respect to basing its offer on the tariff reduction working hypothesis when tabling an offer on non-agricultural products during the week of January 15, 1978, the United States wishes to specify particular products and rates of duty that the United States hopes South Africa will take into account in tabling its offer. The list is attached.

As is customary, the United States reserves the right to modify its request during the negotiations.

To the extent that product market access for any of the products included in the United States request list for tariff concessions is affected by the application of specific non-tariff measures, the United States will wish to negotiate these measures in order to ensure that the United States will fully benefit from a tariff reduction. Such measures will be discussed in the course of bilateral negotiations. This position is being taken without prejudice to the work being done in the MTN on multilateral solutions.

Tariff and Nontariff Measure Offers

Multilateral Trade Negotiations

January 15, 1978

INTRODUCTION TO UNITED STATES OFFERS

United States offers on tariffs are contained in Part A. Offers on nontariff measures are contained in Part B. These offers are made in accordance with the working hypothesis set forth in MTN/INF/11, and in accordance with the agreed procedures of Group Agriculture (MTN/AG/7) and Group Non-Tariff Measures (MTN/NTM/35).

United States offers are made pursuant to the objectives set forth in the Tokyo Declaration of Ministers and with the intent of fulfilling the goals stated in paragraph 4 of the Declaration. In this regard, the United States recalls the consensus noted by the Chairman of Group Tariffs in March 1976 that negotiations on tariffs cannot be conducted in isolation but must be considered in the context of negotiations on nontariff distortions of trade.

Further, in order to attain the goal set forth in paragraph 5 of the Tokyo Declaration that the negotiation be conducted on the basis of the principles of mutual advantage, mutual commitment and overall reciprocity to achieve a balance of advantage at the highest possible level, these offers may be adjusted as the result of bilateral and plurilateral negotiations and shall be implemented only if appropriate concessions or contributions have been received from countries that will receive substantial benefits from U.S. concessions. In measuring such reciprocity, the United States will take into account bilateral and sectoral benefits, as well as the overall balance of advantage. With respect to developing countries, the United States does not expect contributions from them that are inconsistent with their individual development, financial and trade needs.

Implementation of certain U.S. offers is conditioned on the attainment of specific concessions on tariffs and nontariff measures from other countries. The United States will discuss these conditions in detail in bilateral negotiations.

As a general condition for the implementation of tariff offers, the United States places a high priority on the liberalization of nontariff measures, including conclusion of satisfactory agreements on subsidies, government procurement practices, and standards. For example, offers of duty elimination on both agricultural and non-agricultural products are conditioned on the successful conclusion of negotiations on subsidies and countervailing duties. Of equal importance is the successful negotiation of a satisfactory international code on safeguards.

The United States places a high priority on the liberalization and expansion of trade in agriculture, in accordance with the principle expressed in the Tokyo Declaration that the negotiations shall be considered as one undertaking and that the various elements shall move forward together.

In the case of negotiations on iron and steel, U.S. objectives include the reduction of cyclical distortions resulting from trade measures and practices, in addition to its general tariff and nontariff objectives. However, major iron and steel producing countries have taken, or are likely to take in the near future, various measures to deal with the serious problems of their respective industries, the effects of which cannot yet be determined. U.S. willingness to maintain its offers on iron and steel depends, therefore, upon the realization of its sectoral objectives and the nature of these measures and their success in developing an improved and open climate for steel trade free of unfair practices.

Similarly, U.S. offers on textile products are conditioned on the maintenance of a satisfactory international arrangement in textiles.

PART A

EXPLANATORY NOTE FOR UNITED STATES OFFERS ON TARIFFS

This document presents United States offers on tariffs and is a single list of all agricultural and non-agricultural items in the Tariff Schedules of the United States (TSUS) subject to most-favored-nation rates of duty. The offer is based on the most-favored-nation rates shown in column 1 of Schedules 1 through 7 of the TSUS. To facilitate analysis, the offers are expressed in terms of ad valorem equivalents. A subsequent document to be circulated at a later date will supersede the present submission and will contain complete legal product descriptions and exact rates of duty.

Agricultural Tariff Offers: All agricultural products are presented in the list regardless of whether a multilateral trade negotiation (MTN) request on the item was received. For certain agricultural products, which are identified in the list, concessions have not been requested by any country and, consequently, an offer has not been made. Likewise, where a requesting country is not the principal supplier of the product requested, generally no offer has been made at this time. The United States has made a major effort to respond to all agricultural requests. The offers will be updated as quickly as possible to reflect pending submissions not yet answered. Requests submitted to the Tropical Products Group were considered when they were resubmitted as Group Agriculture or as Group Non-Tariff Measure requests. The United States will continue to consider such requests as they are received.

Non-agricultural Tariff Offers: For non-agricultural products, the United States has based its offer on a harmonization formula of $Z = AX/(X + A)$ where X is the initial tariff rate and Z the final tariff rate, with the parameter A equal to 14. Greater than formula reductions have been offered in order to achieve at least a 40 percent trade-weighted average reduction in most-favored-nation rates of duty.

Annotations

The following symbols are used in the offers on tariffs to provide explanatory notes for individual items, as indicated:

Symbol	Explanation
A	Items included in the U.S. definition of agricultural products and subject to the procedures of Group Agriculture.
B	Agricultural item; a concession has been requested but a request was not made by the principal supplier.
C	Agricultural item; no request for a concession has been made.
D	Item on which a concession has been offered in the tropical products negotiations.
E	Petroleum product excluded from application of the working hypothesis.
F	Concession offered conforms to the formula tariff reduction.
G	Concession offered is greater than a formula tariff reduction.
L	Concession offered is less than a formula tariff reduction.
M	Item currently subject to import relief action and therefore mandatorily excepted by statute from the negotiations.
P	Item subject to the American Selling Price system of customs valuation; offer is deferred pending completion of domestic advisory procedures.

Symbol	Explanation
S	Item is the subject of a pending petition for import relief; a decision on whether an offer will be made is deferred until final disposition of the petition.
T	Item for which a decision on whether an offer will be made is deferred pending completion of consideration of proposals for substantial revision of the tariff nomenclature and of certain domestic advisory procedures.
X	Item on which a concession is not offered.
Z	Item for which the existing rate of duty is free.

EXPLANATORY NOTE FOR UNITED STATES OFFERS ON NONTARIFF MEASURES

The attached list indicates United States responses to requests for concessions on nontariff measures. The United States will discuss its offers directly with countries making specific requests. In addition, the United States anticipates that many of the requests will be addressed through the negotiation of multilateral codes or agreements on technical barriers to trade, customs valuation, subsidies and countervailing duties, and government procurement.

Several countries' requests concern tariff quotas. The United States considers these to be tariffs for purposes of the negotiation, and responses to these requests are contained in the tariff offer.

The United States has made a major effort to respond to all NTM requests. The offers will be updated as quickly as possible to reflect pending submissions not yet answered.

MULTILATERAL TRADE NEGOTIATIONS
UNITED STATES OFFER ON NONTARIFF MEASURES

Request	Response
Government Procurement: Abolish or modify U.S. federal and local procurement regulations; negotiate a satisfactory international agreement.	The United States is participating in the negotiation of an international agreement on government procurement. The United States anticipates that the practices cited can be addressed in the context of the agreement.
Rural Electrification Act of 1936: Eliminate Buy America requirement on loans.	The United States is prepared to discuss the trade effects of this practice bilaterally.
U.S. Merchant Marine Act of 1970: Relaxation of the "Buy America" provisions to permit foreign sourcing of components and equipment.	Existing U.S. law provides for Maritime Administration approval of the use of foreign components under certain circumstances. The United States is prepared to discuss administration of this provision. However, legislation would be required for significantly liberalized application or repeal of the "Buy America" provision.
DISC: Eliminate Domestic International Sales Corporation tax provisions.	The United States is considering the possible elimination of the tax deferral benefit received by Domestic International Sales Corporations (DISCs).

Countervailing Duty Law: Introduce injury test; negotiate satisfactory international rules on subsidies and countervailing duties.	The U.S. countervailing duty law, enacted in 1897, is consistent with the GATT obligations of the United States under the terms of the U.S. protocol of provisional application. U.S. willingness to negotiate this concession will depend on the obligations developed in an agreement in the area of subsidies and countervailing duties.
Antidumping Act: Conform U.S. legislation to the Antidumping Code.	Review of practice under the U.S. antidumping law is conducted regularly in the GATT Antidumping Committee, consisting of all code signatories. The Committee is responsible for monitoring the effects of dumping legislation and practice on the trade of member countries. Participants are familiar with the subject and problems that have arisen. The Committee plans a meeting in the spring of 1978 specifically directed to the key problems that have arisen. We plan to participate in these discussions within the GATT Antidumping Committee, which can include consideration of possible changes in the Antidumping Code and member state practices thereunder.

Section 337 of the Tariff Act of 1930: Eliminate duplicative investigations.	Depending on the results of negotiations on nontariff measures, especially subsidies and countervailing duties, we will consider amending Section 337 of the Tariff Act of 1930 to exclude from the purview of that Section all matters relating to practices which come within the U.S. countervailing duty law and the Antidumping Act of 1921 as amended.
American Selling Price System of Valuation: Eliminate system generally or with respect to specific products.	The United States is participating in the negotiation of a possible new international code on customs valuation procedures in the Subgroup "Customs Matters" of the Group "Non-Tariff Measures." This request will be handled in the context of that negotiation, the purpose of which is to establish an internationally-agreed valuation system and not to change levels of protection. Application of any resulting code to the U.S. valuation system would constitute the U.S. response to requests for elimination of American Selling Price.
"Final List" System of Valuation, Section 402(a) of the Tariff Act of 1930: Eliminate system generally or with respect to specific products.	The United States is participating in negotiation of a possible new international code on customs valuation procedures in the Subgroup "Customs Matters" of the Group Non-Tariff Measures. This request will be considered in the context of that negotiation, the purpose of which is to establish an internationally-agreed valuation system and not to change levels of protection. Application of any resulting code to the U.S. valuation procedures would constitute the U.S. response to requests relating to the "final list."

Appraisement and Liquidation of Entries: Establish a reasonable time limit within which customs will be required to liquidate entries.	The United States is willing to negotiate the possible limitation of the time period for liquidation of entries.
Valuation of Assists: A definitive interpretation of what constitutes an assist which would reflect only the commercial value of the actual utilization of the assist while outside the United States.	Amendments to the Customs Regulations concerning the definition and valuation of assists are presently being prepared. Moreover, this may be an issue which could be dealt with in the context of work on an international valuation code.
Official Rulings on Valuation and Classification: A reasonable time period should be established within which official rulings should be issued.	The U.S. Customs Service has taken a number of administrative steps to expedite rulings in classification and valuation matters within the limits of present authority. The United States would be willing to discuss specific problems bilaterally.
Appeal Process on Valuation Cases: If the customs appraisement is shown to be erroneous, the court should decide the customs value.	The United States is willing to negotiate a possible change in the appeals process on valuation cases.

Penalties for Customs Fraud: Relax penalty provision to allow penalty to vary with culpability of the importer.	The United States is willing to negotiate the possible limitation of the penalties for customs fraud based upon culpability.
Customs Invoice Form 5515 For All Imports: Abolish requirement for customs invoice; accept commercial invoice.	The United States, early in 1976, simplified Form 5515 in order to reduce any burden it may impose on the trading community. The United States would be willing to consider further modifications to the Special Customs Invoice to reflect agreements reached in the MTN.
Customs Invoice Form 5519 for Imports of Cotton and Linen Fabrics: Eliminate form.	Form 5519 is used only when information necessary for the classification of imports of certain products is not included on the commercial invoice. The United States is unable to consider the elimination of this form because it is essential for the classification of these items.
Wine Gallon Method of Assessment: Eliminate this method of assessment on specified products.	The United States is prepared to consider changing its system of assessing excise taxes and import duties on bottled distilled spirits to a proof-gallon system.

Definition of Still, Sparkling, and Artificially Carbonated Wines: Exemption of cider tested over a certain level.	The United States is willing to discuss this request further. We would appreciate more information regarding the request, however, so we can better formulate a specific response.
Customs Formalities: Elimination of formalities concerning importation of cashmere goat hair.	Clarification of this request is needed since the United States is unaware of any limitations or special formalities applied to cashmere goat hair.
Valuation of Watches: Unspecified.	The United States Government is unaware of problems that the requesting country has with U.S. valuation of watch imports. Further information is needed on this request.
Designated Ports of Entry for Furskins and other Wildlife Products: Modify requirement.	In accordance with the Endangered Species Act of 1973, furskins and other wildlife products must be imported through 8 major U.S. ports at which inspectors from the Fish and Wildlife Service examine imports to ensure their compliance with the Endangered Species Act. Because of the highly technical nature of the examinations, a change in the designated ports of entry is not planned at this time.

Customs Cooperation Council Nomenclature: Adopt this nomenclature as the basis for U.S. customs tariffs.	The United States is participating in the work of the Harmonized System Committee of the Customs Cooperation Council. When the Committee has completed its recommendations, the United States will have to determine if the changed CCCN is acceptable for use as a customs tariff by the United States. Thus far, the United States does not believe that its views have been taken into consideration in several areas.
Tariff Schedules of the United States: Simplify nomenclature and make explanatory notes available.	In connection with its offers on tariffs, the United States is currently considering making numerous proposals for tariff simplification. In view of the U.S. participation in the Harmonized System Committee toward the development of a Harmonized Commodity Description and Coding System, the utility of devoting resources to preparation of explanatory notes at this time is questionable.
General Headnote 10(e) of Tariff Schedules of the United States: Establish precise criteria for determination of an article's "chief use" so as to create greater certainty for importers.	The United States considers that the definition of chief use in General Headnote 10(e), i.e. the use which exceeds all other uses (if any) combined, is as clear a criterion as can be developed.

Recurring Duties: Amend the TSUS so that articles which have been previously imported into the United States and cleared through U.S. Customs will be exempted from customs duties.	The Tariff Schedules of the United States already contain various provisions for free entry or reduced duties for various classes of articles exported and returned. The United States is willing to discuss, on a case by case basis, the possible addition of articles which can be exported and returned without payment of duty.
Duty on Vessel Repairs under Section 466 of the Tariff Act of 1930: Eliminate this provision so that equipment and repair parts would be dutiable under the regular provisions of the U.S. tariff.	Compliance with the request would require legislation by the Congress since the President's tariff reduction authority does not apply to this duty.
Definition of Unwrought Metals: Interpret the definition of "unwrought" in TSUS headnote 3(a), schedule 6, part 2, to allow for further processing (such as drilling) designed only to facilitate handling, providing that such processing does not advance the product toward its end use.	The United States is prepared to consider proposals for modification of the definitions.
Classification of Ductile Iron: Amend Schedule 6, Part 2, Subpart B, Headnote 2(g) to permit ductile iron to be classified as cast iron rather than steel.	The United States is willing to discuss the question of whether a change in the Tariff Schedules is in order.

Definition of Sponge Iron: Change the definition to be consistent with present technology and U.S. Customs Court decisions.	The U.S. Customs Court, in the case of F. W. Myers and Co. v. United States, C. D. 4635, February 13, 1976, defined sponge iron powder. The Customs Service is following that decision which is believed consistent with present technology.
"Ornamented" Textiles: Publish guidelines for administering the term "ornamented" so that exporters can determine in advance how articles would be classified.	Guidelines for the interpretation of the term "ornamented" are presently set out in various court decisions and numerous administrative rulings which have been published and/or are available upon request.
Agricultural and Horticultural Implements: Amend the TSUS to permit duty-free entry for such implements, parts and accessories.	The United States is prepared to discuss the matter and, if appropriate, the Administration will recommend legislation to the Congress to provide duty-free treatment for agricultural and horticultural equipment and parts which can be satisfactorily distinguished from similar equipment and parts and in which there is sufficient trade to warrant such specific action.
Lace or Net Underwear: Change classification from TSUS item 378.05 to 378.15.	This request essentially seeks a lower rate of duty through reclassification. It therefore is actually a tariff matter and would be more appropriately discussed in the context of tariff offers.

Classification of Fish Sticks: Provide for separate classification of fresh and salt water fish sticks.	The United States does not believe that it is practical or technically feasible to provide for a separate classification of salt and fresh water fish sticks. However, the United States is willing to consider further discussions on this request if a practical method of administering such a classification can be suggested.
Customs Documentation: Eliminate special customs forms for watch products.	There is no special form required upon importation of watches. The United States requires information to be provided on the invoice as essential to the proper classification of the watch products.
American Society of Mechanical Engineers Seal of Approval: Liberalization of requirements on boilers and pressure vessels; prompt inspection approval; recognition of inspection and certification in exporting country.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code.
Independent Standards-Making Bodies and Prevalence of Federal, State, and Municipal Standards: Negotiation of a satisfactory international code on technical barriers to trade; permit certification of products in country of origin.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code.

U.S. Flammability Standards: Recognition of foreign tests.	The United States is participating in the negotiation of a proposed code of conduct on technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code. There is no U.S. requirement that wearing apparel in general be tested in the United States. The tests may be done abroad by the foreign manufacturer or his government providing they are done in accordance with U.S. standards.
Toxic Substances Control Act: Negotiation of a satisfactory international code on technical barriers to trade.	The United States is participating in the negotiation of a proposed code of conduct on technical barriers to trade. Rules and regulations on chemical substances have not been written yet, nor have final regulations on testing procedures or test results been developed. However, it is expected that testing of the product will be done by the manufacturer either here or abroad.

Certification of Shipboard Safety Equipment: Negotiate a satisfactory international code on technical barriers to trade; liberalize to permit certification of products in country of origin; recognize inspection in foreign countries.	The United States is participating in the negotiation of a proposed code of conduct on technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code. The United States has already agreed to some changes in its requirements allowing for foreign inspection of some of the products in question. The United States would be willing to enter into discussions in appropriate forums to review the possibility of developing international standards which would satisfy United States requirements.
Noise Control Act: Negotiate a satisfactory international code on technical barriers to trade; permit certification of products in country of origin.	The United States is participating in the negotiation of a proposed code of conduct on technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code. Certification or pre-production certification of conformance with the Environmental Protection Agency (EPA) noise standards is not required. All testing is done by the manufacturer.
Inspection of Biologics: Accept foreign certification.	The United States is willing to discuss possible arrangements for certification, along lines already discussed with the requesting country.

Unspecified Lumber Standards: Liberalize.	The United States does not maintain any federal standards on lumber. The above requests are in need of clarification. If they can be clarified, the United States will entertain specific requests for modifications in U.S. practice.
Marks of Origin under Section 304 of the Tariff Act of 1930: Elimination of excessive requirements and penalties.	At the present time we do not foresee the legislative changes necessary to meet this request. However, certain products may be considered for addition to the "J-List." The requests are in need of further clarification regarding the items of greatest interest for such possible additions.
Marking Requirements for Watches and Clocks: Liberalize in accordance with the international harmonization plan.	The marking requirements specified in the referenced headnote to the U.S. Tariff Schedules are mandated by Section 304 of the Tariff Act of 1930. Clarification is required in regard to the "international harmonization plan" referred to in the requested action, and in regard to specific changes desired by the requesting country.
Marking Requirements: Modify Fair Packaging and Labeling Act of 1966.	Clarification of this request is needed. While the Fair Packaging and Labeling Act of 1966 requires labeling as to place of production, the fact that it applies equally to domestic and foreign goods would indicate that it does not constitute a barrier to trade.

Label Approval for Food and Drug Products Given by Regional FDA Offices: Interpretation of FDA regulations should be such that application of all rules is uniform.	Washington headquarters of the Food and Drug Administration (FDA) gives informal advice on proposed labeling, which when presented at point of entry along with product should obviate any problems. In addition FDA maintains an appeals mechanism for importers who feel they have not been treated fairly.
Labeling Requirements of the Fair Packaging and Labeling Act of 1966: Labeling regulations should not continue to constitute barriers to trade.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the measure cited will be covered by the provisions of the standards code.
Textile Fiber Products Identification Act and the Wool Products Labeling Act of 1939: Modify requirements.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code. Labeling requirements are applied in a nondiscriminatory manner on both imports and domestic production.

