SWEDISH DELEGATION

Geneva, 19 January 1978

Mr Director-General,

In view of the general agreement between the participants in the Multilateral Trade Negotiations to present offers by mid-January 1978, I would like to inform you that the Nordic countries, Finland, Norway and Sweden, have decided to present the enclosed offer concerning tariff reductions on industrial products. I would be grateful if the attached document could be circulated to the participants in the Multilateral Trade Negotiations.

Please accept, Sir, the assurance of my highest consideration.

Nordic offers - tariffs on industrial products

I. The Nordic countries - Finland, Norway and Sweden - offer to apply the Swiss formula (MTN/TAR/W/34) with the coefficient 16 for tariff reductions on industrial products leading to substantial tariff cuts based on the principle of harmonization. The offer is made on the understanding that at least the same liberal formula and coefficient will be applied by other participants. The Nordic countries will keep their exceptions to this reduction formula to a minimum.

II. The Nordic countries are prepared to reduce tariffs over a period of eight years in annual stages in such a way that the total reductions agreed between participants are secured.

III. Tariff reductions will be made on the basis of GATT-bound rates for bound tariff items, and on the basis of statutory rates for unbound tariff items.

IV. The Nordic countries expect in the light of the Tokyo declaration all participants to contribute substantially to the current tariff reduction negotiations taking due account of GATT article XXVIII bis. A major goal for the Nordic countries is to secure an increased overall rate of bindings.

V. The Nordic countries will consider their offer in the light of offers from other participants as well as the need for overall reciprocity between participants, taking into account the quality of the offers, the harmonization objective, and the special situation of the developing countries.

SWEDISH DELEGATION CONFIDENTIAL

Multilateral Trade Negotiations March 1978

Sweden's offer on tariff reductions for industrial products

Sweden - together with Finland and Norway - offered in a letter to the Director General of GATT on January 19, 1978 to apply the Swiss formula (MTN/TAR/W/34) with the coefficient 16 for tariff reductions on industrial products. The attached list is the result of the application of this formula without exceptions on the Swedish customs tariffs as of January 1, 1978.

Sweden is prepared, upon request, to consider deeper-than-formula cuts on specific items.

Concerning the important question of exceptions Sweden wishes to state that like in other countries some industrial sectors of the Swedish economy are having serious problems. Sweden can not be expected to reduce tariffs on products from the referred sectors if major trading nations exempt such products from tariff reductions.

This question must be seen in the light of offers from other participants as well as the need for overall reciprocity between participants in all areas of the negotiations, taking into account the quality of the offers and the harmonization objective. Necessary adjustments will be kept to a minimum.

Certain countries have submitted complete and detailed offers, others have not reached that stage yet. It is already now clear that important exceptions have been made and that certain offers deviate substantially from the application of the Swiss formula. Sweden's analysis of submitted detailed offers has not yet been completed and further clarifications are needed in this respect.

The attached list does not include the products which Sweden has notified as agricultural products in accordance with the arrangements agreed on in the group "Agriculture" (MTN/AG/W/34).

The formula used is $z = \frac{16\ x}{16+x}$ (where x is the base rate and z the resulting tariff rate).
Duty rates resulting from the formula are rounded to one decimal point.

The base rate is the GATT bound rate for bound tariff items as agreed in the group "Tariffs" at its meeting in March 1975, and the staturory rate for unbound tariff items.

The ad valorem equivalents to the specific and compound rates (column 4) are calculated on that part of the imports in 1976 which is not covered by the EFTA agreement, the EC agreement and the GSP Scheme.

Used abbreviations:

a v i = ad valorem incidence
n a = not available
n b = no binding

SWEDISH DELEGATION

Geneva, 4 July, 1978

SECRET

Dear Mr Ambassador,

Following the joint Nordic offer on January 19, 1978, to apply the Swiss formula with the coefficient 16 for tariff reductions on industrial products Sweden distributed on 9 March, 1978, a detailed offer list showing the application of this formula without exceptions on the Swedish customs tariff.

When presenting its detailed offer Sweden made the following reservation and I quote:

"Concerning the important question of exceptions Sweden wishes to state that like in other countries some industrial sectors of the Swedish economy are having serious problems. Sweden can not be expected to reduce tariffs on products from the referred sectors if major trading nations exempt such products from tariff reductions.

This question must be seen in the light of offers from other participants as well as the need for overall reciprocity between participants in all areas of the negotiations, taking into account the quality of the offers and the harmonization objective. Necessary adjustments will be kept to a minimum.

Certain countries have submitted complete and detailed offers, others have not reached that stage yet. It is already now clear that important exceptions have been made and that certain offers deviate substantially from the application of the Swiss formula. Sweden's analysis of submitted detailed offers has not yet been completed and further clarifications are needed in this respect."

In the light of developments in the field of tariff negotiations and the Swedish Government's analysis of the current situation in terms of existing offers and exceptions my Government has deemed it necessary to submit the attached

indicative list of possible withdrawals. It is the express wish of my Government to negotiate further improvements in the offers of other participants, which would make it possible to revise the contents of the list. If on the other hand additional exceptions are tabled by major trading nations further products might have to be added to this list.

Let me also stress that products from the steel industry, which is now experiencing extensive difficulties, are of great significance for Sweden's exports. The Swedish steel tariffs have over the years already reached a low level by international comparison. In the light of exceptions already made by other trading partners in this field it will be difficult to fully apply the reduction formula for these products if our partners are not able to do the same.

