

Organised by: Azerbaijan Food and Beverage Industrialists Association

Session Type: Conferences

Session Title

Sustainable Horizons: Innovations in Azerbaijan's Food and Beverage Industry

Session Description

This event will spotlight pioneering innovations within Azerbaijan's food and beverage industry, particularly focusing on sustainable practices currently implemented by AQISA member companies. The session will delve into key areas, including wastewater recycling, advanced water treatment technologies, and the use of renewable energy in food and beverage manufacturing. These topics align with COP29's sustainability goals by highlighting practical solutions for resource efficiency and environmental conservation within the sector. By showcasing these advancements, the session aims to inspire industry stakeholders to adopt similar practices, contributing to a greener, more sustainable future for Azerbaijan's food and beverage industry.