Packaging and Labeling: Modify requirements on various products.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code. Individual requests under this heading will have to be clarified in bilateral consultations.
Unspecified Standards: Liberalize.	These requests are in need of clarification. If clarified, the United States will entertain specific requests for modifications in U.S. practices.
Health and Sanitary Regulations: Eliminate U.S. regulations on rubber.	The United States does not maintain any federal health or sanitary regulations on imports of rubber entering under TSUS 446.10 and 446.12. If these requests can be clarified, the United States will entertain specific requests for modifications in U.S. practice.
Health and Sanitary Regulations for crustaceans and molluscs: Eliminate documentation requirements and apply rules in a non-discriminatory manner.	The United States requires that crustaceans and molluscs (both domestic and foreign) be harvested from areas certified as sanitary waters. The United States is willing to explain these regulations and their application to interested countries.

Unspecified Health and Sanitary Regulations: Eliminate or modify requirements on certain products.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code. Individual requests under this heading will have to be clarified in bilateral consultations.
Standards for Pepper: Liberalize Food and Drug Administration specifications for pepper imports; accept certificates from recognized foreign organizations.	U.S. federal standards for pepper are very liberal; the United States only requires that shipments of pepper conform to the general provisions of the Food, Drug, and Cosmetic Act regarding wholesomeness and sanitation. Although the United States cannot liberalize its standards any further, it is prepared to discuss the possibility of an informal meeting between the requesting country and the American Spice Trade Association.
Food and Drug Definition of Cube Pineapple: Amend regulation in a specified manner.	The United States will discuss possible modification of its regulations for cube pineapple which are "standards of identity" and not promulgated for reasons of health or safety.

Licensing Procedures: Liberalize procedures for virus serums and natural drugs.	The request is in need of clarification. If it is clarified, the United States is willing to discuss specific proposals but notes that domestic and imported products are treated in a like manner.
Merchant Marine Acts Requirement that only vessels of U.S. Registry may engage in U.S. coastwise trade: Remove de facto prohibition on imports of all, or specified, vessels.	The principle that foreign-built vessels may not engage in coastwise trade is an integral part of U.S. maritime law. This principle is non-negotiable. Furthermore, it would be extremely difficult to legislate exemption of certain types of vessels from the general rule.
Title 19 of the U.S. Code: Amend U.S. legislation to permit U.S. registry of foreign-built fishing vessels for use in U.S. fisheries trade.	The principle that foreign-built fishing vessels may not be registered for use in U.S. fisheries trade is an integral part of U.S. maritime law. It is unlikely that the legislation could be obtained to amend these provisions.
Section 606(7) of the Merchant Marine Act of 1936: Remove the prohibition on the purchase of foreign-built containers.	Although this section has been deleted from U.S. law, shipbuilders making use of the Capital Construction Fund must purchase U.S.-built containers unless specifically exempted by the Secretary of Commerce. The U.S. is willing to discuss the application of this provision.

Gun Control Act of 1968: Eliminate the prohibition of imports without Treasury authorization.	The requirement for a license on all firearms imports is maintained for reasons of public welfare and safety in accordance with Article XX of the GATT. Every effort is made to issue licenses as expeditiously as possible, within the requirements of the law. The United States is not able to accede to the request for elimination of the requirement.
Embargo on Enrichment of Imported Natural Uranium for Use in the United States: Eliminate embargo.	Restrictions on the importation of uranium for enrichment for domestic use will be gradually liberalized beginning in 1977, and all restrictions will be ended by 1984.
Quotas on Specialty Steel: Remove quotas.	The quotas on specialty steel imports were imposed as the result of an escape clause action under Title II of the Trade Act of 1974. This action is consistent with Article XIX of the GATT. The quotas will expire in June 1979 unless extended (for a maximum period of three years) by the President.
Restrictions on Imports of Books: Eliminate the de facto prohibition of imports of English language books wholly or in part the work of an author who is a national or domiciliary of the United States.	The United States has already taken steps to substantially liberalize the restrictive effects of this measure. It is willing to discuss possible remaining issues bilaterally.

Prohibition on Imports of Dangerous Drugs: Eliminate.	The United States considers its controls on dangerous drugs to be justified under GATT Article XX (B).
Marine Mammals Act of 1972: Modify limitations with respect to native handicrafts and clothing.	An exemption in the Marine Mammals Act for handicrafts produced by non-U.S. native peoples would necessitate legislative changes that are not planned at this time.
Endangered Species Act of 1973: Accept foreign certificates that fossilized whalebone is used in carvings.	The present U.S. law makes no distinction between fossilized whalebone and other whalebone. The United States does not expect modification of the Act in the near future.
Medical and Scientific Instruments: Provide duty-free entry of medical/ scientific instruments, apparatus and preparations to non-profit institutions, including where equivalent goods are manufactured in the United States.	The United States fully adheres to the provisions of the Florence Agreement and does not foresee changes in Annex D of the Agreement, which covers these practices.
Food and Drug Administration Prohibition on Manufacture and Sale of Chocolate Containing Alcohol: Remove prohibition on importation.	The United States considers that this measure is maintained in the interests of public welfare and safety and is not negotiable in the MTN. The prohibition applies equally to chocolates containing alcohol whether they are foreign or domestically-produced.

Global Quota on Toys: Eliminate.	Clarification of the request is needed since there is no quota on these products.
Quantitative Restrictions or Export Restraints on Certain Textile Products: Eliminate.	The United States is communicating directly with each requesting country since the situation varies for each.
Unspecified Licensing Requirements for Certain Products: Eliminate.	Clarification of these requests is needed since there are no license requirements on these products.
National Security Restrictions on Petroleum Products: Exempt imported petrochemical feed-stocks from licenses and fees; remove import restrictions.	Petroleum and petroleum products imported into the United States are not presently subject to global quotas or to restrictive licensing to regulate the quantity of imports. The entire energy program of the United States is currently under review by the Executive Branch and by the Congress. The views of requesting countries are being taken into account fully.
Ethyl Alcohol for Non-Beverage Purposes: Accept foreign certification that denaturing has taken place.	The United States would be willing to discuss possible circumstances under which certificates of denaturation might be accepted. Such discussions would cover inter alia the conditions under which certificates would be issued, as well as methods by which the alcohol could remain subject to acceptable controls to prevent diversion.

Quotas on Certain Types of Footwear: Liberalize.	The United States does not maintain any quotas or other arrangements on the products specified to which the requesting country is subject. This request is in need of clarification.
Quotas on Brooms and Brushes: Eliminate quotas on TSUS item 750.70.	The United States does not maintain any form of quota on imports of items entering under the tariff line specified (TSUS 750.70). This request is in need of clarification.
Railcar "Per Diem" Charges: Elimination of requirement to purchase U.S.-made railcars.	The Administration is willing to support any request by the affected foreign railroad companies to the Interstate Commerce Commission to review its ruling in this matter.
Los Angeles County Personal Property Tax on Cargo Shipping Containers: Eliminate tax.	From January 1, 1975 to March, 1978, cargo containers greater than 1,000 cubic feet have been exempt from the California Personal Property Tax. The personal property taxes in California are applied in a non-discriminatory manner to both imports and domestic goods and are, therefore, consistent with GATT rules.
Labor Unions: Modify activity with respect to certain imports.	Clarification of these requests is needed.

Unspecified Restrictions on Certain Products: Eliminate.	These requests need clarification. If they are clarified, the United States will entertain specific requests for modification in U.S. practices.
Section 22 Import Quotas on Dairy Products: Elimination or relaxation of quotas.	Taking into account progress and the results of discussions in the Dairy Subgroup, the United States is prepared to discuss requests on these quotas bilaterally. X
Section 22 Import Quotas on Cotton; cotton having a staple length under 1-1/8 inches is imported under country quotas; cotton having longer staple lengths is imported under a global quota: Eliminate.	The United States would consider the establishment of a special global quota on upland cotton (generally cotton with a staple length of 3/4 inches to 1-3/8 inches) under certain conditions. The United States is not in a position to change its quota arrangements with respect to extra-long staple cotton, which is generally considered to be 1-3/8 inches and longer.
Section 22 Import Quotas on Peanuts: Remove or liberalize quantitative restrictions and global quotas.	The present support program will be in force at least until 1982. We foresee no modification at this time. X

U.S. GATT Waiver for Section 22 Quotas: Eliminate.	The United States is prepared to discuss this request. However, renunciation of the waiver would depend in large measure upon the outcome of discussions in the Dairy Subgroup and upon the implementation of the recently negotiated International Sugar Agreement. Quotas which in the past have restricted imports of wheat, barley, and barley malt are no longer in effect.
Meat Import Act Quotas: Eliminate; modify for increased and secure access; minimum global access of 1,475 million pounds or 7.5% of consumption, whichever is greater.	The United States is willing to consider more liberal access to its market for fresh, chilled, and frozen bovine meat. Taking into account the progress and the results of discussions in the Meat Subgroup, and the extent to which other major importing countries are willing to offer a comparable improvement in their terms of access in the course of negotiations, the United States is willing to discuss these requests bilaterally.
Importation of Cattle for Breeding under the Duty-free Position TSUS 100.01: Eliminate breeding regulations which restrict entry of exotic and less than purebred animals.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code.

U.S. Export Subsidies: Extend to export sales minimum pricing provisions that apply to domestic sales from CCC; eliminate export subsidy permanently.	The United States is not now subsidizing grain exports, either through direct payments or through sales. Any offer which the United States would consider with respect to a commitment concerning future export subsidization would be covered by negotiation of a satisfactory international code governing export subsidies and countervailing duties.
Flour and Flour Products labeled "enriched" are required to be within minimum and maximum levels of iron, riboflavin, etc. content: Modify appropriately.	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code.
Agricultural Marketing Agreement Act Provision for Marketing Orders: Eliminate discriminatory effect with respect to avocados.	The United States considers that this measure is not applied in a discriminatory manner. The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practice cited will be covered by the provisions of the standards code.
Federal Excise Taxes: Eliminate or reduce tax on cigarettes made from imported tobacco.	The United States levies excise taxes on cigarettes on a non-discriminatory basis. Such taxes are imposed for revenue purposes.

State Sales Taxes: Eliminate or liberalize.	Sales taxes imposed by the States and the District of Columbia are general taxes that are applied with no discrimination between domestic or foreign products. They are imposed for revenue purposes and are not negotiable.
Reclassify buffalo meat under TSUS 106.55 as meat of other game animals.	This request essentially seeks a lower rate of duty through reclassification. It therefore is actually a tariff matter and would be more appropriately discussed in the context of tariff offers.

Dear Mr. Linden:

The Secretariat is requested to convey copies of the United States offer to all MTN participants. However, copies are being provided to the Delegations of Bulgaria, Cuba, Czechoslovakia, Hungary and Romania for their information only, since the United States is not prepared to enter into tariff negotiations with those countries in the context of the General Agreement on Tariffs and Trade.

I request that the Secretariat attach a copy of this letter to copies of the United States offer provided to the five countries mentioned above.

Dear Mr. Linden:

As you recall, the United States requested the Secretariat to convey copies of the United States offer to all MTN participants. If Vietnam is an MTN participant, the Secretariat may provide copies of the United States offer to Vietnam for its information only, since the United States is not prepared to enter into tariff negotiations with Vietnam in the context of the General Agreement on Tariffs and Trade.

I request that the Secretariat attach a copy of this letter to any copies of the United States offer provided to Vietnam.

Dear Mr. Mathur:

On the 23rd of January 1978, the United States tabled a global offer on certain non-tariff measures in response to requests received from MTN participants. Subsequent to the preparation of those offers, the United States received additional requests covering a number of non-tariff measures not previously requested. Attached is the United States global offer with respect to those non-tariff measures.

This offer should be treated as an addendum to the U.S. initial global offer. Accordingly, it should be regarded as confidential and for use only by MTN participants. A copy of the response has been provided to the individual countries which submitted the requests to the U.S.

Mr. Newkirk told me on 14 March that there was no need to circulate this offer.

MULTILATERAL TRADE NEGOTIATIONS
UNITED STATES OFFER ON NONTARIFF MEASURES--ADD. 1

Request	Response
Do not apply NTMs through administration of escape clause.	This request is unclear. The United States is participating in the negotiation of a possible safeguard code in the MTN; the matter might be covered by such a code. However, the request needs clarification to establish its precise nature.
Customs Valuation: Unspecified	The United States is participating in negotiation of a possible new international code on customs valuation procedures in the Subgroup "Customs Matters" of the Group Non-Tariff Measures. This request will be considered in the context of that negotiation, the purpose of which is to establish an internationally-agreed valuation system and not to change levels of protection. Application of any resulting code to the U.S. valuation procedures would constitute the U.S. response to requests relating to "customs valuation".
Unspecified Customs and Administrative Entry Procedures: Eliminate	The requests need clarification. The United States has indicated its willingness to consider modifications in specific customs procedures to reflect agreements reached in the MTN. Individual requests will be discussed on a bilateral basis if they are made more specific.

Bicycle Standards: Simplification	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the measure cited will be covered by the provisions of the standards code.
Standards of American Society for Testing Materials: Simplification	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the measures cited will be covered by the provisions of the standards code.
Unspecified Standards: Removal or Simplification	These requests are in need of clarification. If they can be clarified, the United States will entertain specific requests for modifications in U.S. practice.
Standards in General: Negotiation of a satisfactory standards code	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that most standards related measures will be covered by the provisions of the standards code.

Regulations of the Food and Drug Administration: Do not apply NTMs through regulations of the Food and Drug Administration	The existence and activities of the Food and Drug Administration are consistent with Article XX of the GATT. All regulations apply equally to domestically and foreign manufactured items.
Standards for Lead Content: Simplification	It has been well documented that the unrestricted use of lead in certain products can result in poisonings. The United States considers that this measure is maintained in the interests of public welfare and safety and is not negotiable in the MTN. The United States notes that these standards apply equally to domestic and imported products.
Safety Regulations requiring compliance with maximum tolerances and requirement for Underwriters Laboratory certification: Accept product conformity with minimum tolerances and certification of exporting country	The United States is participating in the MTN in negotiation of a proposed code of conduct on preventing technical barriers to trade. The United States anticipates that the practices cited will be covered by the provisions of the standards code.
Export Licensing under Export Administration Act: Elimination	The United States regards the continuance of its export licensing system as essential to its national security interests. This system is not negotiable. The vast majority of U.S. exports is not affected by controls under this system (which has been found consistent with the obligations of the United States under the GATT).

GATT Multi-Fiber Arrangement: Removal of export restraints	The United States and the requesting country have mutually agreed to the levels of restraints specified in the textile bilateral agreement between them pursuant to the Multi-Fiber Arrangement. Any questions regarding those levels or the implementation of the Agreement should be pursued in accordance with established consultation procedures set out in the bilateral agreement.
Consumer Protection Act: Unspecified	Proposed legislation to establish an agency for consumer protection (H.R. 6805 later amended by H.R. 9718) was defeated in the U.S. Congress.
Various Restrictions Never in Effect	The various restrictions requested have never been in effect for these products. If the requesting country feels that there are, in fact, barriers to trade for these commodities similar to the requested measures, the U.S. is prepared to discuss these measures bilaterally.

U.S. Response

The various restrictions requested have never been in effect for these products. If the requesting country feels that there are, in fact, barriers to trade for these commodities similar to the requested measures, the U.S. is prepared to discuss these measures bilaterally.

MULTILATERAL TRADE NEGOTIATIONS
UNITED STATES OFFER ON NONTARIFF MEASURES
ADDENDUM 2

Request	Response
Cotton Mesh Horse Blankets: Change classification from TSUS item 386.04 to 386.10.	This request esentially seeks a lower rate of duty through reclassification. It therefore is actually a tariff matter and would be more appropriately discussed in the context of tariff offers.
Unimog Tractors: Change classification from TSUS item 692.02 (945.69) to 692.30, tractors suitable for agricultural use.	Unimog tractors are currently being classified under TSUS item 692.30, as desired by the requesting country. Although the U.S. Customs Service has proposed to reclassify them under TSUS item 692.02, no decision has yet been made.
Synthetic Single Crystal Quartz: Change classification from TSUS item 520.75 to 540.11.	Synthetic single crystal quartz has a crystalline structure and is distinguished from glass, which has a random structure. The crystalline structure of the synthetic quartz makes it translucent and free of visible internal imperfection so as to be considered "of gemstone quality". Those imports of synthetic single crystal quartz that do not satisfy criteria to be considered of gemstone quality presently are classified under TSUS item 540.11.

Tagger-Tails: Change classification from TSUS item 745.63 to 774.60.	This request essentially seeks a lower rate of duty through reclassification. It therefore is actually a tariff matter and would be more appropriately discussed in the context of tariff offers.
Bobbins: Change classification from TSUS item 770.10 to 256.65, covering paper tubes for holding thread or yarn.	The United States, taking into account representations made by the requesting country, will continue to classify the bobbins specified under TSUS item 256.65.
Jeans: Change classification from TSUS item 380.00 to 380.39, covering non-ornamented wearing apparel.	Based on the information available, it is not possible to determine if the articles specifically referred to are properly classified. If the description of the ornamentation, including trademarks and brand names, can be made more explicit, we will give further consideration to this request.
Industrial Rubber Sheeting: Change classification from TSUS item 359.10 to 771.42.	Industrial rubber sheeting is properly classifiable under TSUS item 359.10.
Writing Ink Containers For Fountain Pens: Change classification from TSUS item 760.36 to 474.26.	More information is needed concerning the article in question. We assume that the item in question is TSUS item 760.36 rather than 760.26, which is non-existent.

	If the article is a cartridge containing ink for a fountain pen, which is designed so as to be inserted into the barrel of the pen and used as the ink reservoir for the pen, then the ink cartridge is more specifically described as a part of the pen and is classified under TSUS item 760.36. If the article is a container of ink from which ink is transferred to the fountain pen and the container itself is not inserted into the pen for use as the pen's reservoir, the article is more specifically described as ink, which is classified under TSUS item 474.26.
Bonds For Temporary Importations: Change U.S. regulations to allow for the cancellation of bonds by payment of the proper duty.	The United States is willing to discuss possible changes in the applicable U.S. Customs Service regulations and their administration so as to allow for the conversion of imports made under temporary import bonds to imports for consumption.
Unspecified Health and Sanitary Regulations: Remove regulations applicable to goat and kid skins, iguana and snake skins, and sheep and lamb skin leather.	This request is in need of clarification. If it can be clarified, the United States will entertain specific requests for modifications in U.S. practice.
Export Restraints on Footwear: Remove	The restraints on footwear exports to the United States in effect under the arrangement negotiated with the requesting government are

not subject to modification in the context of the MTN. These restraints were imposed in accordance with GATT Article XIX. The United States notes that certain of the items listed in this request are not currently subject to the restrained levels of exports to the U.S. market.

Export Restraints on Canned Mushrooms: Immediate removal.

The restraints on the exports of canned mushrooms from the requesting country that were negotiated with the U.S. Government pertained only to the 1976/77 marketing year and thus expired on June 30, 1977.

REVISED
UNITED STATES TARIFF OFFERS
MULTILATERAL TRADE NEGOTIATIONS

June 19, 1978

EXPLANATORY NOTE

The United States has made certain revisions in its tariff offers. These revisions, which are contained in the attached pages, are of the following nature.

Additional offers on products subject to procedures of Group Agriculture have been made in response to requests from interested countries.

Additional offers have been made on products subject to procedures of Group Tariffs, which were pending at the time the initial United States offer was tabled on January 15, 1978 and which were "to be specified" later.

1. Products subject to the American Selling Price and "Final List" bases of customs valuation.

   These offers are made subject to receiving adequate reciprocity in compensation for both the removal of these bases of valuation and for reductions in tariff rates. In this connection, specific requests for reciprocal concessions will be made bilaterally.

2. Products on which a petition for import relief was pending in January.

In addition, some supplemental offers are made on products subject to the procedures of Group Tariffs.

Finally some errors that were made in the initial offer are corrected.