Sincerely yours,

Carl De Geer
Permanent Representative

SWEDISH DELEGATION

June 1, 1979

Sweden's tariff offer in the MTN

1. I have the honour to enclose herewith Sweden's tariff offer in the Multilateral Trade Negotiations as of June 1, 1979 on agricultural and industrial products. Only those items for which concessions are being offered are covered in the list, which also comprises the reductions offered in the group "Tropical Products", which were implemented on January 1, 1977.

2. The base rate is the GATT bound rate for bound tariff items as agreed in the tariff group in March 1975, and the statutory rate for unbound tariff items (Unbound base rates are indicated by "n.b.).

3. The statistical numbers are those valid on January 1, 1979.

4. Offered ad valorem duty rates are rounded to the nearest one-tenth of a percent.

5. For non-agricultural products Sweden has based its offer on a harmonization formula of $z=16x/16+x$, where x is the initial tariff rate and z the final tariff rate.

6. The offered concession rates represents the rates at the final stage of implementation. Sweden has assumed that, in general, the reduction would be implemented over a period of eight years. It is the view of Sweden that the modalities of this implementation should be established by multilateral agreement within short in such a way that the total reductions agreed between participants are secured. Pending resolution of this question Sweden reserves its position as to how its offered concessions will be implemented.

7. Sweden has furthermore assumed that the reductions would start on January 1, 1980. Should, however, other participants postpone the reductions for certain items Sweden reserves its rights to act accordingly.

8. The offered concessions now presented are without

prejudice to certain adjustments that may be necessary in the light of possible deviations from earlier presented concessions by some other MTN participants.

April 12, 1979

SWEDEN'S TARIFF OFFER IN THE MTN

1. I have the honour to enclose herewith Sweden's revised tariff offer in the MTN as of April 12, 1979 on Agricultural (Annex I) and Industrial Products (Annex II).

2. According to the procedure adopted in the MTN group "Agriculture", Annex I covers only those items for which concessions are being offered. Annex II consists of all non-agricultural items in the Swedish customs tariff.

3. Annex I and II comprise all earlier offers including the list for possible adjustment from July 1978 with certain amendments and additions. This also applies to the reductions offered in the group "Tropical Products", which were implemented on January 1st, 1977.

4. The base rate is the GATT bound rate for bound tariff items as agreed in the Tariff Group in March 1975, and the statutory rate for unbound tariff items. (Unbound base rates are indicated by "n.b").

5. Offered ad valorem duty rates are rounded to the nearest one-tenth of a percent.

6. For non-agricultural products (Annex II) Sweden has based its offer on a harmonization formula of $z = 16x/16+x$, where x is the initial tariff rate and z the final tariff rate.

In order to facilitate the evaluation of the reductions offered the following symbols are used:

F = Concession offered conforms to a formula tariff reduction

G = Concession offered is greater than a formula tariff reduction

L = Concession offered is less than a formula tariff reduction.

7. The offered concession rate is the final stage of implementation. Sweden has assumed that, in general, the reduction would be implemented over a period of eight years. It is the view of Sweden that the rate and modalities of this implementation should be established by multilateral agreement within short in such a way that the total reductions agreed between participants are secured. Without such an agreement Sweden reserves its position with regard to the way and the extent to which the attached Swedish offer will be implemented.

8. The offer now presented is without prejudice to certain technical adjustments that could be made in the light of the final analysis.

ARRANGEMENT BETWEEN

THE UNITED STATES AND SWEDEN

CONCERNING CHEESES

The United States and Sweden agree on an arrangement concerning cheese, as set forth in the enclosure.

For the Delegation

of Sweden

For the Delegation

of the United States

Geneva, June 13, 1979

ARRANGEMENT BETWEEN
THE UNITED STATES AND SWEDEN
CONCERNING CHEESES

The United States agrees to bind in Schedule XX of the General Agreement on Tariffs and Trade the quota levels by type of cheese listed in Annex I. These quotas will be established under the authority of Section 22 of the Agricultural Adjustment Act of 1933 in compliance with the GATT Waiver of 1955.

The global volume of the quotas granted to Sweden for cheeses subject to the quota system will amount to a minimum of 1,350 metric tons. The distribution of the quotas between the different varieties is that listed in Annex I of the Arrangement. The United States agrees to take all reasonable measures to permit the maximum utilization of the quotas. It is, however, understood that in the event Sweden is unable to supply a given annual quota, the United States may authorize a temporary country of origin adjustment for the remainder of the quota year so that United States importers and licensees may be able to use their import licenses elsewhere.

Sweden agrees not to grant subsidies on the production or export of cheese shipped to the United States under quota in a manner so as to result in the sale of such cheese on the United States wholesale market at prices below those offered for like United States products. A mechanism to ensure compliance with this commitment will be established under which the United States will consult promptly with Sweden in the event imports are priced below United States wholesale levels by reason of subsidy. Such consultations will be undertaken in order to give Sweden an adequate opportunity to take remedial action to terminate the price undercutting.

As long as the above stated price condition is met, the United States agrees not to take counteraction on cheese imports from Sweden under quota. However, it is understood that should these assurances not be met, the United States will take appropriate countermeasures.
