

WORLD TRADE
ORGANIZATION

What are the latest trends in **world trade**?

- Which countries are the world's leading exporters/importers?
- Which exports have recorded the strongest growth?
- What are the tariffs imposed by WTO members?

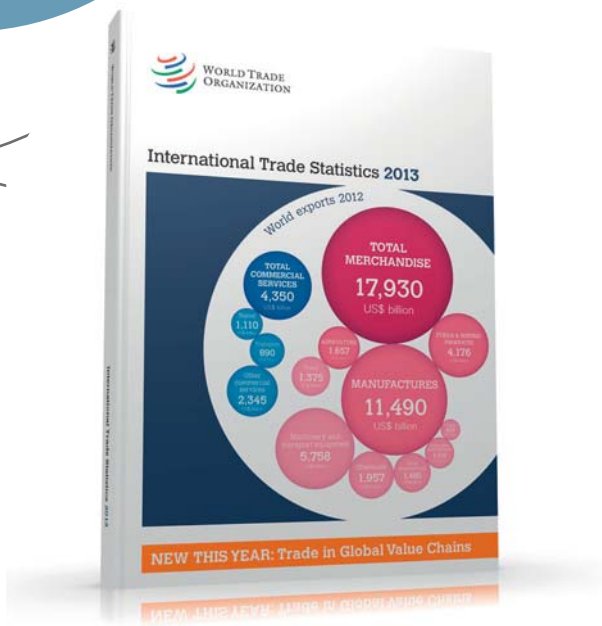

The World Trade Organization
brings you comprehensive data on all aspects of world trade.

New 2013 editions

New Data on global value chains

International Trade Statistics 2013

International Trade Statistics 2013 offers a comprehensive overview of the latest developments in world trade, covering trade in merchandise and commercial services as well as, for the first time, trade in global value chains.

Each chapter is introduced by a key developments section that identifies the most salient trends in the data, illustrating them with charts and maps. A methodological chapter explains essential concepts and definitions used in compiling the statistics.

- Charts and maps highlight the latest developments in world trade
- Over 100 tables provide detailed breakdowns of all aspects of trade data

This year's edition provides data up to the end of 2012.

International Trade Statistics is an invaluable reference tool for researchers, policy makers, and anyone interested in international trade.

World Tariff Profiles 2013

World Tariff Profiles 2013 — a joint publication of the WTO, the International Trade Centre (ITC) and the UN Conference on Trade and Development (UNCTAD) — provides comprehensive tariff information on all WTO members and a number of other countries where data is available. It is the only compilation of tariff information of its kind available to researchers and negotiators.

The publication summarizes the market access that each country offers to imports as well as the market access conditions faced by its products in its major export markets. The profiles show both the maximum tariff rates that are legally "bound" in the WTO and the rates that countries actually apply.

The technical annex in this year's issue focuses on WTO members' participation in regional trade agreements (RTAs), with complementary data provided on tariff elimination in RTAs notified under the WTO's Transparency Mechanism.

Trade Profiles 2013

Trade Profiles 2013 provides the latest information on trade flows and the trade policy measures of WTO members, observers and other selected economies. With information for each of these provided in a standardized format, the publication is a quick reference tool for anyone looking for essential trade statistics.

The data provided include basic economic indicators (such as gross domestic product or GDP), trade policy indicators (such as tariffs, import duties, the number of disputes, notifications outstanding and contingency measures in force), merchandise trade flows (broken down by broad product categories and major origins and destinations), services trade flows (with a breakdown by major components) and industrial property indicators.

With one page devoted to each economy, **Trade Profiles** offers a concise overview of global trade.

NEW!

Services Profiles 2013

Services Profiles 2013 provides statistics on key "infrastructure services", i.e. transportation, telecommunications, finance and insurance, for 140 economies. The information is derived from multiple sources, such as national accounts, employment statistics, balance of payments statistics, foreign affiliates' trade in services (FATS) statistics, foreign direct investment (FDI) statistics and quantitative indicators largely sourced from international/regional organizations and specialized bodies.