The conditions and explanations indicated by the United States in its initial offer continue to apply to the revised offers.

Dear Mr. Linden:

The following corrections have been made to the revised U.S. offer dated June 19, 1978, given to you yesterday. I have provided your office with a corrected version of that document.

TSUS

140.35	Offer rate should read 0.0%
140.75	Should read EX140.75
182.46	Description should read "sauces, other than thin soy, except sauces of tomato and tomato products". Offer rate should read 3.0%, note should read "A" only.
EX182.46	Delete word "except"; offer rate should be blank; note should read "AX"
406.10B	Offer rate should read "7.8%"; delete "X" in note and replace with "F".

Sincerely,

James A. McNamara

Dear Mr. Linden:

Attached hereto are two hundred copies of additional United States tariff offers in Group Agriculture. The conditions and explanations indicated by the United States in its initial offer continue to apply to these additional offers.

I would appreciate your arranging for circulation of copies to all participants in the Multilateral Trade Negotiations. In providing copies to Bulgaria, Cuba, Czechoslovakia, Hungary and Romania, I have been instructed to request that a cover note should be added stating that this document is for their information only and that the United States is not prepared to enter into tariff negotiations with them in the context of the GATT.

Sincerely,

Dear Mr. Linden:

The format of the U. S. offer on certain ball and roller bearings (TSUS 680.35) has been amended. As shown below, the United States intends to consolidate the 14 subitems shown in our January offer into two new items. For the first of these items, we are making no offer; for the second, we are offering a greater-than-formula reduction. The United States has notified the GATT under Article XXVIII of its intent to convert the rates applicable to these items to ad valorem rates.

The following represent our revised offer for TSUS 680.35:

	TSUSA Coverage	1976 AVE	U.S. Offer
680.XX	680.3504-.3528	11.0	11.0
680.XX	680.3530-.3560	13.0	6.5

Please note that the 1976 AVEs shown above have been calculated to yield equivalent duties collected if the Final List were to be eliminated.

Sincerely,

James A. McNamara

Dear Mr. Linden:

In exercising its GATT rights as set out in General Note 4 of Schedule XX, the United States is adjusting its rates to reflect the contemplated elimination of its American Selling Price (ASP) system of valuation.

This letter is to inform you that the U.S. legal offer will include conversion of the form of the tariff from specific or compound rates to ad valorem rates for all ASP chemicals (TSUS 403.02-409.00), except for the following:

TSUS	Short Description	Current Rate (June 19 offer)
403.02	Anthracene 30% purity or over by weight.....	1.4¢ per lb. + 8% ad valorem
403.04	Carbazole with purity of 65% or more by weight.....	1.7¢ per lb. + 12.5% ad valorem
403.06	Naphthalene, solidifying at 79 degrees C and over.....	0.7¢ per lb. + 4% ad valorem
403.42	Cresylic acid having specified distillation.....	0.85¢ per lb. + 5% ad valorem
403.44	Metacresol, or orthocresol, paracresol, etc. with purity 75%..	0.8¢ per lb. + 5.3% ad valorem
403.46	Coal tar distillates NSPF having specified yields.....	1.7¢ per lb. + 8.4% ad valorem

For these six items, the compound rate shown above will be the base rate in the legal offer; for those items being converted, the ad valorem equivalents as shown in the June 19 offer will be the base rates in the legal offer.

Sincerely,

James A. McNamara

Dear Mr. Linden:

Enclosed is the U.S. tariff offer in the form of an initial draft of Schedule XX to be annexed to the General Agreement at the conclusion of the Multilateral Trade Negotiations. Modifications to this document will be issued to reflect the results of bilateral negotiations still under way, to incorporate final changes and to correct clerical errors.

This document reflects the U.S. offer as it stood on June 19, 1978, modified to incorporate additional U.S. agricultural offers circulated to the GATT Secretariat September 20, 1978, new U.S. offers on gelatin, the revision of nomenclature necessary to reflect the anticipated elimination of the American Selling Price system of customs valuation, a new nomenclature for ceramic dinnerware, and simplified watch nomenclature. Where it will simplify the computation of the amount of duty imposed, rates have been rounded--in the absence of a multilateral agreement on this topic--according to a neutral rounding rule.

We have also enclosed corrigenda I to this document. We would appreciate your circulating the document and corrigenda to all MTN participants. However, copies provided to the Delegations of Bulgaria, Czechoslovakia, Cuba, Hungary, Romania and Viet Nam would be for their information only since the United States is not prepared

to enter into tariff negotiations with those countries in the context of the General Agreement on Tariffs and Trade.

I request that the Secretariat attach a copy of this letter with the relevant materials.

Sincerely,

William E. Culbert

	CHAPTER 2. - MEATS			
	Notes:			
	1. This chapter covers only meats, including meat offal, fit for human consumption. The meats of all animals, including whales and other sea mammals but not fish and shellfish (see chapters 3 and 15 of this section), are covered, and unless the context requires otherwise, reference to an animal includes such animal regardless of size or age.			
	2. In assessing the duty on meats, no allowance shall be made for normal components thereof such as bones, fat, and hide or skin. The dutiable weight of meats in airtight containers subject to specific rates includes the entire contents of the containers.			
	Unit A. - Bird Meat			
	Birds (dead), fresh, chilled, or frozen, if whole, or if plucked, beheaded, eviscerated, or cut into pieces (including edible offal), but not otherwise prepared or preserved:

	CHAPTER 3. - FISH AND SHELLFISH		
	Notes:		
	1. The term "fish", as used in this chapter, does not include shellfish, or whales or other mammals. This chapter covers only fish and shellfish, live or dead, fit for human consumption.		
	2. In units A and B of this chapter, the term "whether or not whole" means if whole, or if processed by removal of heads, fins, viscera, scales, skins, or bones, or by filleting, division into pieces, or other cutting or slicing operations, but not minced or ground.		
	3. In units C and D of this chapter, the term "in oil" means packed in added oil or fat, or in added oil or fat and other substances, whether such oil or fat was introduced at the time of packing or prior thereto.		
	4. Live fish and shellfish imported to be used for purposes other than human consumption are covered by item 190.45 (see chapter 15F of section 1) and certain other fish and shellfish products are covered by chapters 14 and 15 of section 1.		
	Unit A. - Fish, Fresh, Chilled, or Frozen		
	Note:		
	1. In item 110.50 of this unit, "apparent consumption" shall be the sum of (a) the production in the United States of fresh and frozen fillets, steaks, and sticks of the named fish as defined on October 30, 1947, and as reported, by the United States Fish and Wildlife Service, (b) the quantity of such fillets, steaks, and sticks entered into

Notes:

1. This unit covers all furskins, except carroted furskins, but does not cover fur or hair which has been removed from the skin. (Carroted furskins and fur or hair removed from the skin are covered in unit D of chapter 15 of section 1.)

2. As used in this unit --

(a) the terms "furskins" or "skins" include the whole skins, or cuttings, heads, paws, tails, or other parts of whole skins, whether or not assembled into plates, mats, linings, strips, crosses, or similar forms, but do not cover such skins or parts of skins assembled in the rough form of garments, of parts or accessories of garments, or of other articles (see chapter 13B of section 7);

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1973
	(b) the term "raw or not dressed" refers to raw, unprocessed skins, or to processed skins which have not been subjected to any processing which preserves them indefinitely in a pliant state; and (c) the term "dressed" refers to skins which have been subjected to any processing which preserves them indefinitely in a pliant state, whether or not dyed or otherwise processed and whether or not in condition ready for manufacture into garments or other articles. 3. If the wool or hair on any skins which have been released from customs custody under item 123.00 is removed from such skins otherwise than as an unsought residue resulting from the processing of the skins for use as furs, the entire importation shall be subject to duty at the appropriate rate for such wool or hair on the skin under unit C of chapter 1 of section 3, and for the purposes of this note, the clean content of such wool or hair shall be deemed to be 100%.

	CHAPTER 10. - SUGAR; COCOA; CONFECTIONERY Unit A. - Sugars, Sirups, and Molasses Notes: 1. The term "degree", as used in the "Rate of Duty" column of this unit, means sugar degree as determined by polariscopic test. 2. The rates in column numbered 1 in items 155.20 and 155.30 on January 1, 1968, shall be effective only during such time as title II of the Sugar Act of 1948 or substantially equivalent legislation is in effect in the United States, whether or not the quotas, or any of them, authorized by such legislation, are being applied or are suspended: Provided, (i) That, if the President finds that a particular rate not lower than such January 1, 1968, rate, limited by a particular quota, may be established for any articles provided for in item 155.20 or 155.30, which will give due consideration to the interest in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, he shall proclaim such particular rate and such quota limitation, to be effective not later than the 90th day following the termination of the effectiveness of such legislation; (ii) That any rate and quota limitation so established shall be modified if the President finds and proclaims that such modification is required or appropriate to give effect to the above considerations; and (iii) That the January 1, 1968, rates shall resume full effectiveness, subject to the provisions of this note, if legislation substantially equivalent to title II of the Sugar Act of 1948 should subsequently become effective.		

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 19[illegible]
	3. The total amount of sugars, sirups, and molasses described in items 155.20 and 155.30, the products of all foreign countries, entered in any calendar year shall not exceed, in the aggregate, 7,000,000 short tons, raw value. For the purposes of this note, the term "raw value" means the equivalent of such articles in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury. The principal grades and types of sugar shall be translated into terms of raw value in the following manner: (i) For sugar described in item 155.20, by multiplying the number of pounds thereof by the greater of 0.93, or 1.07 less 0.0175 for each degree of polarization under 100 degrees (and fractions of a degree in proportion). (ii) For sugar described in item 155.30, by multiplying the number of pounds of the total sugars thereof (the sum of the sucrose and reducing or invert sugars) by 1.07. (iii) The Secretary of the Treasury shall establish methods for translating sugar into terms of raw value for any special grade or type of sugar for which he determines that the raw value cannot be measured adequately under the above provisions.

	CHAPTER 12. - BEVERAGES		
	Notes:		
	1. This chapter covers only products which are fit for use as beverages or for beverage purposes.		
	2. Each and every gauge or wine gallon of measurement is counted as at least one proof gallon; and the standard for determining the proof of brandy and other spirits or liquors of any kind when imported is the same as that which is defined in the laws relating to internal revenue (26 U.S.C. (1970) 5002(a)(7) and (8), 5041(c)). The Secretary of the Treasury, in his discretion, may authorize the ascertainment of the proof of wines, cordials, or other liquors and fruit juices by distillation or otherwise, when it is impracticable to ascertain such proof by the means prescribed by existing law or regulations.		
	3. The duties prescribed on products covered by this chapter are in addition to the internal-revenue taxes imposed under existing law or any subsequent Act. The duties imposed on products covered by this chapter which are subject also to internal-revenue taxes are imposed only on the quantities subject to such taxes; except that, in the case of distilled spirits transferred to the bonded premises of a distilled spirits plant under the provisions of section 5232 of the Internal Revenue Code of 1954, the duties are imposed on the quantity withdrawn from customs custody.		
	4. Provisions for the free entry of certain samples of alcoholic beverages are covered by chapter 5 of section 8.

	Unit A. - Fruit Juices Notes: 1/ 1. The products described in this unit are covered herein whether or not containing ethyl alcohol, but any such products which are also described in unit C or D of this chapter are classifiable in said unit C or D. 2. For the purposes of this unit, a concentrated juice may be in liquid, powdered, or solid form. 3. For the purposes of this unit -- (a) the term "gallon" in the "Rate of Duty" column of the provisions applicable to fruit juices means gallon of natural unconcentrated juice or gallon of reconstituted juice; (b) the term "reconstituted juice" means the product which can be obtained by mixing the imported concentrate with water in such proportion that the product will have a Brix value equal to that found by the Secretary of the Treasury from time to time to be the average Brix value of like natural unconcentrated juice in the trade and commerce of the United States; and (c) the term "Brix value" means the refractometric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid. 4. In determining the number of gallons of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 degrees (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice.

	CHAPTER 13. - TOBACCO AND TOBACCO PRODUCTS		
	Notes: 1/		
	1. The term "wrapper tobacco", as used in this chapter, means that quality of leaf tobacco which has the requisite color, texture, and burn, and is of sufficient size for cigar wrappers, and the term "filler tobacco" means all other leaf tobacco.		
	2. The percentage of wrapper tobacco in a bale, box, package, or other shipping unit is the ratio of the number of leaves of wrapper tobacco in such unit to the total number of leaves therein. In determining such percentage for classification purposes, the appraiser shall examine at least 10 hands, and shall count the leaves in at least 2 hands, from each shipping unit designated for examination.		
	3. The dutiable weight of cigars and cigarettes includes the weight of all materials which are integral parts thereof.		
	4. Provisions for the free entry of certain samples of tobacco products are covered by chapter 5 of section 8.		
	5. The rate for any product provided for in item 170.10 or 170.20 will be increased by the same amount, not in excess of 9.1 cents per pound, and for the same period, as the rate provided for such product in Part II of this schedule 2/ is increased. The concession provided for any product in item 170.10 or 170.20 will be $1 per pound at such time and for such period as the concession provided for such product in Part II of this schedule 2/ is withdrawn.		

1/ Note 5 is not in the Tariff Schedules of the United States. Headnotes 3 and 4 of TSUS schedule 1, part 13, are omitted; headnotes 5 and 6 of TSUS schedule 1, part 13, have been renumbered as notes 3 and 4, respectively, to this chapter.

2/ So long as there is no Part II to this schedule see Eighth Protocol of Supplementary Concessions to the General Agreement (Cuba and United States of America), Schedule XX, Part II, item 601 [first rate]. The footnote designations in note 5 to this chapter and this footnote will cease to be a part of this schedule on the effective date of Part II to this schedule.

	SECTION 2. - WOOD AND PAPER; PRINTED MATTER CHAPTER 1. - WOOD AND WOOD PRODUCTS Notes: 1. For the purposes of units D, E, and F of this chapter, hardboard shall be deemed to be wood. 2. For the purposes of the suspension of the application of the proviso to section 304(a)(3)(J) of the Tariff Act of 1930 (19 U.S.C. (1970) 1304(a)(3)(J)), and to the extent permitted by that section and as provided for in Schedule XX (Geneva 1947), sawed lumber and sawed timbers however provided for, telephone, trolley, electric-light, and telegraph poles of wood, and bundles of shingles, other than redcedar shingles, shall not be required to be marked to indicate the country of origin. Unit A. - Rough and Primary Wood Products; Wood Waste Notes: 1. The term "wood waste", as used in this unit, means residual material other than firewood resulting from the processing of wood, including scraps, shavings, sawdust, veneer clippings, chipper rejects and similar small wood residues, and also larger or coarser solid types of residual wood such as slabs, edgings, cull pieces, and veneer log cores. 2. The provisions for wood products in items 200.60 (poles, piles, and posts), 200.65 (laths), 200.75 (fence pickets, palings, and rails), 200.80 (railroad ties), and 200.85 (shingles and shakes) cover such products whether or not they have been treated with creosote or other wood preservatives.

Unit B. - Lumber, Flooring, and Moldings

Notes:

1. This unit covers lumber, wood siding, wood flooring, wood moldings, and certain wood carvings and ornaments, including such products when they have been drilled or treated.

2. For the purposes of this chapter, the following terms have the meanings hereby assigned to them:

(a) Lumber: A product of a sawmill or sawmill and planing mill derived from a log by lengthwise sawing which, in its original sawed condition, has at least 2 approximately parallel flat longitudinal sawed surfaces, and which may be rough, dressed, or worked, as set forth below:

(i) rough lumber is lumber just as it comes from the saw, whether in the original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes;

(ii) dressed lumber is lumber which has been dressed or surfaced by planing on at least one edge or face; and

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(iii) worked lumber is lumber which has been matched (provided with a tongued-and-grooved joint at the edges or ends), shiplapped (provided with a rabbeted or lapped joint at the edges), or patterned (shaped at the edges or on the faces to a patterned or molded form) on a matching machine, sticker, or molder. Edge-glued or end-glued wood over 6 feet in length and not over 15 inches in width shall be classified as lumber if such wood as a solid piece without glue joints would be deemed to be lumber as defined above. (b) Softwood: Wood from trees of coniferous species (order Coniferae). (c) Hardwood: Wood from trees of non-coniferous species. (d) Drilled or treated: Drilled at intervals for nails, screws, or bolts, sanded or otherwise surface processed in lieu of, or in addition to, planing or working, or treated with creosote or other wood preservatives, or with fillers, sealers, waxes, oils, stains, varnishes, paints, or enamels, but not including anti-stain or other temporary applications mentioned in note 4 of this unit. (e) Standard wood moldings: Wood moldings worked to a pattern and having the same profile in cross section throughout their length. 3. Lumber, including certain flooring provided for in this unit, is dutiable on the basis of "board measure" for which the unit of measurement is the board foot. For the purposes of this unit, a board foot is the quantity of lumber contained in, or derived (by drying, dressing, or working, or any combination of these processes) from, a piece of rough green lumber 1 inch in thickness, 12 inches in width, and 1 foot in length, or the equivalent of such piece in other dimensions.		

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	4. The treatment of lumber or other products provided for in this unit with anti-stain or other temporary applications which serve only for the purpose of maintaining the products in their rough, dressed, or worked condition until installation or further manufacture shall not affect their classification under any of the provisions of this unit.

	CHAPTER 3. - WOOD VENEERS, PLYWOOD AND OTHER WOOD-VENEER ASSEMBLIES, AND BUILDING BOARDS		
	Notes:		
	1. For the purposes of this chapter, the following terms have the meanings hereby assigned to them:		
	(a) Wood veneers: Wood sheets or strips, regardless of thickness, quality or intended use, produced by the slicing or rotary cutting of logs or flitches; and wood sheets, not over 1/4 inch in thickness, produced by sawing and of a type used to overlay inferior material;		
	(b) Plywood: Rigid wood-veneer assemblies bonded together with adhesive substances having a central ply or core of wood veneer or lumber with one or more plies of wood veneer on each side thereof, the grain of at least one ply being at an angle (usually a right angle) with the grain of one or more of the other plies, including such assemblies the face ply (or plies) of which has been mechanically scored, striated, or similarly processed;		
	(c) Wood-veneer panels: Rigid wood-veneer assemblies, bonded together with adhesive substances, except plywood, with a wood-veneer ply on one side of a backing, or on both sides of a core, which backing or core may be composed of lumber, veneer, hardboard, wood particle board, or other material, including such assemblies the face ply (or plies) of which has been mechanically scored, striated, or similarly processed;		
	(d) Cellular panels: Rigid assemblies bonded together with adhesive substances with both sides or faces consisting of veneer, plywood, lumber, wood-veneer panels, hardboard, wood particle board, or other board composed of vegetable fibers, and with a core of hollow, honeycomb, or sponge-like construction, whether or not the interstices are filled with loose or loosely matted fibrous materials; and

	Notes:		
	1. Except for decalcomanias, labels, flaps, and bands, all of which are covered by the provisions therefor in this chapter, regardless of the nature of the printing thereon, this chapter covers only printed matter consisting essentially of textual or pictorial matter produced by any printing process, and similar matter in manuscript or typewritten form. The text may be set forth in any language by means of any kind of characters. With the exceptions above indicated, this chapter does not cover any article in which printing is merely incidental to the primary use of the article or in which printing is employed mainly for coloration or to produce a decorative or novelty effect (see chapter 4 of this section).		
	2. For the purposes of this chapter -- (a) the term "paper" includes paperboard; (b) the term "books" includes books, bound and not bound, and pamphlets; (c) the term "periodicals" embraces only paper-covered or unbound publications issued regularly at stated periods, such as weekly, monthly, or quarterly, and bearing the date of issue; and (d) the term "photographs" embraces only pictures other than motion pictures, produced on photosensitive materials, and includes positive and negative images on exposed, or exposed and developed, photographic film.		
	3. For the purpose of determining the classification of printed matter produced in whole or in part by a lithographic process, the thickness of such printed matter is that of the thinnest paper contained therein, except that the thickness of a permanently mounted lithograph is the combined thickness of the lithograph and its mounting.

