PERMANENT MISSION OF FINLAND

No. 2300

Geneva, May 11, 1978

Sir,

With reference to the general offer of the Nordic countries concerning tariffs in industrial products, contained in letter dated January 19, 1978, I have the honour to enclose herewith Finland's detailed offer.

A cover note of explanatory nature is also enclosed herewith.

In the preparation of the offer due account has been taken of the offers of certain other participating countries in tariffs in industrial products, as well as in non-tariff measures and agricultural products.

The right to make modifications to this offer is reserved.

Two copies of this offer are available for the GATT Secretariat and each participating country.

Accept, Sir, the assurances of my highest consideration.

Yours sincerely,

Paavo Kaarlehto

FINLAND'S OFFER ON TARIFF REDUCTIONS FOR INDUSTRIAL PRODUCTS

1. Finland - together with Norway and Sweden - offered in a letter to the Director General of GATT on January 9, 1978 to apply the Swiss formula (MTN/TAR/W/34) with the coefficient 16 for tariff reductions on industrial products.

2. The attached Finnish offer is, as a rule, based on the above formula taking into account the ceiling of 60 per cent reductions. Certain exceptions have been made to this formula. These concern highly sensitive products in Finland for which no concessions have been offered. These products represent only 9.2 per cent of the Finnish MFN-imports in industrial products.

3. In some cases the revision of the Finnish tariff in regard to partial bindings has lead to deviation from the formula in the form of greater or smaller reductions. In certain cases the concession offered is the binding of a previously unbound rate.

4. The base rate used is the GATT bound rate for bound tariff items and the statutory rate for unbound items.

5. The ad valorem equivalents to the specific and compound rates are calculated on the basis of the Finnish MFN-imports in 1976.

6. As indicated in the offer of January 19, 1978 Finland is prepared to reduce tariffs over a period of eight years in annual stages in a way to be agreed upon between the participants.

7. Duty rates resulting from the reduction formula are rounded to the nearest one-tenth of a percent.

8. The following symbols are used in the offer to provide explanatory notes for individual items:

Symbol	Explanation
F	Concession offered conforms to the formula tariff reduction
G	Concession offered is greater than a formula tariff reduction
L	Concession offered is less than a formula tariff reduction
X	Item on the exception list
U	Unbound rate which will be bound
Z	Unbound rate not to be bound
A	Agricultural product

FINLAND'S TARIFF OFFER IN THE MTN

The following positions, which due to a technical error, are missing from Finland's tariff offer of 12 April 1979 should be added to Annex I (Final Agricultural Tariff Offer):

PERMANENT MISSION OF FINLAND
IN GENEVA

CONFIDENTIAL

Geneva, 12 April 1979

FINLAND'S TARIFF OFFER IN THE MTN

Please find enclosed Finland's revised tariff offer in the MTN on agricultural (Annex I) and industrial products (Annex II).

According to the procedures adopted in the Group "Agriculture", Annex I includes only those items for which concessions are being offered. Annex II consists of all non-agricultural items in the Finnish Customs Tariff.

Reference is also made to the Finnish concessions offered in the Group "Tropical products", as reflected in Document MTN/TP(Secret)2/Rev.3. These were already implemented as of January 1, 1977.

The base rate used is the GATT bound rate for bound tariff items and the statutory rate for unbound items.

Finland has based its offer in industrial products on the formula $z = 16\ x\ /\ (\ 16 + x\ )$, where x is the initial tariff rate and z the final tariff rate. Duty rates resulting from the reduction formula are rounded to the nearest one-tenth of a per cent.

The offered concession rates represent the rates at the final stage of the implementation of the tariff reductions.

1678020931—27

Finland anticipates that, in general, the reductions would be implemented over a period of eight years according to the modalities to be established within a near future by multilateral agreement in such a way that the total reductions agreed are secured. In absence of such an agreement Finland reserves its position with regard to the way in which the attached Finnish offer will be implemented.

The following symbols are used in the offer to provide explanatory notes for individual items:

Symbol	Explanation
F	Concession offered conforms to the formula tariff reduction
G	Concession offered is greater than a formula tariff reduction
L	Concession offered is less than a formula tariff reduction
X	Item on the exception list
U	Unbound rate which will be bound
Z	Unbound rate not to be bound
A	Agricultural product

A copy of these comprehensive records have been exchanged with the delegations of Canada, Japan and the United States.

SCHEDULE XXIV - FINLAND

The concession rates in the Schedule represent the rates at the final stage of the implementation of the tariff reductions.

The tariff reductions on products in CCCN chapters 25 - 99 are based on the formula $z = 16 x / (16 + x)$, where x is the initial tariff rate and z the final tariff rate. Duty rates resulting from the reduction formula are rounded to the nearest one tenth of a per cent.

The reductions will be implemented over a period of eight years according to the modalities set out in paragraph 2 of the Draft Geneva (1979) Protocol, however, taking into account the implementation of concessions offered by other MTN-participants.

In CCCN chapters 1 - 24 of the Schedule, only items on which concessions were given in the Multilateral Trade Negotiations are listed. In chapters 25 - 99 the Schedule contains all items in the Customs Tariff of Finland. The following symbols are used in the Schedule to provide explanatory notes for individual items:

Symbol	Explanation
F	Concession offered conforms to the formula tariff reduction
G	Concession offered is greater than a formula tariff reduction
L	Concession offered is less than a formula tariff reduction
X	Item on the exception list
U	Unbound rate which will be bound
Z	Unbound rate not to be bound
A	Agricultural product
