

## **Circularity for a Sustainable Future**

Virtual on Zoom and in Room W

19 October 2022      11:30 – 13:00 CET

This event is being organized in the context of "Trade and Environment Week 2022".

### **Abstract:**

The session will explore the beneficial aspects of "Circularity" and its role in creating a Sustainable Future for all, as well as the interdependency between global trade, environment, technology and innovation. Shedding the light on the relevant innovative technologies to address "Circularity" of "Materials" and "Emissions" bringing together a diverse panel of experts from the Public and Private sectors, and Research centres to highlight key facets of Circularity and its role in addressing key challenges in relation to trade and environment.

The session's topics will include policies and frameworks needed by governments to spur innovation, ameliorate trade-offs, and create new private sector business models. Speakers will also provide examples from on ground implementation of Circularity.