	SECTION 3. - TEXTILE FIBERS AND TEXTILE PRODUCTS		
	Notes:		
	1. This section does not cover -- (i) articles of unspun fibrous vegetable materials (see chapter 2B of section 2); (ii) asbestos fibers, or yarns, fabrics, or other articles containing asbestos in significant amounts, i.e., articles in which asbestos is used in sufficient amounts to impart its peculiar characteristics or properties to the article (see chapter 1F of section 5); (iii) wire, or wire cordage, screen, fencing, or other wire products (see chapters 2 and 3B of section 6); or (iv) footwear, headwear, gloves, handbags, pillows, mattresses, and other articles of textile materials provided for in section 7.		
	2. For the purposes of this schedule -- (a) the term "textile materials" means -- (i) the fibers (cotton, other vegetable fibers, wool and hair, silk, and man-made fibers) provided for in chapter 1 of this section, (ii) the yarn intermediates and the yarns provided for in chapter 1 and chapter 4 (elastic yarns) of this section, (iii) the cordage provided for in chapter 2 and chapter 4 (elastic cordage) of this section, (iv) the fabrics provided for in chapter 3 and chapter 4 of this section, (v) braids, as defined in note 2(f), infra, and (vi) except as provided by note 5, articles produced from any of the foregoing products;		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(b) the term "colored", as used in connection with textile materials or textile articles, means that they have been subjected to a process such as, but not limited to, dyeing, staining, painting, printing, or stenciling, in which color is imparted at any stage of manufacture to all or part of the fiber, yarn, fabric, or other textile article, except identification yarns and except marking in or on selvages; (c) the term "wool", except as used in chapter 1C of this section, means wool or hair of the types covered by the said chapter 1C of this section, or any combinations thereof; (d) the term "knit" means knit or crocheted; (e) the term "yarns" includes threads, but does not include elastic yarns or any braids; (f) the term "braids", as used in connection with textile materials or textile articles, includes all braids in the piece, whether of flat, tubular, or other construction, with or without cores, and whether braided from fibers, filaments (including tinsel wire and lame), yarns, cordage, textile fabrics, or any combination thereof; (g) the term "burnt-out lace" means embroidery in which the base or ground (whether fabric, paper, or other material), having been removed chemically or by other means, is not visible; and (h) a "lace" article or a "net" article is an article which (exclusive of any added ornamentation) is wholly or almost wholly of lace, including burnt-out lace, or wholly or almost wholly of net, whether the lace or net preexisted or was formed in the process of producing the article. 3. For the purposes of this schedule -- (a) the term "ornamented", as used with reference to textile fabrics and other articles of textile materials, means fabrics and other articles of textile materials which are ornamented with -- (i) fibers, filaments (including tinsel wire and lame), yarns, or cordage, any of the foregoing introduced as needlework or otherwise, including --		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(A) embroidery, and pile or tufting, whether wholly cut, partly cut, or not cut, and (B) other types of ornamentation, but not including functional stitching or one row of straight hemstitching adjoining a hem; (ii) burnt-out lace; (iii) lace, netting, braid, fringe, edging, tucking, or trimming, or textile fabric; (iv) applique and replique work, beads, bugles, spangles, bullions, or ornaments; or (v) any combination of the foregoing types or methods of ornamentation; (b) ornamentation of the types or methods covered hereby consists of ornamenting work done to a pre-existing textile fabric, whether the ornamentation was applied to such fabric -- (i) when it was in the piece, (ii) after it had been made or cut to a size for particular furnishing, wearing apparel, or other article, or (iii) after it had actually been incorporated into another article, and if such textile fabric remains visible, at least in significant part, after ornamentation: Provided, That lace, netting, braid, fringe, edging, tucking, trimming or ornament shall not be required to have had a separate existence from the fabric or other article on which it appears in order to constitute ornamentation for the purposes of this note; and (c) applique work, beads, bugles, spangles, bullions, and other forms of nontextile ornamentation applied to a textile fabric or other article of textile materials shall be disregarded in determining the component material of chief value of such fabric or other article. 4. For the purposes of this schedule -- (a) Except as specifically provided otherwise, in determining the yarn count of fabrics, the warp and filling yarns, whether plied or not, shall be counted as they occur in the fabric.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(b) In determining the component fibers of chief value in coated or filled, or laminated, fabrics and articles wholly or in part thereof, the coating or filling, or the nontextile laminating substances, shall be disregarded in the absence of context to the contrary. 5. For the purposes of chapters 5, 6, and 7 of this section and chapters 1 (except unit A), 4, and 12 of section 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in chapter 4C of this section), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer surface of such article or the only exposed surface of such fabric. [6. (a) If the rate of duty applicable to wool provided for in item 306.31 is at any time increased or decreased, the specific part of the compound rate of duty (hereinafter referred to as the compensatory part thereof) applicable to articles provided for in each item listed in paragraph (e) of this note, and so much of each specific rate applicable to articles provided for in each item listed in paragraph (f) of this note as is therein designated as the compensatory part thereof, shall, subject to the provisions of paragraphs (b) through (d) of this note, be increased or decreased in the same proportion as such rate applicable to wool provided for in item 306.31 is increased or decreased. (b) The maximum and minimum levels to which the compensatory part of a rate may be increased or decreased pursuant to paragraph (a) of this note shall be 50 percent above such compensatory part "existing on July 1, 1934", or 50 percent below such part "existing on July 1, 1962", respectively, as such terms are applied for purposes of section 201(b) of the Trade Expansion Act of 1962 (19 U.S.C. (1964) 1821).		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975

(c) Any specific part of a compound rate or any specific rate modified pursuant to paragraph (a) of this note may be rounded, by not exceeding 0.5 cent, to a whole number of cents.

(d) A rate increase or decrease pursuant to this note shall be proclaimed by the President effective on the day on which the modified rate becomes applicable to the wool provided for in item 306.31 or, with or without staging, as soon thereafter as the President determines to be practicable under United States law, but in no event later than 4 years after such modified rate becomes applicable, and shall remain in effect thereafter so long as such modified rate is applicable.

(e) The items containing the compound rates referred to in paragraph (a) of this note are:

	7. With respect to fabrics provided for in chapter 3 (other than fabrics valued over $2 per pound provided for in item 337.50) and in chapter 4 of this section, provisions for fabrics in chief value of wool shall also apply to fabrics in chief weight of wool (whether or not in chief value of wool). For the purposes of the preceding sentence, a fabric is in chief weight of wool if the weight of the wool component is greater than the weight of each other textile component (i.e., cotton, vegetable fibers except cotton, silk, man-made fibers, or other textile materials) of the fabric.

	CHAPTER 1. - TEXTILE FIBERS AND WASTES; YARNS AND THREADS		
	Notes:		
	1. For the purposes of this chapter -- (a) the term "waste" means all fiber, yarn, and thread wastes, including wastes obtained in the production of continuous and noncontinuous fibers, yarns, and threads, such as gin motes, scutcher waste (including tow), picker waste, card waste, top waste, comber waste (including noils), hackling waste (including tow), sliver waste, roving waste, ring waste, throwster (twister or plyer) waste, fly, sweepings, and willowed wastes, and including fiber, yarn, and thread wastes obtained in the production of other textile products (i.e., products other than fibers, yarns, or threads) or otherwise obtained; and (b) the term "advanced waste" means any of the above-mentioned wastes which have been cleaned, bleached, colored, or otherwise advanced, and includes fibers recovered by cleaning (except willowing), degumming, carbonizing, cutting, pickering, garnetting or similar processes from any of the above-mentioned wastes or from textile clippings or articles, new or used, whether or not such fibers or the wastes from which recovered have also been otherwise advanced, but does not include fibers which have been carded, combed, or similarly processed, or reuseable yarns or threads.		
	2. Rags and scrap cordage are covered in chapter 70 of this section.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	Unit A. - Cotton		
	Notes:		
	1. The term "number", as applied to yarns in this unit, means the number of 840-yard hanks of yarn in 1 pound. To determine the number of any yarn, whether single or plied, the actual yards per pound shall be divided by 840 and the quotient thereof multiplied by the number of plies in such yarn. Fractions in the resulting yarn number shall be disregarded.		
	2. In this unit, each of the rates of duty provided for yarns, wholly of cotton, not bleached, mercerized, colored, combed or plied (items 301.01 through 301.93, inclusive) is also the "base rate" for yarn of the same number covered by item 302.--. For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 302.28" would be the citation for bleached, mercerized, colored, combed, or plied yarns, wholly of cotton, of number 28.		
	3. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.		
	4. The United States reserves the right to modify or suspend the provisions of item 300.15 during any period when there is no limitation on the quantity of cotton provided for therein that may be imported into the United States. 1/

	Unit C. - Wool and Related Animal Hair		
	Notes:		
	1. For the purposes of this unit -- (a) the term "hair" is limited to hair of the camel, and to hair of the alpaca, cashmere goat, angora goat, and like hair of other animals including the llama, the vicuna, and the angora rabbit; (b) the term "clean lb." in the rate columns means pound of clean yield; (c) the term "clean yield", in the foregoing note, means the absolute clean content (i.e., all that portion of the merchandise which consists exclusively of wool or hair free of all vegetable and other foreign material, containing by weight 12 percent of moisture and 1.5 percent of material removable from the wool or hair by extraction with alcohol, and having an ash content of not over 0.5 percent by weight), less an allowance, equal by weight to 0.5 percent of the absolute clean content plus 60 percent of the vegetable matter present, but not exceeding 15 percent by weight of the absolute clean content, for wool or hair that would ordinarily be lost during commercial cleaning operations; (d) wool or hair "on the skin" includes all skins or skin pieces from which wool or hair is commercially recoverable by any process (except wool or hair on the

	skin provided for in chapter 5B of section 1; except wool or hair on the skin which has been cleaned otherwise than by shaking, willowing, burr-picking, or washing with water only; and except tanned-skin scrap); (e) wool or hair "in the grease" is wool or hair in its natural condition as separated from the animal or skin, whether or not cleaned by shaking, willowing, or burr-picking, but not otherwise cleaned; (f) "washed" wool or hair is wool or hair, not on the skin, that has been washed, with water only, while on the animal's back or on the skin, whether or not cleaned by shaking, willowing, or burr-picking, but not otherwise cleaned; (g) "scoured" wool or hair is wool or hair, whether or not on the skin, (except wool or hair in the grease or washed) that has been cleaned by any process other than shaking, willowing, burr-picking, washing with water only, or carbonizing; (h) "carbonized" wool or hair is wool or hair whether or not on the skin that has been cleaned by carbonizing in lieu of, or in addition to, any other cleaning process, whether or not neutralized or neutralized and dusted; and (i) "sorted" wool or hair is wool or hair separated from each individual fleece according to length, soundness, elasticity, fineness, color, or other properties, but does not include a skirted fleece unless the back has been removed, and does not include skirtings. 2. The standards for determining grades of wool shall be those which are established from time to time by the Secretary of Agriculture pursuant to law and which are in effect on the date of importation of the wool. 3. For the purposes of item 307.40 -- (a) the classification provisions for wool not finer than 40s shall apply to any package of wool containing not over 10 percent by weight of wool finer than 40s but not containing wool finer than 44s;		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(b) the classification provisions for wool finer than 40s but not finer than 44s shall apply to any package of wool containing not over 10 percent by weight of wool finer than 44s but not containing wool finer than 46s; and (c) the citation for imports classifiable under this item shall be such item number followed by the item number for the part of the contents of the package which determines the rate of duty. 4. For the purposes of item 306.00 -- (a) a tolerance of not more than 10 percent of wools other than Karakul not finer than 44s may be allowed in each bale or package of wools imported as not finer than 40s, and a tolerance of not more than 10 percent of wools not finer than 48s may be allowed in each bale or package of wools imported as not finer than 46s; (b) wool or hair shall not be released from customs custody unless the dealer, manufacturer, or processor files a bond to insure that any wool or hair entered thereunder shall be used only in the manufacture of the articles enumerated in the said item; (c) a dealer, manufacturer, or processor may be relieved of liability under his bond with respect to any wool or hair entered under item 306.00 which is transferred in its imported or any other form to another dealer, manufacturer, or processor who has filed a bond to insure that the merchandise so transferred shall be used only in the manufacture of the articles enumerated in item 306.00; and (d) the Secretary of the Treasury may prescribe such regulations and the amounts, conditions, and forms of such bonds as may be necessary to carry into effect the provisions of item 306.00. 5. For the purposes of items 306.01, 306.02, 306.03, and 306.04, when wool or hair entered as provided for in item 306.00 is used, or transferred for use, otherwise than in the manufacture of the articles enumerated therein --		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(a) the duties shall be paid by the dealer, manufacturer, or processor whose bond is charged with the wool or hair at the time of such use or transfer for such use, but such duties shall not be levied or collected on any merchandise which is destroyed or exported; (b) if prior to such use or transfer for such use there shall have been combined or mixed with such wool or hair any other merchandise, the whole of the combination or mixture shall be regarded as being composed of wool or hair entered under item 306.00 unless the dealer, manufacturer, or processor liable for the payment of the duties shall establish the quantity of bonded wool or hair in such combination or mixture; (c) every dealer, manufacturer, or processor who has given a bond pursuant to the provisions of item 306.00 shall report any transfer or use of merchandise contrary to the terms of his bond, within 30 days after such transfer or use, to the collector of customs in whose district the bond is filed, and for failure to so report such dealer, manufacturer, or processor shall be liable to a penalty (in addition to the duties provided for) equal to the value of the merchandise so transferred or used at the time and place of such transfer or use; and (d) the clean yield of any wool or hair provided for in item 306.04 shall be deemed to be 100 percent, unless the actual clean yield, as defined in note 1(c), supra, has been determined by suitable tests, and such use, or transfer for use, occurs not later than 3 years after the date of entry of such wool or hair. 6. The Secretary of the Treasury shall prescribe methods and regulations for carrying out the provisions of this section relating to the duties on wool or hair. The Secretary of the Treasury shall further procure from the Secretary of Agriculture, and deposit in such customhouses and other places in the United States or elsewhere as he may designate, sets of the Official Standards of the United States for grades of wool. He may further display, in the customhouses of the United States, or elsewhere, numbered, but not otherwise identified, samples of imported wool or hair, to which are attached data as to clean yield and other pertinent facts, for the information of the trade and of customs officers.

	Unit E. - Man-made Fibers		
	Notes:		
	1. The provisions of this unit do not cover -- (i) metal filaments, strips, or fibers; (ii) paper filaments, strips, or fibers; (iii) natural rubber filaments, strips, or fibers; (iv) synthetic rubber strips (in continuous or noncontinuous form); (v) nonmetallic mineral filaments, strips, or fibers, except as set forth in 2(c) infra; (vi) sterile surgical sutures and suture materials, provided for in chapter 13C of section 4; (vii) strings for musical instruments (see chapter 3B of section 7); (viii) fishing line put up and packaged for retail sale (see chapter 5B of section 7); (ix) racket strings put up and packaged for retail sale (see chapter 5D of section 7); or (x) brush bristles provided for in chapter 12C of section 7.		
	2. (a) For the purposes of this schedule, the term "man-made fibers" refers to the filaments, strips, and fibers covered in this unit. (b) Subject to the limitations set forth in notes 1 and 3 of this unit, the respective provisions in this unit for filaments, strips, and fibers cover such articles whether they are formed by extrusion or by other processes from substances derived by man from cellulosic or noncellulosic materials by chemical processes, such as, but not limited to, polymerization and condensation.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(c) The provisions of this unit applicable to grouped filaments and fibers include grouped glass filaments and glass fibers produced therefrom, suitable for the manufacture of yarns, cordage, or woven fabrics. For the purposes of the provisions of this schedule applicable to articles of man-made fibers, glass filaments and glass fibers shall be treated as man-made fibers only if they have been made into yarns or cordage, or if they are present in fabrics or other articles in the form of yarns or cordage.		
	3. For the purposes of this unit --		
	(a) the term "filaments" embraces monofilaments, plexiform filaments, and grouped filaments, however produced;		
	(b) the term "monofilaments" embraces single filaments (including single filaments of laminated construction or produced from two or more filaments fused or bonded together), whether solid or hollow, whether flat, oval, round, or of any other cross-sectional configuration, which are not over 0.06 inch in maximum cross-sectional dimension;		
	(c) the term "plexiform filaments" embraces flexible filaments each of which consists of a network or plexus of fine fibers and which are suitable for the manufacture of textiles;		
	(d) the term "strips" embraces strips (including strips of laminated construction), whether or not folded lengthwise, twisted, or crimped, which in unfolded, untwisted, and uncrimped condition are over 0.06 inch but not over one inch in width and are not over 0.01 inch in thickness;		
	(e) the term "grouped filaments and strips" embraces two or more filaments or strips, as defined in (a), (b), (c), and (d) of this note, grouped together with the filaments or strips substantially parallel and not twisted, but the term does not include grouped filaments which have been subjected to processes such as twisting and untwisting, false twisting, crimping, and curling, and which are useable as yarns;		

Item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(f) the term "fibers" includes filaments and strips, as defined above, in noncontinuous form, and any other fibrous structure suitable for the manufacture of textiles;		
	(g) the term "in continuous form", as used with reference to filaments and strips, refers to such articles when over 30 inches in length;		
	(h) the term "in noncontinuous form", as used with reference to filaments and strips, means such articles when 30 inches or less in length; and		
	(i) the term "denier" means the weight in grams for a length of 9,000 meters.

CHAPTER 2. - CORDAGE		
Note:		
1. For the purposes of this chapter -- (a) the term "cordage" means assemblages of textile fibers or yarns, in approximately cylindrical form and of continuous length, whether or not bleached, colored, or treated, designed and chiefly used as an end product, and comprising cable, rope, cord, and twine, but the term does not include -- (i) yarns (see chapter 1 of this section, or (ii) braids or elastic articles (see chapter 4A of this section and chapter 1B of section 7); (b) cordage "of stranded construction" is cordage composed of 3 or more strands composed of 2 or more yarns each, whether or not containing a core; (c) the term "hard (leaf) fibers" means fibers obtained from the leaf or leaf stems of monocotyledonous plants (e.g., abaca, sisal, and henequen); (d) the term "bleached, colored, or treated" means that the condition of the cordage or any of its constituent fibers or yarns has been affected by bleaching or coloring processes; by surface treatments such as polishing, glazing, coating, or filling; or by the application of grease or other nonfibrous substances (except oil) for any purpose, including rendering the cordage more able to withstand or repel fire, insects, rodents, mildew or rot; (e) the term "binder twine and baler twine" (item 315.20) means a single-ply twine measuring over 150 but not over 750 feet per pound, containing 8 percent or more by weight of added nonfibrous substances such as oil, grease, or repellents, and chiefly used with harvesting machines or baling machines for binding or tying of grains or for baling hay, straw, and other fodder or bedding materials.

	CHAPTER 3. - WOVEN FABRICS		
	Note:		
	1. This chapter covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include --		
	(i) any woven fabrics which are specially provided for in the provisions of chapter 4 of this section;		
	(ii) certain wool fabric samples (see chapter 7A of this section); or		
	(iii) woven fabrics in item 740.10 of chapter 78 of section 7.		
	Unit A. - Woven Fabrics, of Cotton		
	Notes:		
	1. (a) In the ascertainment of the condition of the fabrics or yarns upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.		
	(b) The term "number", as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any plied yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:		

Item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	$N = \frac{BYT}{340}$, or $\frac{2YT}{35Z'}$, or $\frac{2BT}{105Z}$, or $\frac{3ST}{70}$ when: N is the average yarn number, B is the breadth (width) of the fabric in inches, Y is the yards (linear) of the fabric per pound, T is the total single yarns per square inch, S is the square yards of fabric per pound, Z is the ounces per linear yard of fabric, and Z' is the ounces per square yard of fabric. 2. In this unit, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 319.21 through 319.25 and items 320.01 through 320.98, both inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 319.27 and 319.29, and by items 321.-- through 331.--, inclusive, respectively. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored. 3. The term "fancy or figured", as used in this unit in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods. 4. With respect only to the fabrics provided for in items 319.21 through 319.25 and 320.01 through 320.98, none of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, shall be less than the equivalent of -- (i) 0.17 cent per number per pound for items 320.01 through 320.98; and (ii) 0.22 cent per number per pound for items 319.21 through 319.25.

