païdos

Observer, Penser et Agir pour l'enfance et l'adolescence

The **Association Païdos** was founded in 1996. Its innovative therapeutic and educational methods help numerous children in precarious situations and adolescents with adjustment problems to find, over a number of months, their identity and their place in the family, school and society.

Each year more than 850 children attend its creative workshops, while the psychopedagogical centre for adolescents helps more than 60 young people with educational difficulties. More than 1,000 school children participate in awareness-raising visits.

For further information on the activities and work undertaken by this initiative please consult: <http://www.paidos.org/>

The proceeds from the WTO Open Day will be donated to L'association Païdos a recognized local charity initiative in Geneva that supports children and youth living in precarious situations.