	CHAPTER 4. - FABRICS OF SPECIAL CONSTRUCTION OR FOR SPECIAL PURPOSES; ARTICLES OF WADDING OR FELT; FISH NETS; MACHINE CLOTHING		
	Note:		
	1. This chapter covers certain textile fabrics and, in addition, certain other textile products. The provisions of unit B of this chapter and the provisions for "fish netting and fishing nets" in unit C hereof do not cover gauze and leno-woven fabrics. Woven textile fabrics not specially provided for in this chapter are provided for in chapter 3 of this section		
	Unit A. - Knit, Pile, Tufted, and Narrow Fabrics; Braids, and Elastic Fabrics		
	Notes:		
	1. This unit provides for the named fabrics, braids, and elastic materials, when in the piece only. Any fabric described in this unit and also in unit B or C of this chapter is classifiable in the said unit B or C. This unit does not cover --		
	(i) braids suitable for making or ornamenting headwear (see chapter 1B section 7); or		
	(ii) rubber or plastics filaments (see chapter 1E of section 3 and chapter 12B of section 7).		
	2. For the purposes of this schedule --		
	(a) the term "narrow fabrics" means		
	(i) woven or knit fabrics, not over 12 inches in width, with fast edges (that is, with both edges made or treated to prevent the fabric from unraveling, by means of selvages, stitching, gumming, fusing, or simple hemming); or		

Item from member	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(ii) seamless woven or knit tubings which, when flattened, are not over 12 inches in width; or (iii) bias binding consisting of strips, not over 12 inches in width, cut on the bias from woven or knit fabrics and folded and creased on the edges;		
	(b) the term "elastic", as used to describe yarns, cordage, braids, and fabrics, means that such articles possess elasticity which is attributable in whole or in part to rubber.		
	3. Any article described in more than one superior heading of this unit is classifiable under the last such heading in which it is described.

	Notes:			
	1. The term "rags", as used in this unit, covers new fabric clippings, and fabrics, wearing apparel, furnishings, and other textile articles which are worn out, soiled, torn, or otherwise damaged, all the foregoing, whether or not carbonized, fit only -- (i) for the recovery of their constituent fibers or materials, (ii) for use in paper making, (iii) for manufacture into polishing wheels and similar articles, (iv) for use as wiping rags of any size, or (v) for similar uses.			
	2. Any shipment of rags which has not exceeded 5 percent by weight of yarn wastes commingled therewith shall be treated as if it were entirely rags (see item 307.40 in chapter 1C of section 3).

	SECTION 4. - CHEMICALS AND RELATED PRODUCTS		
	Notes:		
	1. This section does not include -- (i) any of the mineral products provided for in section 5; (ii) metal-bearing ores and other metal-bearing materials, provided for in chapter 1 of section 6; or (iii) metals provided for in chapter 2 of section 6.		
	2. (a) The term "compounds", as used in this section, means substances occurring naturally or produced artificially by the reaction of two or more ingredients, each compound -- (i) consisting of two or more elements, (ii) having its own characteristic properties different from those of its elements and from those of other compounds, and (iii) always consisting of the same elements united in the same proportions by weight with the same internal arrangement. The presence of impurities which occur naturally or as incident to production does not in itself affect the classification of a product as a compound. (b) The term "compounds", as used in this section, includes a solution of a single compound in water, and, in determining the amount of duty on any such compound subject to duty in this section at a specific rate, an allowance in weight or volume, as the case may be, shall be made for the water in excess of any water of crystallization which may have been in the compound.		
	3. (a) The term "mixtures", as used in this section, means substances consisting of two or more ingredients (i.e., elements or compounds), whether occurring as such in nature, or whether artificially produced (i.e., brought about by mechanical, physical, or chemical means), which do not bear a fixed ratio to one another and which, however thoroughly commingled,		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	retain their individual chemical properties and are not chemically united. The fact that the ingredients of a product are incapable of separation or have been commingled in definite proportions does not in itself affect the classification of such product as a mixture. (b) The term "mixtures", as used in this section, includes solutions, except solutions defined as compounds in note 2(b) of this section.

	CHAPTER 1. - BENZENOID CHEMICALS AND PRODUCTS		
	Notes:		
	1. Except as specifically set forth in the notes to other chapters of this section, all products described in this chapter shall be classified hereunder even if more specifically described elsewhere in this section. Any product described in both units B and C of this chapter shall be classified in unit C.		
	2. For the purposes of this chapter, the term "modified benzenoid" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified benzenoid rings present.		
	3. With the exception of the natural products provided for in unit C, this chapter does not cover cyclic organic chemical products (such as, but not limited to, tannic, gallic and pyrogallic acids; estrone, estradiol, and corticosteroids; morphine, ergot, and cinchona alkaloids; rotenone; phenylalanine; tyrosine; epinephrine; and thymols) having a benzenoid, quinoid, or modified benzenoid structure, which are produced from animal or vegetable products in which such structure occurs naturally, unless such cyclic organic chemical products were obtained, derived, or manufactured in part from any product provided for in unit A, B or C of this chapter.		

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	[illegible] The ad valorem rates provided in this chapter shall be based upon the American selling price, as defined in section 402 or 402a of the Tariff Act of 1930 (19 U.S.C. (1970) 1401a, 1402), of any similar competitive article manufactured or produced in the United States. If there is no similar competitive article manufactured or produced in the United States then the ad valorem rate shall be based upon the United States value, as defined in the said section 402 or 402a.	1/		
	5. For the purposes of this chapter, any product provided for in this chapter shall be considered similar to, or competitive with, any imported product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner.

	Unit B. - Industrial Organic Chemicals		
	Notes:		
	1. The provisions of items 402.00 to 406.61, inclusive, in this unit shall apply not only to the products described therein when obtained, derived, or manufactured in whole or in part from products described in unit A of this chapter, but shall also apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in said unit A.		
	2. For the purpose of classification of merchandise provided for under items 402.36 to 406.61, inclusive, the following provisions shall govern:		
	(a) The term "derivatives" refers to only those derivatives which may be obtained by one or more of the following processes: Halogenation, nitration, nitrosation, or sulfonation, and is to be understood to include sulfonyl halides.		
	(b) A compound with functional groups described in two or more subclasses under items 402.36 to 406.61, inclusive, is to be classified in the latest applicable subclass. For example, 4-acetamido-2-amino-phenol, which contains three functional groups, will be classified in 405.12 (Amides), rather than in 404.92 to 405.08, inclusive (Aminophenols), or in 404.84 and 404.88 (Amines), or in 403.49 (Phenols). When applicable, classification should be made in accordance with the following principles:		
	(i) Salts of organic acids (including phenols) with inorganic bases and salts of organic bases with inorganic acids are to be classified under same superior heading as the organic acid or base; salts of organic acids with organic bases are to be classified either under the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free base, whichever is listed later.		

Tariff item number	Description of products	Offer rate	Converted rate of duty 1/
	(ii) Esters of organic acids are to be classified either under the superior heading which describes the functional groups present in the free acid or under the one which describes the functional groups present in the free alcohol or phenol, whichever is listed later.		
	(iii) The above provisions apply also in cases where the component having the functional groups described under the later superior heading is not of benzenoid origin. For example, benzyl acetate is classified under carboxylic acids (404.24 to 404.46, inclusive) rather than under alcohols (403.45).		
	Cyclic organic chemical products in any physical form having a benzenoid, quinoid, or modified benzenoid structure, not provided for in unit A or C of this chapter:

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	Unit C. - Finished Organic Chemical Products Notes: 1. The provisions of this unit providing for products obtained, derived, or manufactured in whole or in part from products described in unit A or B of this chapter shall also apply to products of like chemical composition having a benzenoid, quinoid, or modified benzenoid structure artificially produced by synthesis, whether or not obtained, derived, or manufactured in whole or in part from products described in the said unit A or B. 2. The term "pesticides" in items 408.16 to 408.36, inclusive, means products, such as insecticides, rodenticides, fungicides, herbicides, fumigants, and seed disinfectants, chiefly used to destroy undesired animal or plant life. 3. The term "plastics materials" in items 408.44 to 409.18, inclusive, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which plasticizers, fillers, colors, or extenders may have been added. The term includes, but is not limited to, phenolic and other tar-acid resins, styrene resins, alkyd and polyester resins based on phthalic anhydride, coumarone-indene resins, urethane, epoxy, toluene sulfonamide, maleic, fumaric, aniline, and polyamide resins, and other synthetic resins. The plastic materials may be in solid, semi-solid, or liquid condition, such as flakes, powders, pellets, granules, solutions, emulsions, and other basic forms not further processed. 4. The term "plasticizers" in item 409.34 means substances which may be incorporated into a material (usually a plastic, resin material, or an elastomer) to increase its softness, flexibility, workability, or distensibility.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	5. The term "drugs" in this unit means those substances having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines. 6. For the purposes of the provisions of this unit relating to "Colors, dyes, stains, and related products" (except products provided for in items 410.36 to 410.44, inclusive) -- (a) the specific duties shall be based on standards of strength which shall be established by the Secretary of the Treasury, and upon all importations of such articles which exceed such standards of strength the specific duty shall be computed on the weight which the article would have if it were diluted to the standard strength, but in no case shall any such articles of whatever strength be subject to a less specific duty than that provided in the respective items of this unit; (b) in the enforcement of the foregoing provisions of this note the Secretary of the Treasury shall adopt a standard of strength for each dye or other product which shall conform as nearly as practicable to the commercial strength in ordinary use in the United States prior to July 1, 1914. If a dye or other product has been introduced into commercial use since said date then the standard of strength for such dye or other product shall conform as nearly as practicable to the commercial strength in ordinary use. If a dye or other product was or is ordinarily used in more than one commercial strength, then the lowest commercial strength shall be adopted as the standard of strength for such dye or other product. 1/ 7. For the purpose of the classification of merchandise provided for under items 408.44 to 409.18, inclusive, the following provisions shall apply:		

1/ Headnote 6(b) and (c) of TSUS schedule 4, part 1C, are omitted. Headnote 6(d) of TSUS schedule 4, part 1C, is renumbered as note 6(b) to this unit.

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(a) The term "thermoplastic resins" means those materials in unfinished forms which in their final state as finished articles are capable of being repeatedly softened by increase of temperature and hardened by decrease of temperature. (b) The term "thermosetting resins" (or thermosets) means those materials in unfinished forms which in their final state as finished articles are substantially infusible. Thermosetting resins are often liquids at some stage in their manufacture or processing and are cured by heat, catalysis, or other chemical means. After being fully cured, thermosets cannot be resoftened by heat. (c) Copolymers and terpolymers not specially provided for shall be classified as if they consisted entirely of that monomer which is present in the largest amount by weight on a resin content basis (i.e., excluding the weight of plasticizers, liquid diluents, fillers, or other additives). Any polymer consisting of two or more monomers which are present in equal amounts shall be classified as if it consisted entirely of that monomer whose polymer is listed first under the thermoplastic or thermosetting resins, as appropriate. 8. Any product described in two or more of the subclasses under items 411.32 to 412.68, inclusive, is to be classified in the first applicable subclass. 9. For the purposes of this unit -- (a) The term "surface-active agents", means synthetic organic chemical compounds, or mixtures thereof, which function as surface tension modifiers and are chiefly used for any one or combination of the following purposes: as detergents, wetting agents, emulsifiers, dispersants, or foaming agents. (b) The term "synthetic detergents" embraces formulated materials which are used chiefly for household, laundry, and industrial cleaning purposes, and which consist of one or more surface-active agents as the active ingredients in combination with colors, brighteners, perfumes, inert diluents, builders, and extenders such as inorganic salts, polyphosphates, polysilicates or sodium carboxymethylcellulose.

	CHAPTER 2. - CHEMICAL ELEMENTS, INORGANIC AND ORGANIC COMPOUNDS, AND MIXTURES			
	Notes:			
	1. This chapter covers chemicals, except those provided for elsewhere in this section and those specially provided for in any of the other sections.			
	2. For the purpose of this chapter, inorganic compounds (including salts) are compounds not containing carbon, except carbides and such carbon-containing compounds as inorganic cyanides and cyanates, metallic carbonates, and oxides of carbon which are inorganic in nature.			
	3. For the purpose of this chapter, organic compounds are compounds containing carbon except such carbon-containing compounds as carbides, inorganic cyanides and cyanates, metallic carbonates, and oxides of carbon.

	Unit C. - Inorganic Chemical Compounds			
	Note:			
	1. This unit does not include any organic compounds. For the purposes of this unit, inorganic compounds containing only one kind of cation are classifiable according to the cation constituent as indicated in the alphabetical listing set forth in this unit; and inorganic compounds containing two or more different kinds of cations are classifiable according to the cation constituent thereof first named in the alphabetical listing in this unit. Inorganic compounds, having no cations or none of the cation constituents of which are named in this unit, are covered by the provision for other inorganic compounds (item 423.00).

	CHAPTER 3. - DRUGS AND RELATED PRODUCTS		
	Notes:		
	1. Any product described in this chapter which is a mixture containing as an ingredient any product described in chapter 1 of this section remains classifiable in chapter 3 unless the chapter 1 ingredient, as used in the mixture, imparts therapeutic or medicinal properties thereto. Notwithstanding the provisions of chapter 1 of this section, niacin, niacinamide, meso-inositol hexanicotinate, and pyridoxine (vitamin B_6), regardless of source, are classifiable in chapter 3 of this section.		
	2. For the purposes of this schedule, the term "drugs" means those substances, whether natural or synthetic, having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines.		
	3. For the purposes of this chapter -- (a) "natural substances" are those substances found in nature which comprise whole plants and herbs, anatomical parts thereof, vegetable saps, extracts, secretions and other constituents thereof; whole animals, anatomical parts thereof, glands or other animal organs, extracts, secretions and other constituents thereof, and which have not had changes made in their molecular structure as found in nature; (b) a "synthetic substance" is a chemical compound made by the artificial combination of elements or radicals by any physical or chemical process; (c) the term "crude", as used in relation to natural products, means any product which has not been advanced in value or improved in condition by shredding, grinding, chipping, crushing, distilling, evaporating, extracting, by artificial mixing with other substances or by any other process or treatment beyond that which is essential to its proper packing and the prevention of decay or deterioration pending manufacture; and

	(d) the term "advanced", as used in relation to natural products, means any product which has been advanced in value or improved in condition from its crude state by any mechanical or physical process whatever beyond that which is essential to its proper packing and the prevention of decay or deterioratibn pending manufacture, but does not include any product which has been artificially mixed with other substances or the molecular structure of which as found in nature has been changed.

	CHAPTER 4. - SYNTHETIC RESINS AND PLASTICS MATERIALS; RUBBER Unit A. - Synthetic Resins and Plastics Materials Notes: 1. This unit does not cover synthetic plastics materials provided for in chapter 40 of this section, but the addition of any product described in chapter 4 of this section to a synthetic plastics material described in this unit as an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer does not affect the classification of such synthetic plastics material in this unit. 2. The term "synthetic plastics materials", in this unit, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins, and cellulosic plastics materials. These synthetic plastics materials may be in solid, semisolid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.

	Unit B. - Rubber			
	Notes:			
	1. This unit covers all rubber whether or not obtained, derived, or manufactured in whole or in part from any product described in chapter 1 of this section.			
	2. For the purposes of this schedule, the term "rubber" means a substance, whether natural or synthetic, in bale, crumb, powder, latex, or other crude form, which can be vulcanized or otherwise cross-linked, and which after cross-linking can be stretched at 68° F to at least three times its original length and which, after having been stretched to twice its original length and the stress removed, returns within 5 minutes to less than 150 percent of its original length, and includes such substance whether or not containing fillers, extenders, pigments, or rubber-processing chemicals.

	CHAPTER 8. - SURFACE-ACTIVE AGENTS; SOAP AND SYNTHETIC DETERGENTS		
	Note:		
	1. This chapter covers surface-active agents, soaps, and synthetic detergents, except those provided for in items 405.30 and 405.35 of chapter 1C of this section. This chapter also covers certain specified products which may or may not be surface-active agents. The addition of any product described in chapter 1 of this section to these products as a color, brightener, germicide, deodorizer, whitener, or scent does not affect their classification under this chapter (8).		
	Unit A. - Surface-Active Agents		
	Note:		
	1. The term "surface-active agents", as used in item 465.95 means synthetic organic chemical compounds, or mixtures thereof, which function as surface tension modifiers and are chiefly used for any one or combination of the following purposes: As detergents, wetting agents, emulsifiers, dispersants, or foaming agents.

	1. Any product described in this chapter and also in chapter 1 of this section is classifiable under said chapter 1, except varnishes, inks, and artists', students', and children's pigments or paints.		
	Unit A. - Dyeing and Tanning Products		
	Notes:		
	1. This unit covers only materials, extracts, decoctions, and other preparations suitable for coloring (including dyeing and staining) or for tanning. All the products provided for are of vegetable origin except cochineal (item 970.05) which is of animal origin.		
	2. For the purposes of this unit -- (a) the term "crude or processed" means materials which are crude or which have been processed by shredding, grinding, chipping, crushing, or any similar process, but not otherwise processed; and (b) the term "cutch" refers to products obtained from the Acacia catechu or Areca catechu trees.

	Unit C. - Inks, Paints, and Related Products		
	Notes:		
	1. The provision in this unit for artists', students', and children's pigments and paints assembled into sets (item 474.08) covers only pigments and paints assembled in such container and form, and with such assortment of articles, as to be suitable for sale at retail to artists, students, or children as a paint set, kit, or color outfit.		
	2. The term "paints and enamel paints" in this unit covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; and the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other agents.		
	3. The term "varnishes" in this unit covers liquid surface-coating products which contain no pigments or pigmentlike materials, and which dry (harden) to a transparent or translucent film. Shellac varnishes are solutions of shellac or any other form of lac in a volatile solvent such as ethyl alcohol. Oleoresinous varnishes consist of resins dissolved in or reacted with a drying oil, to which thinners, driers, and plasticizers may be added. Cellulose-derivative varnishes (lacquers) are solutions of cellulose nitrate or other cellulose derivatives in a volatile solvent.

	CHAPTER 10. - PETROLEUM, NATURAL GAS, AND PRODUCTS DERIVED THEREFROM		
	Notes:		
	1. Any product described in this chapter and also in chapter 1 of this section is classifiable in said chapter 1, except fuel oils, motor fuel, and lubricating oils and greases, containing by weight not over 25 percent of any product described in said chapter 1. This chapter does not cover -- (i) paraffin and other petroleum waxes (see chapter 13B of this section), or (ii) petroleum asphalts (see chapter 1J of section 5).		
	2. For the purposes of this chapter -- (a) "Reconstituted crude petroleum" (items 475.05 and 475.10) is a product which is essentially the equivalent of crude petroleum and which is made by adding fuel oil, naphtha, or other petroleum fractions to crude or topped crude petroleum; and (b) "Motor fuel" (item 475.25) is any product derived primarily from petroleum, shale, or natural gas, whether or not containing additives, which is chiefly used as a fuel in internal-combustion or other engines.		
	3. For the purposes of items 475.65 and 475.70 of this chapter -- (a) a product is considered to be in liquid form if -- (i) the penetration is more than 350 units (35 millimeters) when tested by the procedure and equipment specified in American Society of Testing Materials (ASTM) Designation: D-5 with the use of a 50-gram load for 1 second at 77° F, or when tested by a procedure which provides equivalent results, and

	(ii) such product is not in an essentially gaseous state at a temperature of 60° F and at a pressure of 14.65 pounds per square inch (absolute), regardless of the condition of the product at the time of importation; and (b) in determining the relative weights of components of the mixtures provided for in items 475.65 and 475.70, naphtha and other petroleum derivatives which may be present in such mixtures as solvents shall be disregarded. 4. (a) Topped crude petroleum (items 475.05 pt. and 475.10 pt.); distillate and residual fuel oils (including blended fuel oils) derived from petroleum, with or without additives (items 475.05 pt. and 475.10 pt.); motor fuel (item 475.25); the following products derived from petroleum: Kerosene, naphthas, mineral oil of medicinal grade, lubricating oils with or without additives, and mixtures of hydrocarbons not specially provided for (items 475.30, 475.35, 475.40, 475.45, and 475.65); and paraffin and other petroleum waxes (item 494.22) shall be exempt from duty, subject to the provisions of the Tariff Act of 1930, section 309 (19 U.S.C. (1964) 1309), if withdrawn - (i) for supplies (not including equipment) of vessels operated by the United States, or vessels of the United States employed in the fisheries or in the whaling business, or actually engaged in foreign trade or trade between the Atlantic and Pacific ports of the United States or between the United States and any of its possessions, or between Hawaii and any other part of the United States or between Alaska and any other part of the United States; or

	CHAPTER 1. - NONMETALLIC MINERALS AND PRODUCTS, EXCEPT CERAMIC PRODUCTS AND GLASS AND GLASS PRODUCTS			
	Unit A. - Hydraulic Cement; Concrete; Concrete Products			
	Note:			
	1. For the purposes of this unit -- (a) the term "cement" means cementing materials without added sand, gravel, or other aggregate; and (b) the term "concrete" means a composite of cementing materials of mineral origin with added mineral aggregate such as sand, crushed stone, or gravel; and (c) the term "tiles" does not include any article 1.25 inches or more in thickness.			
	Hydraulic cement and cement clinker:			
511.11	White, nonstaining portland cement.....	Free		1¢ per 100 lbs., including weight of container
511.14	Other.....	Free	GATT	Free
	Concrete mixes, whether wet or dry:			
511.21	Hydraulic cement concrete.....	Free	GATT	Free
511.25	Other.....	3% ad val.		7.5% ad val.
	Articles, including terrazzo, of concrete, with or without reinforcement:			
	Tiles:			
511.31	Floor and wall tiles.....	8.5% ad val.		21% ad val.
511.41	Other tiles, including roofing tiles.....	5% ad val.		13% ad val.

	Unit C. - Stone and Stone Products			
	Notes:			
	1. This unit covers stone and articles of stone, but does not include --			
	(i) limestone to be used in the manufacture of fertilizer (see chapter 11 of section 4);			
	(ii) articles of concrete in which stone chips or particles are used as aggregate (see unit A of this chapter);			
	(iii) certain abrasives and abrasive stones see unit G of this chapter);			
	(iv) precious and semiprecious stones (see unit H of this chapter);			
	(v) talc, soapstone, or cornwall stone (see unit J of this chapter); and			
	(vi) certain articles provided for in section 7.			
	2. The term "slabs" (items 514.61 and 514.65) embraces flat stone pieces, not over 2 inches in thickness, having a facial area of 4 square inches or more, whether or not cut to size and whether or not one or both surfaces have been rubbed or polished, the edges of which have not been beveled, rounded or otherwise processed except such processing as may be needed to facilitate installation as tiling or veneering in building construction.			
	Sand, crude or manufactured, and gravel:			
513.11	Sand containing by weight 95 percent or more of silica and not more than 0.6 percent of oxide of iron.....	Free		25¢ per ton
513.14	Other.....	Free	GATT	Free

Unit D. - Mica and Mica Products

Note:

1. For the purposes of this unit --

(a) the term "mica" includes both natural and man-made mica;

(b) the term "split block mica" (item 516.31) means mica, not exceeding 0.030 inch in thickness, that has been split and selected within a tolerance of 8 mils, but which has not been cut or stamped to dimensions, shape, or form;

(c) the term "mica splittings" (item 516.51) means mica laminae in book-form or book-pack, or in loose pack, suitable for use in the manufacture of built-up mica (item 516.91); and

(d) the term "built-up mica" (item 516.91) means electrical insulating plates, sheets, and tapes, whether or not attached to paper, cloth, or other backing, consisting of reconstituted mica whether or not treated with resins or of layers of mica splittings and bonding material.

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	Mica not manufactured (including mica over 0.006 inch in thickness, not cut or stamped to dimensions, shape or form, and split block mica), and mica scalings, mica cleanings, and other mica waste and scrap:			
516.11	Untrimmed phlogopite from which no rectangular piece over 2 inches long or 1 inch wide may be cut	Free		2.5% ad val.
	Waste and scrap valued not over 5 cents per pound:			
516.21	Phlogopite	2.5% ad val.		6% ad val.
516.24	Other	2.5% ad val.		6% ad val.
516.31	Split block mica	Free	GATT	Free
516.41	Other	Free	GATT	Free
516.51	Mica splittings	Free	GATT	Free
516.61	Mica, not over 0.006 inch in thickness, not cut or stamped to dimensions, shape, or form	Free	GATT	Free
	Mica, cut or stamped to dimensions, shape, or form, whether or not perforated or indented, and whether or not dedicated to a specific use:			
516.71	Not over 0.006 inch in thickness	4.4% ad val.		11% ad val.
	Over 0.006 inch in thickness:			
	Not perforated or indented:			
516.73	Mica discs, split to thickness	5% ad val.		12.5% ad val.
516.74	Other	8% ad val.		20% ad val.
516.76	Perforated or indented	5% ad val.		12.5% ad val.
516.81	Mica, ground or pulverized	2.5% ad val.		6% ad val.
516.91	Built-up mica	3.5% ad val.		8.5% ad val.
516.94	Articles not specially provided for, of mica	5% ad val.		12.5% ad val.
	Unit N. - Graphite and Related Products			
	Graphite, crude and refined:			
517.11	Artificial	Free		2.5% ad val.

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	Graphite, crude and refined (con.):			
	Natural:			
	Crystalline flake (not including flake dust):			
517.21	Valued not over 5.5 cents per pound.....	3% ad val.		7.5% ad val.
517.24	Valued over 5.5 cents per pound.....	Free		0.4¢ per lb.
517.27	Crystalline lump or chip.....	Free		2.5% ad val.
517.31	Other.....	Free	GATT	Free
517.51	Calcined petroleum and coal coke, not commercially suitable for use as a fuel.....	3% ad val.		7.5% ad. val.
	Carbons and electrodes:			
517.61	Electrodes, in part of carbon or graphite, for electric furnace or electrolytic purposes.....	4.5% ad val.		6% ad val.
	Carbons and electrodes, for producing electric arc light:			
517.71	Under 0.5 inch in diameter or of equivalent cross-sectional area.....	4.5% ad val.		7% ad val.
517.74	0.5 inch or more in diameter or of equivalent cross-sectional area.....	4.5% ad val.		6% ad val.
517.81	Brushes for electric generators, motors, or other electrical machines or appliances; plates, rods, powder, and other forms, wholly or partly manufactured, for manufacturing into the aforesaid brushes.....	3.5% ad val.		5% ad val.
517.91	Articles not specially provided for, of carbon or graphite.....	5% ad val.		7.5% ad val.
	Unit F. - Asbestos and Asbestos Products			
	Note:			
	1. This unit does not include footwear, headwear, gloves, laminated or reinforced plastics, and certain other articles provided for in section 7.			
518.11	Asbestos, not manufactured, asbestos crudes, fibers, and stucco, and asbestos sand and refuse containing not more than 15 percent by weight of foreign matter.....	Free	GATT	Free

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
518.21	Yarn, slivers, rovings, wick, rope, cord, cloth, tape, and tubing, of asbestos, or of asbestos and any other spinnable fiber, with or without wire, and articles of any of the foregoing.....	Free	4% ad val.
	Articles in part of asbestos and hydraulic cement:		
518.41	Pipes and tubes and fittings therefor.....	Free	0.15¢ per lb.
518.44	Other.....	Free	0.1¢ per lb.
518.51	Articles not specially provided for, of asbestos.....	Free	4.5% ad val.
	Unit G. - Abrasives and Abrasive Articles		
	Notes:		
	1. This unit covers certain crude minerals commonly used for making abrasives and abrasive articles (items 519.01 through 519.17, inclusive) but these minerals are classifiable in this unit even if they are not of abrasive quality. This unit also covers certain minerals and artificial abrasives in forms suitable for use as abrasives or for abrasive purposes (items 519.31 through 519.37, inclusive). The remaining provisions of this unit apply to papers, cloths, stones, and other articles which are cut or fashioned from natural stone or made from natural or artificial abrasive materials usually with the use of glues, resins, rubber or other binding materials, and which are designed and used for grinding, sharpening, smoothing, polishing, trueing, cutting, or similar purposes. The provisions of this unit do not cover -- (i) sand (see unit C of this chapter), unless made up into abrasive articles; (ii) natural or synthetic diamond dust or powder (see unit H of this chapter); (iii) crushed or powdered glass (see chapter 3 of this section), unless made up into abrasive articles; (iv) cosmetics and other toilet preparations (see chapter 7B of section 4);		

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	(v) soap and synthetic detergents (see chapter 88 of section 4); (vi) wheels or other abrasive articles mounted in frameworks or machines (see section 6); (vii) dental burrs (see chapter 2 of section 7); or (viii) tools to which abrasives have been applied but which have other functioning or working elements such as cutting teeth, edges, grooves, and flutes (see section 6). 2. For the purposes of this unit -- (a) the term "pumice" includes both pumice and pumicite; and (b) the term "wheels" embraces rotary cutters, disks and other circular bodies designed to rotate on a central axis. 3. In determining the component material of chief value in the articles covered by items 519.83, 519.91, 519.93, or 519.95, only the abrasive components thereof shall be compared.			
519.01	Burrstones in blocks, rough.....	Free	GATT	Free
519.05	Pumice stone to be used in the manufacture of concrete masonry products such as building blocks, bricks, tiles, and similar forms.....	Free	GATT	Free
	Emery, natural corundum, pumice, flint, rottenstone, and tripoli, all the foregoing, crude, or crushed merely to facilitate transportation to the United States:			
	Pumice:			
519.11	Valued not over $15 per ton.....	0.008¢ per lb.		0.02¢ per lb.
519.14	Valued over $15 per ton.....	Free		0.04¢ per lb.
519.17	Other.....	Free	GATT	Free
519.21	Crude silicon carbide and crude artificial abrasives.....	Free	GATT	Free

Tariff item number	Description of products	Offer rate		Rate of duty Jan. 1, 1975
	Emery, natural corundum, pumice, flint, rottenstone, tripoli, garnet, silicon carbide, and artificial abrasives, all the foregoing, in grains, or ground, pulverized, or refined:			
519.31	Pumice	Free		0.17¢ per lb.
519.34	Rottenstone and tripoli	Free	GATT	Free
519.37	Other	0.3¢ per lb.		0.4¢ per lb.
519.51	Papers, cloths, and other materials, wholly or partly coated with abrasives, artificial or natural, or both, whether in the form of sheets, strips, disks, belts, sleeves, or similar forms	Free		3% ad val.
519.61	Hones, whetstones, oilstones, and polishing stones, all the foregoing (except emery files or stones), with or without handles, designed to be used directly in the hand	Free	GATT	Free
	Millstones, abrasive wheels, and abrasive articles not specially provided for:			
519.71	Burrstones, manufactured or bound up into millstones	Free	GATT	Free
	Abrasive wheels:			
519.81	Solid natural stone wheels	Free	GATT	Free
519.83	Of diamond	3% ad val.		7.5% ad val.
	Other:			
519.84	Bonded with synthetic resins	4¢ per lb. + 3.5% ad val.		10¢ per lb. + 8.5% ad val.
519.86	Other	Free		5% ad val.
	Other:			
519.91	Of emery or garnet	Free		5% ad val.

	CHAPTER 2. - CERAMIC PRODUCTS		
	Notes:		
	1. This chapter covers ceramic wares, and articles of such wares and, in addition, certain unshaped refractory material (unit A) closely related thereto.		
	2. For the purposes of this schedule -- (a) a "ceramic article" is a shaped article having a glazed or unglazed body of crystalline or substantially crystalline structure, which body is composed essentially of inorganic nonmetallic substances and either is formed from a molten mass which solidifies on cooling, or is formed and subsequently hardened by such heat treatment that the body, if reheated to pyrometric cone 020, would not become more dense, harder, or less porous, but does not include any glass article; (b) the term "earthenware" embraces ceramic ware, whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient and will absorb more than 3.0 percent of its weight of water; (c) the term "stoneware" embraces ceramic ware whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient, is not commonly white, will absorb not more than 3.0 percent of its weight of water, and is naturally opaque (except in very thin pieces) even when fully vitrified; (d) the term "subporcelain" embraces fine-grained ceramic ware (other than stoneware), whether or not glazed or decorated, having a fired body which is white (unless artifically colored) and will absorb more than 0.5 percent but not more than 3.0 percent of its weight of water; (e) the terms "chinaware" and "porcelain" embrace fine-grained ceramic ware (other than stoneware), whether or not glazed or decorated, having a body which is white (unless artificially colored) and will not absorb more than 0.5 percent of its weight of water;		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(f) the term "bone chinaware" embraces chinaware or porcelain the body of which contains by weight 25 percent or more of calcined bone; (g) the term "nonbone chinaware" embraces chinaware or porcelain other than bone chinaware; (h) the term "coarse-grained", as applied to ceramic ware, embraces such wares having a body made of materials none of which had been washed, ground, or otherwise beneficiated; (i) the term "fine-grained", as applied to ceramic wares, embraces such wares having a body made of materials any of which had been washed, ground, or otherwise beneficiated; and (j) the term "body" includes any engobe or body slip, except engobe or body slip applied to the body as a decoration; and (k) the water absorption of a ceramic body shall be determined by ASTM test method designated C373-56 1/ (except that test specimens may have a minimum weight of 10 grams, and may have one large surface glazed).		
	Unit A. - Refractory and Heat-Insulating Articles		
	Notes: 1. This unit does not cover ceramic electrical ware (see unit D of this chapter). 2. For the purposes of this unit, "a heat-insulating article", whether shaped or not shaped, is one having a bulk density not over 75 pounds per cubic foot and designed to impede or resist the flow of heat at temperatures above 1600° F. 3. For the purposes of this unit, "a refractory article", whether shaped or not shaped, is one having a bulk density over 75 pounds per cubic foot and designed to be used to resist temperatures above

	2600° F. A shaped refractory article has special properties of strength and resistance to thermal shock and may also have, depending upon the particular uses for which designed, other special properties such as resistance to abrasion and corrosion. 4. For the purposes of items 531.21 and 531.24, a brick which contains both chrome and magnesite is classifiable according to which of those components is the greater by weight.			
	Refractory magnesia, including dead-burned magnesite, fused magnesite, and dead-burned dolomite:

	Unit B. - Ceramic Construction Articles			
	Notes:			
	1. This unit does not include -- (i) refractory and heat-insulating articles (see unit A of this chapter); or (ii) laboratory and industrial chemical ware, electrical ware, and sanitary ware and parts thereof (see unit D of this chapter).			
	2. For the purposes of this unit -- (a) no article 1.25 inches or more in thickness shall be regarded as a tile; and (b) the term "construction articles" means ceramic ware and articles of such ware such as, but not limited to, bricks, tiles, friezes, mantels, sewer and drain pipes and fittings therefor, flue linings, and hollow building blocks, chiefly used in the construction of buildings and other structures.			
	Ceramic bricks:			
532.11	Not coated in whole or in part with engobe, glazed, or enamel.....	Free	GATT	Free

	Unit C. - Table, Kitchen, Household, Art and Ornamental Pottery		
	Notes: 1. This unit covers ceramic articles chiefly used for preparing, serving, or storing food or beverages, or food or beverage ingredients; and certain smokers', household, and art and ornamental articles of ceramic ware. This unit does not cover -- (i) smokers' articles provided for in chapter 9B of section 7; (ii) other articles specifically provided for in section 7 or elsewhere in this schedule. 2. For the purposes of this unit -- (a) the term "available in specified sets" (items 533.22, 533.24, 533.62, and 533.64) embraces plates, cups, saucers, and other articles chiefly used for preparing, serving, or storing food or beverages, or food or beverage ingredients, which are sold or offered for sale in the same pattern, but no article is classifiable as being "available in specified sets" unless it is of a pattern in which at least the articles listed below in (b) or (c) of this note are sold or offered for sale. (b) if each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in items 533.22, 533.24, 533.62 or 533.64, of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appraiser under section 402 of the Tariff Act of 1930 (19 U.S.C. (1970) 1401a), as amended, whether or not such articles are imported in the same shipment: 12 plates of the size nearest to 10.5 inches in maximum dimension, sold or offered for sale, 12 plates of the size nearest to 6 inches in maximum dimension, sold or offered for sale,

	12 tea cups and their saucers, sold or offered for sale, 12 soups of the size nearest to 7 inches in maximum dimension, sold or offered for sale, 12 fruits of the size nearest to 5 inches in maximum dimension, sold or offered for sale, 1 platter or chop dish of the size nearest to 15 inches in maximum dimension, sold or offered for sale, 1 open vegetable dish or bowl of the size nearest to 10 inches in maximum dimension, sold or offered for sale, 1 sugar of largest capacity, sold or offered for sale, 1 creamer of largest capacity, sold or offered for sale. If either soups or fruits are not sold or offered for sale, 12 cereals of the size nearest to 6 inches in maximum dimension, sold or offered for sale, shall be substituted therefor. [(c) if each of the articles listed above in (b) of this note is not sold or offered for sale in the same pattern, but each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in item 533.69 of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appraiser under section 402 of the Tariff Act of 1930 (19 U.S.C. (1970) 1401a, 1402), as amended, whether or not such articles are imported in the same shipment: 6 plates of the size nearest to 8 inches in maximum dimension, sold or offered for sale, 6 beverage cups and their saucers, sold or offered for sale, 1 sugar of largest capacity, sold or offered for sale, 1 creamer of largest capacity, sold or offered for sale, 1 beverage pot of the size nearest a 6-cup capacity, sold or offered for sale.] 1/		

1/ This note will be removed from the Tariff Schedules of the United States and from Schedule XX to the GATT.

	(d) the percentage of water absorption of cast and jiggered ceramic articles of the same pattern, which are "available in specified sets" and which are imported together in a ratio of at least 5 jiggered articles to 1 cast article in the same shipment shall be the average water absorption of such cast and jiggered articles, of the same pattern in the shipment, which average absorption shall be deemed to be equivalent to 5 percent of the water absorption of a representative sample of such cast articles plus 95 percent of the water absorption of a representative sample of such jiggered articles. 3. In those provisions of this chapter which classify merchandise according to the value of each "article", an article is a single tariff entity which may consist of more than one piece. For example, a vegetable dish and its cover, or a beverage pot and its lid, imported in the same shipment, constitute an article.

Unit B. - Flat Glass and Products Thereof

Notes: 1/

1. This unit covers flat glass and certain articles made therefrom. This unit does not cover --

(i) articles described in unit A or C of this chapter;

(ii) glass optically worked (see chapter 2A of section 7);

(iii) certain painted, colored, or stained glass windows imported for the use of religious institutions (see chapter 4 of section 8).

1/ Headnote 4 of TSUS schedule 5, part 3B is omitted.

	2. For the purposes of this unit -- (a) the term "cast or rolled glass" refers to glass that, as originally produced, has surfaces one or both of which, by a rolling process, have been made rough, figured, fluted, or ribbed, or have been otherwise impressed; (b) the term "ordinary glass" refers to glass other than "colored or special glass", as defined in note 2(c), infra; (c) the term "colored or special glass" refers to glass that has a transmittance of normally incident light of less than 66 percent at one or more wave lengths from 400 to 700 millimicrons, inclusive, or a transmittance of less than 80 percent at one or more wave lengths from 525 to 575 millimicrons, inclusive, for glass 1/4 inch in thickness, or of the equivalent transmittances for any other thickness, provided that, in determining such light transmittances, the effect of surface irregularities or configurations, or of other surface treatment (except flashing applied prior to solidification), and the effect of wire netting within the glass, shall be eliminated; (d) the term "united inches" refers to the sum in inches of the length and width of a rectangle of glass; and (e) the term "polished", as used with reference to glass, refers to glass one or both of the surfaces of which have been made smooth and glossy, in whole or in part, by abrasive or chemical means, or by floating the glass over molten metal. 3. For the purposes of this unit, superficial area shall be used in determining the surface area of cast or rolled glass.

	SECTION 6. - METALS AND METAL PRODUCTS		
	Notes:		
	1. This section does not cover --		
	(i) chemical elements (except thorium and uranium) and isotopes which are usefully radioactive (see chapter 13B of section 4);		
	(ii) the alkali metals, i.e., cesium, lithium, potassium, rubidium, and sodium (see chapter 2A of section 4); or		
	(iii) certain articles and parts thereof, of metal, provided for in section 7 and elsewhere.		
	2. For the purposes of this schedule, unless the context requires otherwise --		
	(a) the term "precious metal" embraces gold, silver, platinum and other metals of the platinum group (iridium, osmium, palladium, rhodium, and ruthenium), and precious-metal alloys;		
	(b) the term "base metal" embraces aluminum, antimony, arsenic, barium, beryllium, bismuth, boron, cadmium, calcium, chromium, cobalt, columbium, copper, gallium, germanium, hafnium, indium, iron, lead, magnesium, manganese, mercury, molybdenum, nickel, rhenium, the rare-earth metals (including scandium and yttrium), selenium, silicon, strontium, tantalum, tellurium, thallium, thorium, tin, titanium, tungsten, uranium, vanadium, zinc, and zirconium, and base-metal alloys;		
	(c) the term "metal" embraces precious metals, base metals, and their alloys; and		
	(d) in determining which of two or more equally specific provisions for articles "of iron or steel", "of copper", "of aluminum", or "of" other base metals applies to an article containing two or more base metals and wholly or in chief value thereof, the classification shall be made according to the base metal which predominates by weight over each of the other base metals rather than according to the base metal in chief value.

CHAPTER 1. - METAL-BEARING ORES AND OTHER METAL-BEARING MATERIALS

Notes:

1. This chapter covers metal-bearing ores, and certain other metal-bearing materials. This chapter does not cover --

(a) pigments or fertilizers (see section 4, chapters 9B and 11, respectively), or chemical compounds (see section 4);

(b) slag cements, mineral wools, dolomite, cryolite, chiolite, or alunite, magnesite, or calcined bauxite (see section 5, chapter 1);

(c) precious and semiprecious stones (see section 5, chapter 14); or

(d) metal waste and scrap, native metals separated from their gangues or matrices, or other metals essentially in a metallic state (see chapter 2 of this section).

2. For the purposes of this chapter --

(a) the term "metal-bearing ores" embraces only metalliferous minerals, whether crude or concentrated (by crushing, flotation, washing, or by other physical or mechanical separation processes which do not involve substantial chemical change), and roasted or sintered iron, lead, copper, manganese, and zinc concentrates, from which precious metals or base metals, as defined in note 2 of this section, are commercially obtained, including metals obtained directly in unalloyed form, in the form of alloys, or in the form of chemical compounds;

(b) the term "other metal-bearing materials of a type commonly used for the extraction of metal or as a basis for the manufacture of chemical compounds" embraces ash, slag, dross, scale, mattes, speiss, skimmings, flue dust, fumes, refinery slimes, residues, and all other materials (except metal-bearing ores, as above defined, and the dross or residuum from burnt pyrites) of a type from which precious metals or base metals, as defined in note 2 of this section, are commonly obtained (either as

	the result of a further processing of the materials as such, or as a result of the addition of the materials as alloying materials to other materials being processed), including metals obtained directly in unalloyed form, in the form of alloys, or in the form of chemical compounds; (c) lead plants are pyrometallurgical reduction facilities whose principal production by weight, exclusive of waste materials and by-products, consists of lead bullion; (d) copper plants are pyrometallurgical reduction facilities whose principal production by weight, exclusive of waste materials and by-products, consists of blister copper, black copper, anode copper or fire-refined copper; (e) zinc plants are facilities whose principal production by weight, exclusive of waste materials and by-products, consists of unwrought zinc metal, zinc pigments, zinc compounds, or zinc fume; and (f) other plants are all facilities which do not fall within the foregoing definitions of lead plants, copper plants, and zinc plants. 3. The duties imposed under item 602.10, 602.20, 602.28, or 602.30 of this chapter on the copper, lead, or zinc contained in metal-bearing ores are cumulative duties which apply in addition to the duties, if any, otherwise imposed on such ores. 4. Dutiable Metal Content of Ores and Other Materials: (a) The specific rates of duty imposed under the provisions of this chapter on the metal content of ores and other materials shall apply to the quantity of metal contained therein as determined by chemical analysis without deductions, whether recovered as metals, as alloys, or as chemical compounds or used directly in the manufacture of articles, except as hereinafter provided in this note. (b) Allowable Absolute Deductions for Losses on Copper, Lead, or Zinc Content: With respect to ores or other materials provided for in this chapter which are subject to duty at specific rates on their copper, lead, or zinc content, absolute deductions from the respective quantities of each of such metal

	5. When the classification of imported materials under any provision of this chapter is dependent on the percentage of metal content, such percentage shall be the ratio of the total quantity of the respective metal content to the total quantity of imported material when computed on a dry-weight basis, i.e., free of all uncombined moisture.			
	6. Copper-bearing ores and other copper-bearing materials provided for in this chapter and unwrought copper and copper waste and scrap provided for in chapter 2, unit C, of this section, when smelted or refined in the United States and the products of smelting or refining exported, shall be exempt from duty, subject to the provisions of the Tariff Act of 1930, section 312 (19 U.S.C. (1970) 1312). 1/

	CHAPTER 2. - METALS, THEIR ALLOYS, AND THEIR BASIC SHAPES AND FORMS		
	Notes:		
	1. This chapter covers precious metals and base metals (including such metals when they are chemically pure), their alloys, and their so-called basic shapes and forms, and, in addition, covers metal waste and scrap. Unless the context requires otherwise, the provisions of this chapter apply to the products described by whatever process made (i.e., whether rolled, forged, drawn, extruded, cast or sintered) and whether or not such products have been subjected to treatments to improve the properties or appearance of the metals or to protect them against rusting, corrosion or other deterioration. These treatments include annealing, tempering, case-hardening and similar heat-treatments or nitriding; descaling, pickling, scraping, scalping and other processes to remove oxidation scale and crust; rough coating with oil, tar, grease, red lead, or other material to prevent rusting; polishing, burnishing, glazing, artificial oxidation, phosphatizing, and other finishing treatments; metallization by cementation, by electroplating, by immersion in a bath of molten metal, or by other means; coating with enamel, paint, lacquer, or other nonmetallic substances; and cladding. This chapter does not include -- (i) insulated electric conductors (see chapter 5 of this section); (ii) milliners' wire and other wire covered with textile or other nonmetallic material (see chapter 3B of this section); (iii) leaf and foil (see chapter 3C of this section); or (iv) other articles specially provided for elsewhere in this schedule, or parts of articles.

	2. Alloys. -- (a) For the purposes of this schedule, alloys are defined and classifiable as hereinafter set forth. Alloys are metallic substances consisting of two or more metals, or of one or more metals and one or more non-metals, intimately united, usually by having been fused together and which may or may not have been dissolved in each other when molten; they include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by fusion, but do not include substances in which the total weight of the metals does not equal or exceed the total weight of the non-metal components. (b) Precious-metal alloys are alloys which contain 2 percent or more by weight of one or more metals of the platinum group, of gold, or of silver. Precious-metal alloys are classifiable as -- (i) alloys of platinum, if they contain 2 percent or more by weight of one or more metals of the platinum group; (ii) alloys of gold, if they contain 2 percent or more by weight of gold, but contain no metal of the platinum group or less than 2 percent by weight thereof; and (iii) alloys of silver, if they contain 2 percent or more by weight of silver, and are not alloys of platinum or alloys of gold, as defined in (b)(i) and (b)(ii), respectively, of this note. (c) Base-metal alloys are alloys which contain one or more base metals and are not any of the precious-metal alloys, as defined in (b) of this note. Base-metal alloys are classifiable as -- (i) alloys of that base metal which predominates by weight over each of the other metallic elements contained therein, except as specified in (c)(ii) of this note; and (ii) ferroalloys (as defined in note 2(e) of unit B of this chapter or master alloys (as defined in note 2(b) of unit C of this chapter) under their respective headings in unit B or C of this chapter, regardless of the base metal therein which predominates by weight.

	(d) In this schedule, unless the context requires otherwise, a provision for a specific metal includes that metal and its alloys. 3. For the purposes of this chapter, unless the context requires otherwise -- (a) the term "unwrought" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot, and similar primary forms, but does not cover rolled, forged, drawn, or extruded products, tubular products, or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping, or descaling; (b) the term "waste and scrap" refers to materials and articles of metal which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals, and does not include metal in unwrought form or metal-bearing materials provided for in chapter 1 of this section; (c) the term "wrought", as applied to metal products other than wrought iron, refers to products which have been rolled, forged, drawn, or extruded, and also refers to cast or sintered products which have been machined or processed otherwise than by simple trimming, scalping, or descaling; (d) the term "clad", as applied to metal products, refers to such products with two or more layers of metal of different colors or natures which have been associated or bonded together by forging, hammering, rolling, or other mechanical or thermic process to insure welding or molecular interpenetration of the surfaces in contact; and (e) the term "pipes and tubes and blanks therefor" covers tubular products, including hollow bars and hollow billets but not including hollow drill steel, of any cross-sectional configuration, by whatever process made, whether seamless, brazed, or welded and whether with an open or lock seam or joint.

	4. No allowance or reduction of duties for partial damage or loss in consequence of discoloration or rust occurring before importation shall be made upon iron or steel or upon any article of iron or steel.		
	Unit A. - Precious Metals		
	Notes:		
	1. This unit does not cover -- (a) base metals coated or plated with precious metal or articles thereof; or (b) jewelry, parts of jewelry, and other articles and parts specially provided for elsewhere in this section or in section 7.		
	2. For the purposes of this schedule -- (a) the term "platinum" refers to platinum and other metals of the platinum group (iridium, osmium, palladium, rhodium, and ruthenium), separately or together, and the term "the metal platinum" refers to the metal platinum alone; (b) the term "semimanufactured" refers to wrought metal products in the form of bars, rods, sections, plates, sheets, strips, wire, tubes, pipes, and hollow bars, and to powder (other than primary metal in powder form); (c) the term "rolled", as used in regard to precious metals, means material made with a metal base upon one or more surfaces of which a covering of precious metal is affixed by soldering, brazing, welding, hot-rolling, or similar mechanical methods, and also includes base metal inlaid with precious metal.

	Unit B. - Iron or Steel			
	Notes:			
	1. This unit covers iron and steel, their alloys, and their so-called basic shapes and forms, and in addition covers iron or steel waste and scrap.			
	2. Grades of Iron, Steel, and Ferroalloys.--For the purposes of this schedule, the following terms have the meanings hereby assigned to them: (a) Pig iron (except vanadium or titanium pig iron) and cast iron: A ferrous product (not including steel, as defined in (g) of this note) containing, by weight, 1.9 percent or more of carbon, and which may contain one or more alloy elements within the respective weight limits specified below: not over 6 percent manganese, not over 15 percent phosphorus, not over 8 percent silicon, not over 30 percent chromium, not over 40 percent tungsten, not over 0.1 percent vanadium, not over 0.1 percent titanium, an aggregate of not over 10 percent of other alloy elements. (b) Vanadium or titanium pig iron: A ferrous product containing, by weight, over 0.1 percent but not over 35 percent of vanadium, or over 0.1 percent but not over 15 percent of titanium, and otherwise conforming to the specifications for pig iron in (a) of this note.			

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(c) Spiegeleisen: A ferrous product or ferroalloy containing, by weight, over 6 percent but not over 30 percent of manganese and otherwise conforming to the specifications for pig iron in (a) of this note. (d) Ferronickel: A ferrous alloy consisting essentially of iron and nickel and containing 10 percent or more, by weight, of nickel. (e) Ferroalloys: Alloys of iron (except spiegeleisen and ferronickel, as defined in notes 2(c) and 2(d), supra, respectively) which are not usefully malleable and are commonly used as raw material in the manufacture of ferrous metals and which contain one or more of the following elements in the quantity, by weight, respectively indicated: over 30 percent of manganese, or over 8 percent of silicon, or over 30 percent of chromium, or over 40 percent of tungsten, or a total of over 10 percent of other alloy elements, except copper, and which, if containing silicon, do not contain over 96 percent of nonferrous alloy elements, or, if containing manganese but no silicon, do not contain over 92 percent of nonferrous alloy elements, or, if containing no manganese and no silicon, do not contain over 90 percent of nonferrous alloy elements. For the purposes of this unit -- (i) ferrochromium is a ferroalloy which contains, by weight, over 30 percent of chromium but not over 10 percent of silicon; (ii) ferromanganese is a ferroalloy which contains, by weight, over 30 percent of manganese but not over 10 percent of silicon; (iii) ferromolybdenum is a ferroalloy which contains, by weight, over 50 percent of molybdenum; (iv) ferrophosphorus is a ferroalloy which contains, by weight, over 15 percent of phosphorus;		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(v) ferrosilicon is a ferroalloy which contains, by weight, not over 30 percent of manganese and over 8 percent of silicon; (vi) ferrosilicon chromium is a ferroalloy which contains, by weight, over 30 percent of chromium and over 10 percent of silicon; (vii) ferrosilicon manganese is a ferroalloy which contains, by weight, over 30 percent of manganese and over 10 percent of silicon; (viii) ferrosilicon titanium is a ferroalloy which contains, by weight, over 15 percent of titanium and over 10 percent of silicon; (ix) ferrosilicon tungsten is a ferroalloy which contains, by weight, over 40 percent of tungsten and over 10 percent of silicon; (x) ferrotitanium is a ferroalloy which contains, by weight, over 15 percent of titanium but not over 10 percent of silicon; (xi) ferrotungsten is a ferroalloy which contains, by weight, over 40 percent of tungsten but not over 10 percent of silicon; (xii) ferrovanadium is a ferroalloy which contains, by weight, over 35 percent of vanadium; and (xiii) ferrozirconium is a ferroalloy which contains, by weight, over 10 percent of zirconium. (f) Wrought iron: A ferrous material, aggregated from a solidifying mass of pasty particles of highly refined metallic iron with which a uniformly distributed quantity of slag is incorporated without subsequent fusion. A cross section 90 degrees from the rolling direction of wrought iron contains a minimum of 200,000 slag filaments per square inch of cross section. Wrought iron may contain elements other than iron but iron must predominate, by weight, over each one.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(g) Steel: An alloy of iron and carbon which is malleable as first cast. Steel may contain other elements intended to enhance one or more properties and may contain elements unavoidably retained from raw materials, but iron must predominate, by weight, over each of the other elements. (h) Alloy iron or steel: The term "alloy" when used as an adjective to designate a type or grade of iron or steel embraces only -- (i) iron which contains one or more of the following elements in the quantity, by weight, respectively indicated: over 3.00 percent of manganese, or over 5.00 percent of phosphorus, or over 5.00 percent of sulphur, or over 3.00 percent of silicon, or over 0.20 percent of chromium, or over 0.10 percent of molybdenum, or over 0.30 percent of tungsten, or over 0.10 percent of vanadium, or over 0.60 percent of any other metallic element; and (ii) steel which contains one or more of the following elements in the quantity, by weight, respectively indicated: over 1.65 percent of manganese, or over 0.25 percent of phosphorus, or over 0.35 percent of sulphur, or over 0.60 percent of silicon, or over 0.60 percent of copper, or over 0.30 percent of aluminum, or over 0.20 percent of chromium, or over 0.30 percent of cobalt, or over 0.35 percent of lead, or over 0.50 percent of nickel, or over 0.30 percent of tungsten, or over 0.10 percent of any other metallic element. In the absence of context which requires otherwise, wherever used in this schedule, the term -- (iii) "iron or steel" includes alloy iron or steel;

	3. Forms and Condition of Iron or Steel.--For the purposes of this unit, the following terms have the meanings hereby assigned to them: (a) Ingots: Castings resulting from the solidification of molten steel and having a columnar form suitable for working by rolling or forging. (b) Blooms and billets: Semifinished products generally of rectangular or circular cross section, having a length several times greater than the maximum cross-sectional dimension, and, if rectangular, a width less than 4 times the thickness. A bloom is at least 36 square inches in cross-sectional area; a billet is less than 36 square inches but not less than 3 square inches in cross-sectional area. (c) Slabs and sheet bars: Semifinished products of rectangular cross section, having a width of at least 4 times the thickness. A slab is not less than 2 inches and not over 6 inches in thickness; a sheet bar is less than 2 inches in thickness. (d) Bars: Products of solid section not conforming completely to the respective specifications set forth herein for blooms, billets, slabs, sheet bars, wire rods, plates, sheets, strip, wire, rails, joint bars, or tie plates, and which have cross sections in the shape of circles, segments of circles, ovals, triangles, rectangles, hexagons, or octagons. Deformed concrete reinforcing bars are hot-rolled steel bars, of solid cross section, having deformations of various patterns on their surfaces. (e) Hollow drill steel: A hollow steel product in any cross section suitable for use in making mining drills or mining drill rods, with the largest internal cross-sectional dimension not greater than one-third of the largest external cross-sectional dimension. (f) Wire rods: A coiled, semifinished, hot-rolled product of solid cross section, approximately round in cross section, not under 0.20 inch nor over 0.74 inch in diameter.

	(g) Plates and sheets: Plates are flat rolled products whether or not corrugated or crimped, in coils or cut to length, 0.1875 inch or more in thickness and, if not cold rolled, over 8 inches in width, or, if cold rolled, over 12 inches in width. Sheets are flat rolled products whether or not corrugated or crimped, in coils or cut to length, under 0.1875 inch in thickness and over 12 inches in width. For the purposes of this unit -- (i) the term "black plate" refers to cold-rolled steel sheets, not coated, under 0.0142 inch in thickness; (ii) the term "tin plate and tin coated sheets" refers to tin coated steel sheets; and (iii) the term "terne plate and terne coated sheets" refers to steel sheets coated with terne metal (a lead-tin alloy). (h) Strip: A flat rolled product whether or not corrugated or crimped, in coils or cut to length, under 0.1875 inch in thickness, and, if cold rolled, over 0.50 inch but not over 12 inches in width, or, if not cold rolled, not over 12 inches in width. (i) Wire: A finished, drawn, non-tubular product, of any cross-sectional configuration, in coils or cut to length, and not over 0.703 inch in maximum cross-sectional dimension. The term also includes a product of solid rectangular cross section, in coils or cut to length, with a cold-rolled finish, and not over 0.25 inch thick and not over 0.50 inch wide. (j) Angles, shapes, and sections: Products which do not conform completely to the respective specifications set forth herein for blooms, billets, slabs, sheet bars, bars, wire rods, plates, sheets, strip, wire, rails, joint bars, or tie plates, and do not include any tubular products. (k) Rails: Hot-rolled steel products, weighing not less than 8 pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway, and crane runway applications. Rails may be punched or not punched.

	(l) Joint bars: Hot-rolled steel products designed to connect the ends of adjacent rails in track. Joint bars are usually punched or slotted. (m) Tie plates: Hot-rolled steel products used to support rails in track, to maintain track gauge and protect the ties. Tie plates are punched to provide holes for spikes and have one or two shoulder sections as rail guides. 4. Additional duties: Iron or steel products which contain, by weight, one or more of the following elements in the quantity, by weight, respectively indicated: over 0.2 percent of chromium, or over 0.1 percent of molybdenum, or over 0.3 percent of tungsten, or over 0.1 percent of vanadium, are subject to additional cumulative duties as provided for in items 607.01, 607.02, 607.03, and 607.04, but these duties apply only with respect to products covered by provisions which make specific reference to this note in the "Rate of Duty" column.		
	Iron or steel products containing any of the following metals in the quantity respectively specified (see note 4 of this unit):		
607.01	Containing over 0.2 percent by weight of chromium.....	Additional duty of 0.1% ad val.	Additional duty of 0.75¢ per lb. on chromium content in excess of 0.2%

	Unit C. - Copper		
	Notes:		
	1. This unit covers copper, its alloys, and their so-called basic shapes and forms, and in addition covers copper waste and scrap.		
	2. For the purposes of this schedule, the following terms have the meanings indicated: (a) Alloys of copper: Copper-base alloys or metals in which the copper content is, by weight, less than 99.3 percent, but not less than any other metallic element. For the purposes of this unit -- (i) nickel silver is an alloy of copper which contains by weight 5 percent or more of zinc and 5 percent or more of nickel, with or without small quantities of other elements; (ii) brass is an alloy of copper (not including nickel silver) in which zinc is the principal alloying element, with or without small quantities of other elements; (iii) cupro-nickel is an alloy of copper in which nickel is the principal alloying element and which does not contain by weight over 2 percent of any other single element. In the absence of context which requires otherwise, the term "copper", wherever used in this schedule, includes alloys of copper.		

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(b) Master alloys: Alloys of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of non-ferrous metals. For the purposes of this unit -- (i) manganese copper is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 45 per-cent, with copper the balance; and (ii) phosphor copper is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance. 3. For the purposes of this unit, the follow-ing terms have the meanings indicated: (a) Bars and plates: Products of solid rectangu-lar cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width and plates are over 12 inches in width. (b) Sheets and strips: Products of solid rec-tangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 20 inches in width; strips are not over 20 inches in width and do not include flat wire, as defined in (d) below. (c) Rods: Products of round, half-round, quarter-round, oval, half-oval, triangular, pentagonal, hexag-onal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils are over 0.375 inch in maximum cross-sectional dimen-sion. (d) Wire: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 1.25 inches in width, not over 0.188 inch in thickness, and has all surfaces rolled or drawn, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.

	(c) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for bars, plates, sheets, strip, rods, or wire, and do not include any tubular products. 4. For the purposes of this unit, any continuous cast product, whether or not machined or otherwise processed, which is substantially comparable to, and suitable for the same general purposes as, a wrought product provided for in this unit shall be classified under the same provision and at the same rate as such wrought product, notwithstanding the provisions of notes 3(a) and 3(c) of this chapter. 5. Determination of Market Price of Copper for Rate of Duty Purposes.--(a) In this unit, the rate of duty column has been divided into two columns, viz., A and B. The rates of duty in column A apply when the market price of copper is 24 cents or more per pound, and the rates of duty in column B apply when the market price of copper is under 24 cents per pound. (b) For the purposes of the provisions of items 602.28, 602.30, and 603.49 through 603.55 in chapter 1 of this section relating to copper-bearing materials, and of the provisions of this unit, the market price of copper is the average market price per pound for one calendar month of electrolytic copper in standard shapes and sizes, delivered Connecticut Valley, as determined by the United States International Trade Commission and reported to the Secretary of the Treasury in accordance with procedures set forth below. (c) The market price of copper, as defined above, shall be considered to be below 24 cents per pound only on and after the 20th day after the date of a report by the United States International Trade Commission to the Secretary of the Treasury that it has determined that the said market price has been below 24 cents per pound for one calendar month. (d) After any report by the United States International Trade Commission to the Secretary of the Treasury as provided for in (b) above, the said market price shall be considered as not being below 24 cents per pound only on and after the 20th day after the date of a report by the said Commission to the said Secretary that it has determined that the said market price has been 24 cents or more per pound for one calendar month.

	(e) Determinations by the said Commission of the market price of electrolytic copper shall be based upon sources commonly resorted to by the buyers of copper in the usual channels of commerce, including, but not limited to, quotations of the market price for electrolytic copper, in standard shapes and sizes, delivered Connecticut Valley, reported by the Engineering and Mining Journal's "Metal and Mineral Markets". 6. The deductions provided for in note 4(b) of chapter 1 of this section shall apply to cement copper and copper precipitates (item 612.02) subject to the conditions specified in note 4 of said chapter 1.

	Unit D. - Aluminum		
	Notes:		
	1. This unit covers aluminum, its alloys, and their so-called basic shapes and forms and also covers aluminum waste and scrap.		
	2. Alloys of aluminum: For the purposes of this schedule, alloys of aluminum are metals in which the aluminum content is, by weight, less than 99.0 percent, but not less than any other metallic element. Aluminum silicon is an alloy of aluminum containing not less than 25 percent of silicon. In the absence of context which requires otherwise, the term "aluminum", wherever used in this schedule, includes alloys of aluminum.		
	3. For the purposes of this unit, the following terms have the meanings indicated: (a) Bars: Products of solid rectangular cross section, 0.25 inch or more in thickness and over 0.375 inch but not over 12 inches in width, in coils or cut to length; and products of solid hexagonal or octagonal cross section, 0.375 inch or more in thickness (measuring the perpendicular distance between opposite faces) in coils, or of any thickness in straight lengths. (b) Rods: Products of solid round cross section, which, if 0.375 inch or more in diameter, are in coils or cut to length, and which, if under 0.375 inch in diameter, are in straight lengths. (c) Plates, sheets, and strips: Products of solid rectangular cross section, in coils or cut to length, whether or not corrugated or crimped. Plates are 0.25 inch or more in thickness and over 12 inches in width; sheets and strip are under 0.25 but not under 0.006 inch in thickness. (d) Wire: A product of solid round, rectangular, hexagonal, or octagonal cross section, in coils, whose diameter, width, or perpendicular distance between opposite faces is less than 0.375 inch. (e) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for bars, plates, sheets, strips, rods, or wire and do not include any tubular products.

In the absence of context which requires otherwise, the term "nickel", wherever used in this schedule, includes alloys of nickel.

3. For the purposes of this unit, the following terms have the meanings indicated:

(a) Bars and plates: Products of solid rectangular cross section over 0.25 inch in thickness, in coils or cut to length. Bars are not over 12 inches in width and plates are over 12 inches in width.

(b) Sheets and strips: Products of solid rectangular cross section not over 0.25 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 14 inches in width; strips are over 0.5 inch but not over 14 inches in width.

(c) Rods: Products of solid round, hexagonal or octagonal cross section which if over 0.375 inch in maximum cross-sectional dimension are in coils or cut to length, and which if not over 0.375 inch in maximum cross-sectional dimension are in straight lengths.

(d) Wire: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 0.25 inch in thickness and not over 0.5 inch in width, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.

(e) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for bars, plates, sheets, strips, rods, or wire and do not include any tubular products.

	In the absence of context which requires otherwise, the term "zinc", wherever used in this schedule, includes alloys of zinc. 3. For the purposes of this unit, the following terms have the meanings indicated: (a) Plates, sheets, and strips: Products of solid rectangular cross section, in coils or cut to length, whether or not corrugated or crimped. Plates are 0.375 inch or more in thickness and over 12 inches in width; sheets and strips are under 0.375 inch but not under 0.006 inch in thickness. (b) Bars: Products of solid rectangular, hexagonal, or octagonal cross section, in coils or cut to length, which if rectangular are 0.375 inch or more in thickness but not over 12 inches in width, and which if hexagonal or octagonal are 0.375 inch or more for the perpendicular distance between opposite faces. (c) Rods: Products of solid round cross section which if 0.375 inch or more in diameter are in coils or cut to length, and which if under 0.375 inch in diameter are in straight lengths. (d) Wire: A product of solid round cross section under 0.375 inch in diameter, in coils. (e) Angles, shapes, and sections: Products which do not conform completely to the respective definitions set forth in this note for plates, sheets, strips, bars, rods, or wire and do not include any tubular products.

Unit K. - Other Base Metals

Notes:

1. This unit covers base metals not provided for in units B through J of this chapter, and their alloys, wrought and unwrought, and also includes the waste and scrap of such base metals. This unit does not cover ferrocerium and other pyrophoric alloys (see chapter 9A of section 7).

2. Alloys: For the purposes of this schedule, alloys of each of the base metals provided for in this unit are metals in which the content of the respective base metal is, by weight, less than 99.0 percent, but not less than any other metallic element. In the absence of context which requires otherwise, a reference to one of the base metals by name, wherever used in this schedule, includes alloys of such base metal.

	CHAPTER 8. - METAL PRODUCTS		
	Notes:		
	1. For the purposes of this chapter -- (a) "wire" is deemed to be a base-metal product which conforms to the respective cross-sectional measurements for base-metal wires in chapter 2, whether or not conforming otherwise to the specifications set forth therein. In the provisions of this chapter which describe wire in terms of its cross-sectional dimension, the dimension specified is that of such wire without the metal coating, if any.		
	2. The provisions in this chapter which specifically refer to kitchen or table ware, or to table, kitchen, or household utensils and articles, include articles of types which are used outdoors as well as those which are used indoors.		
	Unit A. - Metallic Containers		
	Notes:		
	1. The provisions in this unit for containers include such containers whether or not equipped with fittings such as taps, valves, level gauges, and manometers. This unit, however, does not include -- (i) containers with provision made for circulating heating or cooling fluids between the walls, or with mechanical or thermal equipment such as agitators, heating or cooling coils, or electrical elements (see chapters 4 and 5 of this section); (ii) luggage, handbags, or flat goods (see chapter 10 of section 7); (iii) furniture (see chapter 4 of section 7);

	(iv) cases for musical instruments (see chapter 3B of section 7); or (v) articles of precious metal or rolled precious metal, or articles coated or plated with precious metal.		
	2. General principles with respect to containers are set forth in the general notes at the beginning of this schedule. Special classification provisions relating to substantial containers suitable for reuse are included in chapters 1C and 5C of section 8.

	CHAPTER 4. - MACHINERY AND MECHANICAL EQUIPMENT		
	Notes: 1. This chapter does not cover -- (i) bobbins, spools, cops, tubes, and similar holders; (ii) belts and belting; (iii) machine clothing, other than card clothing provided for in items 670.52 and 670.54; (iv) articles of textile materials; articles of stone, of ceramic ware, of glass, or of other materials provided for in section 5; or articles of leather or of fur on the skin; or (v) articles and parts of articles specifically provided for elsewhere in this schedule. 2. Unless the context requires otherwise, and subject to note 1 to unit A of this chapter, a multi-purpose machine is classifiable according to its principal purpose, but if such a machine is not described in a superior tariff heading as to its principal purpose, or if it has no one principal purpose, it is classifiable in unit H of this chapter as a machine not specially provided for. 3. An electric motor or other power unit imported with a machine is classifiable with such machine as an entirety if fitted thereto when imported, or, if the machine or its framework is designed to receive the power unit, or if the shipment includes a common base designed to receive both the power unit and the machine.

	CHAPTER 5. ELECTRICAL MACHINERY AND EQUIPMENT		
	Notes:		
	1. This chapter does not cover -- (i) electrical insulators or insulating materials (classifiable in other sections according to materials of which made); (ii) certain carbons, electrodes, and brushes provided for in chapter 1E of section 5; (iii) ceramic electrical ware (chapter 2D of section 5); (iv) electric blankets and other electrically warmed bedding (see chapter 5B of section 3); (v) washing machines, ironing machines, sewing machines, and other machines provided for in chapters 4 or 6 of this section; or (vi) electrical instruments and apparatus provided for in section 7.		
	2. For the purposes of this chapter (items 682.05 and 682.07), the rated kVA of a transformer is the kilovolt-ampere output on a continuous duty basis at the rated secondary voltage (or amperage, when applicable) and at the rated frequency without exceeding the rated temperature limitations.

	3. For the purposes of this chapter, the term "complete", as used to describe television receivers, means a television receiver, fully assembled, whether or not packaged or tested for distribution to the ultimate purchaser. 1/		
	4. For the purposes of this chapter (item Ex 685.20), subassemblies contain one or more of the following television components: tuner, channel selector assembly, antenna, deflection yoke, degaussing coil, picture tube mounting bracket, grounding assembly, parts necessary for fixing the picture tube or tuner in place, consumer operated controls, or speaker. 1/		
	5. For the purposes of this chapter, "transceivers" are combinations of radio transmitting and receiving equipment in a common housing, employing common circuit components for both transmitting and receiving, and which are not capable of simultaneously receiving and transmitting. 2/		
	6. For the purposes of this schedule, hand-held Citizens Band (CB) radio transceivers are Citizens Band (CB) radio transceivers designed for operation in the hand, having a permanently affixed antenna and an internal microphone, and not designed for use with an external power source. 2/		

1/ Notes 3 and 4 are not in the Tariff Schedules of the United States on December 1, 1978.
2/ Headnotes 3 and 4 of TSUS schedule 6, part 5, have been renumbered as notes 5 and 6 to this chapter.

	Unit A. - Optical Elements, Spectacles, Microscopes, and Telescopes, Optical Goods Not Elsewhere Provided For		
	Notes:		
	1. The provisions for optical elements in this unit do not cover --		
	(i) unmounted optical elements of glass or synthetic optical crystals unless such elements have been optically worked (see chapter 3A of section 5);		
	(ii) plates or sheets of polarizing material unless cut to shape or mounted (see chapter 3A of section 5);		
	(iii) photographic filters (see unit F of this chapter).		
	2. The term "optically worked", as used in this unit, means that the glass or the synthetic optical crystals have been subjected to grinding or polishing incident to surface shaping for producing optical properties.		
	3. The provisions for mounted optical elements cover such elements when in a permanent frame or other mounting suitable for fitting to an apparatus or instrument and do not include mounted elements which are themselves separate instruments or apparatus such as spectacles, medical or dental mirrors, and hand magnifying glasses.		
	4. Sets comprised of tools, implements, and other articles fitted into and imported with cases containing microscopes provided for in item 708.71, and ordinarily sold at retail, and used, in conjunction with such microscopes, are classifiable therewith.

	Unit E. - Watches, Clocks, and Timing Apparatus		
	Notes: 1/		
	1. This unit covers watches and clocks, time-switches and other timing apparatus with clock or watch movements, and parts of these articles. This unit, however, does not cover -- (i) synchronous or subsynchronous motors (see chapter 5 of section 6); (ii) screws, nuts, and bolts (see chapter 30 of section 6); (iii) music boxes and their mechanisms (see chapter 3 of section 7); (iv) combination articles provided for elsewhere in this schedule; or (v) clock and watch glasses and glass domes (see chapter 3 of section 5).		
	2. For the purposes of this unit -- (a) the term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches, stopwatches, and watches designed for use in skindiving) suitable for wearing or carrying on or about the person, whether or not the movement therein is within the definition of "watch movement" in note 2(b), below; (b) the term "watch movement" means a timepiece movement measuring less than 1.77 inches in width and less than 0.50 inch in thickness; (c) the term "clock movement" means any movement or mechanism, other than "watch movements" as defined in note 2(b), above, intended or suitable for measuring time;		

1/ Headnotes 4 and 6 of TSUS schedule 7, part 2E, are omitted; headnote 5 of TSUS schedule 7, part 2E, is renumbered as note 4 to this unit.

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(d) the term "cases" embraces inner and outer cases, containers, and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases, and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches, and other apparatus provided for in this unit; and (e) the term "jewels" includes substitutes for jewels. 3. [(a) In this unit the rate of duty column with respect to watch movements having not over 7 jewels has been divided into two columns, viz., A and B. The rates of duty in column A apply to watch movements which have 7 jewels or which, if having less than 7 jewels, do not have a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel. The rates of duty in column B apply to watch movements having under 7 jewels and having a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel.] 1/ (b) The complete citation for watches covered by item 715.05 and clocks covered by item 715.15 shall be each of such item numbers, followed by the appropriate item numbers for the respective movements and cases comprising such watches or clocks. Thus, item 715.05-716.08-720.00 is the correct citation for a watch in a gold case having over 17 jewels. [(c) In this unit, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.10 through 716.36, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by items 717.--, 718.--, and 719.--. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 717.31" would be the citation for an adjusted watch movement, 0.7 inch wide, having 17 jewels, but not self-winding and not constructed or designed to operate for a period in excess of 47 hours without rewinding.] 1/		

1/ Headnote 3(a) will be removed from the Tariff Schedules of the United States and Schedule XX to the GATT. Headnote 3(c) will be revised to reflect the modification in nomenclature for items 717.--, 718.--, and 719.--.

Tariff item number	Description of products	Offer rate	Rate of duty Jan. 1, 1975
	(d) The width of a watch or clock movement, as defined in note 2(b) and (c) of this unit, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents. (e) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (bruising, adjustment to temperature or two adjustments), in accordance with the marking as hereinafter provided for. (f) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.82, 720.84, and 720.86. 4. Combination Articles Containing Watch or Clock Movements.--A watch or clock movement (and its dial, if any) in a combination article is classifiable under the provision applicable to such combination article, but, in determining the duties on the combination article, the movement (and its dial, if any) shall be constructively severed therefrom and assessed with the same rate as would have applied if it had been imported separately. However, such separate assessment shall not be applicable to movements which, when imported, are installed as the usual equipment of vehicles or craft provided for in chapter 6 of section 6 or as integral or essential parts of laboratory, industrial, or commercial apparatus or equipment.

	CHAPTER 3. - MUSICAL INSTRUMENTS, PARTS, AND ACCESSORIES		
	Unit A. - Musical Instruments		
	Notes:		
	1. This unit does not cover -- (i) articles which are toys (see chapter 5 of this section); or (ii) articles which are antiques (see chapter 11 of this section).		
	2. For the purposes of this unit -- (a) the term "brass wind instruments" refers to wind instruments of the "cupped-mouthpiece family" such as, but not limited to, trumpets, trombones, cornets, bass horns, sousaphones, bugles, French horns, coronets, flugelhorns, and saxhorns; (b) the term "wood-wind instruments" refers to wind instruments usually sounded with reeds, and includes, but is not limited to, clarinets, oboes, bassoons, English horns, flutes, recorders, fifes, flageolets, piccolos, saxophones, and sarrusophones; and (c) the term "electronic musical instruments" embraces musical instruments in which the sound is generated electrically, and conventional-type instruments not suitable for playing without electrical amplification, but the term does not include conventional-type instruments, fitted with electrical pickup and amplifying devices, when the instrument is suitable for playing without such amplification.		
	3. The provisions of this unit for string, wind, and percussion musical instruments include such instruments whether or not fitted with electrical pickup and amplifying devices. Such devices, however, are separately classifiable from the musical instrument with which imported unless such devices are, or are designed and intended to be, fitted into or housed in the instrument itself.

UNITED STATES DELEGATION

Mr. Olivier Long
Director-General
General Agreement on Tariffs
and Trade
Centre William Rappard
154, rue de Lausanne
1211 Geneva 21

Dear Mr. Director-General:

As you are aware, the United States has completed its tariff negotiations with a large number of our trading partners and we expect to conclude with a number of others in the days immediately ahead. United States authorities have accordingly begun to consider the technical requirements for updating the draft U.S. Schedule XX to incorporate the results of our bilaterals. About six weeks will be required to update the draft Schedule XX, and to verify concessions mutually exchanged. We plan to begin this process on March 1 so as to be in a position to have a Schedule XX in final legal form by mid-April that will embody all U.S. tariff concessions negotiated in the MTN.

Accordingly, we will be making final adjustments in our offers based on the status of bilateral negotiations as of February 28, 1979.

I would be grateful if you would circulate this letter to all MTN participants.

Sincerely yours,

William E. Culbert

Centre William Rappard

Dear Mr. Director-General:

The introduction to the United States offers dated January 15, 1978, and subsequent revisions noted that those offers may be adjusted as the result of bilateral and plurilateral negotiations and shall be implemented only if appropriate concessions or contributions have been received from countries that will receive substantial benefits from U.S. concessions. In this connection, the United States wishes to inform other countries with whom it is negotiating that its greater-than-formula offers on non-agricultural products will be withdrawn to formula offers at the close of business on February 28, 1979, unless the United States in its bilateral negotiations has made commitments to maintain its original offers.

Please circulate copies of this letter to all participants in the Multilateral Trade Negotiations so they are informed in advance of this intended action as we complete our bilateral negotiations.

Sincerely yours,

Alonzo L. McDonald
